The Snapping Turtle by Joseph Bruchac - Story Review ...

The Apalachicola snapping turtle (*Macrochelys apalachicola*) is a proposed species that lives in the Apalachicola River, United States. It has traditionally been included as part of the widespread species *M. temminckii*, but an analysis in 2014 recommended treating it as distinct. A study published the following year considered this change unwarranted and recommended that *M. apalachicola* ...

10 Biting Facts About Snapping Turtles | Mental Floss

The common snapping turtle, as its name implies, is the most widespread. The common snapping turtle is noted for its combative disposition when out of the water with its powerful beak-like jaws, and highly mobile head and neck (hence the specific name *serpentina*, meaning "snake-like"). In water, they are likely to flee and hide themselves ...

The Snapping Turtle

The alligator snapping turtle (*Macrochelys temminckii*) is a species of turtle in the family Chelydridae. The species is native to freshwater habitats in the United States. *M. temminckii* is one of the heaviest freshwater turtles in the world. It is often associated with, but not closely related to, the common snapping turtle, which is in the genus *Chelydra*.
