Everything changes the day you discover you're going to be a mom. It's not just yourself that you think about—you have a child to care for, too. While you wouldn't trade your child for the world, some days are just hard. Baby-daddy drama, dealing with your parents, and worries about school, work, and your future slam you. Your friends can't relate to your little family, and you wonder if God has turned His back on you, too. Tricia Goyer understands. A mom at age 17, Tricia remembers what it felt like to carry the weight of the world on your shoulders. She's also been the coordinator of a teen mom support group for over twelve years, and she's cheered on many young moms—from all walks of life—through their journey. In *Teen Mom*, Tricia pours out her heart and shares advice for the hard things you face. She also longs to provide encouragement, reminding you that you can be the mom your child deserves—not in your own strength, but in the strength God provides.

Perfect for expecting parents who want to provide a soothing home for the newest member of their family, *The Happiest Baby on the Block*, the national bestseller by respected pediatrician and child development expert Dr. Harvey Karp, is a revolutionary method for calming a crying infant and promoting healthy sleep from day one. In perhaps the most important parenting book of the decade, Dr. Harvey Karp reveals an extraordinary treasure sought by parents for centuries --an automatic "off-switch" for their baby's crying. No wonder pediatricians across the country are praising him and thousands of Los Angeles parents, from working moms to superstars like Madonna and Pierce Brosnan, have turned to him to learn the secrets for making babies happy. Never again will parents have to stand by helpless and frazzled while their poor baby cries and cries. Dr. Karp has found there IS a remedy for colic. "I share with parents techniques known only to the most gifted baby soothers throughout history ...and I explain exactly how they work." In a innovative and thought-provoking reevaluation of early infancy, Dr. Karp blends modern science and ancient wisdom to prove that newborns are not fully ready for the world when they are born. Through his research and experience, he has developed four basic principles that are crucial for understanding babies as well as improving their sleep and soothing their senses: ·The Missing Fourth Trimester: as odd as it may sound, one of the main reasons babies cry is because they are born three months too soon. ·The Calming Reflex: the automatic reset switch to stop crying of any baby in the first few months of life. ·The 5 "S's": the simple steps (swaddling, side/stomach position, shushing, swinging and sucking) that trigger the calming reflex. For centuries, parents have tried these methods only to fail because, as with a knee reflex, the calming reflex only works when it is triggered in precisely the right way. Unlike other books that merely list these techniques Dr. Karp teaches parents exactly how to do them, to guide cranky infants to calm and easy babies to serenity in minutes...and help them sleep longer too. ·The Cuddle Cure: the perfect mix the 5 "S's" that can soothe even the most colicky of infants. In the book, Dr. Karp also explains: What is colic? Why do most babies get much more upset in the evening? How can a parent calm a baby--in mere minutes? Can babies be spoiled? When should a parent of a crying baby call the doctor? How can a parent get their baby to sleep a few hours longer? Even the most loving moms and dads sometimes feel pushed to the breaking point by their infant's persistent cries. Coming to the rescue, however, Dr. Karp places in the hands of parents, grandparents, and all childcare givers the tools they need to be able to calm their babies almost as easily as...turning off a light. From the Hardcover edition.

Paulo Freire's critical pedagogy has had a profound influence on contemporary progressive educators around the globe as they endeavor to rethink education for liberation and the creation of more humane global society. For Freire, maintaining a sense of historicity, that is, the origins from which our thinking and practice emerges, is essential to understanding and practicing education as a means for liberation. Too often, however, critical pedagogy is presented as a monolithic philosophy, and the historical and intellectual roots of critical pedagogy are submerged. Through a compilation of essays written by leading and emerging scholars of critical pedagogy, this text brings history into the present and keeps Paulo's intellectual roots alive in all of us as we develop our

praxis today.

A to Z Guide to Your Child's Behavior Crossroad Press

Written during award-winning pediatrician Dr. Scott W. Cohen's first year as a father, this book is the only one to combine two invaluable "on the job" perspectives—the doctor's and the new parent's. The result is a refreshingly engaging and informative guide that includes all you need to know at each age and stage of your child's first year. Drawing on the latest medical recommendations and his experiences at home and in the office, Dr. Cohen covers everything from preparing for your baby's arrival to introducing her to a new sibling, to those three basic functions that will come to dominate a new parent's life. Eat, Sleep, Poop addresses questions, strategies, myths, and all aspects of your child's development. In each instance, Dr. Cohen provides a thorough overview and a simple answer or explanation: a "common sense bottom line," yet he doesn't dictate. The emphasis is on doing what is medically sound and what works best for you and your baby. He also includes fact sheets, easy-to-follow diagnosis and treatment guides, and humorous daddy vs. doctor sidebars that reveal the learning curve during his first year as a dad. Lively, practical, and reassuring, Eat, Sleep, Poop provides the knowledge you need to parent with confidence, to relax and enjoy baby's first year, and to raise your child with the best tool a parent can have: informed common sense.

