More than eighty designs--iconic, archaic, quotidian, and taboo--that have defined the arc of human reproduction. While birth often brings great joy, making babies is a knotty enterprise. The designed objects that surround us when it comes to menstruation, birth control, conception, pregnancy, childbirth, and early motherhood vary as oddly, messily, and dramatically as the stereotypes suggest. This smart, image-rich, fashion-forward, and design-driven book explores more than eighty designs--iconic, conceptual, archaic, titillating, emotionally charged, or just plain strange--that have defined the relationships between people and babies during the past century. Each object tells a story. In striking images and engaging text, *Designing Motherhood*

unfolds the compelling design histories and real-world uses of the objects that shape our reproductive experiences. The authors investigate the baby carrier, from the Snugli to BabyBjörn, and the (re)discovery of the varied traditions of baby wearing; the tie-waist skirt, famously worn by a pregnant Lucille Ball on *I Love Lucy*, and essential for camouflaging and slowly normalizing a public pregnancy; the home pregnancy kit, and its threat to the authority of male gynecologists; and more. Memorable images--including historical ads, found photos, and drawings--illustrate the crucial role design and material culture plays throughout the arc of human reproduction. The book features a prologue by Erica Chidi and a foreword by Alexandra Lange. Contributors Luz Argueta-Vogel, Zara Arshad, Nefertiti Austin, Juliana Rowen Barton, Lindsey Beal, Thomas Beatie, Caitlin Beach, Maricela Becerra, Joan E. Biren, Megan Brandow-Faller, Khiara M. With more than 23 million Americans looking for work, job generation is a priority for restoring the American economy. Yet many of the unemployed and underemployed are not looking for just any job, but the right job, one that will complement their skill sets and desires. The right choice for many is working alongside innovative entrepreneurs who are playing a major role in changing today's business climate. Steven R. Musick, owner of the decades old company Destiny Capital and a Professor at the University of Denver, believes the key to job generation is tapping into

America's exceptional entrepreneurial spirit fueled by hundreds of thousands of young, creative people. But once they have found their Big Idea, many creative minds often find themselves a loss for how to make it take seed, find capital to expand, distinguish themselves in the marketplace from their competitors along with a myriad of other issues that face an entrepreneur. At the same time, with millions on the job market, how do potential employees stand out during an interview, knowing the right questions to ask to separate themselves from the sea of other candidates? Professor Musick has the answers in this informative, challenging book, a key component of his entrepreneurial class. This book is full of real life examples of model companies whose time-tested management techniques and forward thinking processes have made themselves leaders in their industries, always ahead of their competitors with new ideas that allow their companies to grow, adding jobs to the American economy. Life lessons are also here for job seekers, with stories from workers whose thought provoking interviews have allowed them to clinch the job, letting their unique skills become integral components which have helped propel their chosen companies to the top of their sectors. With this book, Professor Musick shows that job generation, the way to keep America on a steady path of growth, can be achieved by those with the right entrepreneurial spirit and the skills to keep the economy humming. How will America get back on the right track? Job generation is the answer.

The year is 2025. Immense numbers of people swarm the globe. In countless, astonishing ways, technology has triumphed—but at a staggering cost. Starvation is rampant. City dwellers gasp for breath under blackened skies. And tottering on the brink of environmental collapse, the world may be ending ... It is a future that could well be ours. In their second shocking and fascinating portrait of America's possible destiny, Whitley Strieber and James Kunetka have again written a breathless thriller, a book that gives us an important warning and ultimately a message of hope.

Perfect for expecting parents who want to provide a soothing home for the newest member of their family, *The Happiest Baby on the Block*, the national bestseller by respected pediatrician and child development expert Dr. Harvey Karp, is a revolutionary method for calming a crying infant and promoting healthy sleep from day one. In perhaps the most important parenting book of the decade, Dr. Harvey Karp reveals an extraordinary treasure sought by parents for centuries --an automatic “off-switch” for their baby’s crying. No wonder pediatricians across the country are praising him and thousands of Los Angeles parents, from working moms to superstars like Madonna and Pierce Brosnan, have turned to him to learn the secrets for making babies happy. Never again will parents have to stand by helpless and frazzled while their poor baby cries and cries. Dr. Karp has found there IS a remedy for colic. “I share with parents techniques known only

to the most gifted baby soothers throughout history ...and I explain exactly how they work.” In a innovative and thought-provoking reevaluation of early infancy, Dr. Karp blends modern science and ancient wisdom to prove that newborns are not fully ready for the world when they are born. Through his research and experience, he has developed four basic principles that are crucial for understanding babies as well as improving their sleep and soothing their senses:

- *The Missing Fourth Trimester*: as odd as it may sound, one of the main reasons babies cry is because they are born three months too soon.
- *The Calming Reflex*: the automatic reset switch to stop crying of any baby in the first few months of life.
- *The 5 “S”s*: the simple steps (swaddling, side/stomach position, shushing, swinging and sucking) that trigger the calming reflex. For centuries, parents have tried these methods only to fail because, as with a knee reflex, the calming reflex only works when it is triggered in precisely the right way. Unlike other books that merely list these techniques Dr. Karp teaches parents exactly how to do them, to guide cranky infants to calm and easy babies to serenity in minutes...and help them sleep longer too.
- *The Cuddle Cure*: the perfect mix the 5 “S”s that can soothe even the most colicky of infants. In the book, Dr. Karp also explains: What is colic? Why do most babies get much more upset in the evening? How can a parent calm a baby--in mere minutes? Can babies be spoiled? When should a parent of a crying baby call the doctor? How can a parent get their baby to sleep a few hours longer? Even the most loving moms and dads sometimes feel pushed to the breaking point by their infant’s persistent cries. Coming to the rescue, however, Dr. Karp places in the hands of parents, grandparents, and all childcare givers the tools they need to be able to calm their babies almost as easily as...turning off a light. Paulo Freire's critical pedagogy has had a profound influence on contemporary progressive educators around the globe as they endeavor to rethink education for liberation and the creation of more humane global society. For Freire, maintaining a sense of historicity, that is, the origins from which our thinking and practice emerges, is essential to understanding and practicing education as a means for liberation. Too often, however, critical pedagogy is presented as a monolithic philosophy, and the historical and intellectual roots of critical pedagogy are submerged. Through a compilation of essays written by leading and emerging scholars of critical pedagogy, this text brings history into the present and keeps Paulo's intellectual roots alive in all of us as we develop our praxis today.

Jeff Speck has dedicated his career to determining what makes cities thrive. And he has boiled it down to one key factor: walkability. The very idea of a modern metropolis evokes visions of bustling sidewalks, vital mass transit, and a vibrant, pedestrian-friendly urban core. But in the typical American city, the car is still king, and downtown is a place that's easy to drive to but often not worth arriving at. Making walkability happen is relatively easy and cheap; seeing exactly what needs to be done is the trick. In this essential new book, Speck reveals the invisible workings of the city, how simple decisions have cascading effects, and how we can all make the right choices for our communities. Bursting with sharp observations and real-world examples, giving key insight into what urban planners actually do and how places can and do change, Walkable City lays out a practical, necessary, and eminently achievable vision of how to make our normal American cities great again.

environment—yet few are taking the proper steps to get there. The goals are often clear, but the path is seldom easy. Jeff Speck's follow-up to his bestselling *Walkable City* is the resource that cities and citizens need to usher in an era of renewed street life. *Walkable City Rules* is a doer's guide to making change in cities, and making it now. The 101 rules are practical yet engaging—worded for arguments at the planning commission, illustrated for clarity, and packed with specifications as well as data. For ease of use, the rules are grouped into 19 chapters that cover everything from selling walkability, to getting the parking right, escaping automobilism, making comfortable spaces and interesting places, and doing it now! *Walkable City* was written to inspire; *Walkable City Rules* was written to enable. It is the most comprehensive tool available for bringing the latest and most effective city-planning practices to bear in your community. The content and presentation make it a force multiplier for place-makers and change-makers everywhere.

Zoo Animal Welfare thoroughly reviews the scientific literature on the welfare of zoo and aquarium animals. Maple and Perdue draw from the senior author 's 24

years of experience as a zoo executive and international leader in the field of zoo biology. The authors ' academic training in the interdisciplinary field of psychobiology provides a unique perspective for evaluating the ethics, practices, and standards of modern zoos and aquariums. The book offers a blueprint for the implementation of welfare measures and an objective rationale for their widespread use. Recognizing the great potential of zoos, the authors have written an inspirational book to guide the strategic vision of superior, welfare-oriented institutions. The authors speak directly to caretakers working on the front lines of zoo management, and to the decision-makers responsible for elevating the priority of animal welfare in their respective zoo. In great detail, Maple and Perdue demonstrate how zoos and aquariums can be designed to achieve optimal standards of welfare and wellness.