More than eighty designs--iconic, archaic, quotidian, and taboo--that have defined the arc of human reproduction. While birth often brings great joy, making babies is a knotty enterprise. The designed objects that surround us when it comes to menstruation, birth control, conception, pregnancy, childbirth, and early motherhood vary as oddly, messily, and dramatically as the stereotypes suggest. This smart, image-rich, fashion-forward, and design-driven book explores more than eighty designs--iconic, conceptual, archaic, titillating, emotionally charged, or just plain strange--that have defined the relationships between people and babies during the past century. Each object tells a story. In striking images and engaging text, Designing Motherhood unfolds the compelling design histories and real-world uses of the objects that shape our reproductive experiences. The authors investigate the baby carrier, from the Snuggly to BabyBjörn, and the (re)discovery of the varied traditions of baby wearing; the tie-waist skirt, famously worn by a pregnant Lucille Ball on I Love Lucy, and essential for camouflaging and slowly normalizing a public pregnancy; the home pregnancy kit, and its threat to the authority of male gynecologists; and more. Memorable images--including historical ads, found photos, and drawings--illustrate the crucial role design and material culture plays throughout the arc of human reproduction. The book features a prologue by Erica Chidi and a foreword by Alexandra Lange. Jeff Speck has dedicated his career to determining what makes cities thrive. And he has boiled it down to one key factor: walkability. The very idea of a modern metropolis evokes visions of bustling sidewalks, vital mass transit, and a vibrant, pedestrian-friendly urban core. But in the typical American city, the car is still king, and downtown is a place that's easy to drive to but often not worth arriving at. Making walkability happen is relatively easy and cheap; seeing exactly what needs to be done is the trick. In this essential new book, Speck reveals the invisible workings of the city, how simple decisions have cascading effects, and how we can all make the right choices for our communities. Bursting with sharp observations and real-world examples, giving key insight into what urban planners actually do and how places can and do change, *Walkable City* lays out a practical, necessary, and eminently achievable vision of how to make our normal American cities great again.

Published in Cooperation with Sociologists for Women in Society "Women are women and men are men"--this old aphorism is being challenged with ever increasing frequency as social researchers focus on the nature of constructed gender roles. Much of the recent work in this area has appeared in the journal *Gender & Society*, which is the genesis of most of the papers in *The Social Construction of Gender*. In their collection, Lorber and Farrell present the best of current research on how the constructivist approach has been applied to a number of variables, including family structure, the work place, social class, racial ethnic identity, and politics. Theoretical and methodological implications of the constructed nature of gender roles are highlighted, as well as the existing theories of gender deconstruction. The articles and introductory material in this volume reflect feminist social science theory in concrete ways that make the text accessible to scholars, professionals and students at both the undergraduate and graduate levels. This resource is ideal for courses on feminist studies, sociology of gender, and social theory construction. "One of the strengths of this book is that it provides some conceptual tools that we may not have come across elsewhere. . . . A second strength of the book is the welcome addition of racial/ethnic identity and social class to the issue of gender. . . . All in all, the book is a rich offering of ideas, research, and experience. Each article can stand alone as a valuable contribution; as an anthology, the book insists that we look at the realities of gender." --Smith College Studies in Social Work "A fine collection of current research on one of the major topics of the day. Shows that sociology can be both lively and intellectually illuminating." --R. W. Connell, Macquarie University, Sydney "Psychologists have much to gain from attending to a sociological perspective. *The Social Construction of Gender* provides that perspective intertwined with an excellent integration of feminist theory and relevant psychological literature. Judith Lorber and Susan Farrell have compiled 18 articles that, like sociology, continually challenge the reader to reflect upon the broad structural issues that pervasively influence construction

of reality. . . . well articulated. . . . chapters regarding masculinity consider points of view sometimes overlooked by feminist theorists. . . . provides a solid knowledge base for those feminists in psychology without a sociological background. *The Social Construction of Gender* was a pleasure to read. Informative, clear, and concise, it presents a view of women's position in Western society that bridges psychology, sociology, economics, management, anthropology, history, politics, religion, and public policy." --Association for Women in Psychology Newsletter

Zoo Animal Welfare thoroughly reviews the scientific literature on the welfare of zoo and aquarium animals. Maple and Perdue draw from the senior author's 24 years of experience as a zoo executive and international leader in the field of zoo biology. The authors' academic training in the interdisciplinary field of psychobiology provides a unique perspective for evaluating the ethics, practices, and standards of modern zoos and aquariums. The book offers a blueprint for the implementation of welfare measures and an objective rationale for their widespread use. Recognizing the great potential of zoos, the authors have written an inspirational book to guide the strategic vision of superior, welfare-oriented institutions. The authors speak directly to caretakers working on the front lines of zoo management, and to the decision-makers responsible for elevating the priority of animal welfare in their respective zoo. In great detail, Maple and Perdue demonstrate how zoos and aquariums can be designed to achieve optimal standards of welfare and wellness.

The Rock History Reader is an eclectic compilation of readings that tells the history of rock as it has been received and explained as a social and musical practice throughout its six decade history. The readings range from the vivid autobiographical accounts of such rock icons as Ronnie Spector and David Lee Roth to the writings of noted rock critics like Lester Bangs and Chuck Klosterman. It also includes a variety of selections from media critics, musicologists, fanzine writers, legal experts, sociologists and prominent political figures. Many entries also deal specifically with distinctive styles such as Motown, punk, disco, grunge, rap and indie rock. Each entry

includes headnotes, which place it in its historical context. This second edition includes new readings on the early years of rhythm & blues and rock 'n' roll, as well as entries on payola, mods, the rise of FM rock, progressive rock and the PMRC congressional hearings. In addition, there is a wealth of new material on the 2000s that explores such relatively recent developments as emo, mash ups, the explosion of internet culture and new media, and iconic figures like Radiohead and Lady Gaga. With numerous readings that delve into the often explosive issues surrounding censorship, copyright, race relations, feminism, youth subcultures, and the meaning of musical value, *The Rock History Reader* continues to appeal to scholars and students from a variety of disciplines.
