Karl Friedrich Schinkel called his designs for a palace on the Acropolis in Athens and for Orianda Castle in the Crimea a "beautiful dream". They date from 1834 and 1838 and were Schinkels last major projects, in which

he presented his ideal of architecture in brilliant drawings and watercolours, as if in a last will and testament. Both the formal language of neo-Classical architecture and the quality of presentation are brought to a level here that can scarcely be surpassed. It is clear how highly Schinkel himself esteemed these two unrealised designs from the fact that he had them printed as coloured lithographs in his publication *Werke der höheren Baukunst für die Ausführung erfunden* (Potsdam 1840 to 1842). These lithographs are reprinted in a large format, complemented by the no less spectacular lithographs of the two Pliny villas, Tusculum, and Laurentinum. These works, which represent a highpoint in the long story of the reconstruction of the two

villas that have come down to us only in literature, also show Schinkels impressive ability to demonstrate and convey his architectural ideas. He is profoundly concerned, both in the reconstructions of the Pliny villas and in the designs for the royal palace on the Acropolis and Orianda Castle to be archaeologically precise and to fulfil prescribed building programmes, but also to plumb the possibilities of architecture beyond mere utility. For the Acropolis palace project he had his eye mainly on the way in which the new building would interact with the surviving remains of the Propylaea and the Parthenon. In the Orianda project it is a glazed observation pavilion in the form of a temple that expresses architectures

perception of itself more clearly than perhaps ever before.

Rebecca Rusch is one of the great endurance athletes of our time. Known today as the Queen of Pain for her perseverance as a relentlessly fast runner, paddler, and

mountain bike racer, Rusch was a normal kid from Chicago who abandoned a predictable life for one of adventure. In her new book Rusch to Glory: Adventure, Risk & Triumph on the Path Less Traveled, Rusch weaves her fascinating life's story among the exotic locales and extreme conditions that forged an extraordinary athlete from ordinary roots. Rusch has run the gauntlet of endurance sports over her career as a professional athlete-- climbing, adventure racing, whitewater rafting, cross-country skiing, and mountain biking--racking up world championships along the way. But while she might seem like just another superhuman playing out a fistful of aces, her empowering story proves that anyone can rise above self-doubt and find their true potential. First turning heads with her rock climbing and paddling skills, Rusch soon found herself spearheading adventure racing teams like Mark Burnett's Eco-Challenge series. As she fought her way through the jungles of Borneo, raced camels across Morocco, threaded the rugged Tian Shan mountains, and river-boarded the Grand Canyon in the dead of winter, she was forced to stare down her own demons. Through it all, Rusch continually redefined her limits, pushing deep into the pain cave and emerging ready for the next great challenge. At age 38, Rusch faced a tough decision: retire or reinvent herself yet again. Determined to go for broke, she shifted her focus to endurance mountain

bike racing and rode straight into the record books at a moment when most athletes walk away. Rusch to Glory is more than an epic story of adventure; it is a testament to the rewards of hard work, determination, and resilience on the long road to personal and professional triumph.

The 2nd edition of the Handbook of

Technological Pedagogical Content Knowledge (TPACK) for Educators addresses the concept and implementation of technological pedagogical content knowledge—the knowledge and skills that teachers need in order to integrate technology meaningfully into instruction in specific content areas. Driven by the growing influence of TPACK on research and practice in both K-12 and higher education, the 2nd edition updates current thinking about theory, research, and practice. Offering a series of chapters by scholars in different content areas who apply the technological pedagogical content knowledge framework to their individual content areas, the volume is structured around three themes: Current thoughts on TPACK Theory Research on Technological Pedagogical Content Knowledge in Specific Subject Areas Integrating Technological Pedagogical Content Knowledge into Teacher Education and Professional Development The Handbook of Technological Pedagogical Content Knowledge (TPACK) for Educators is simultaneously a mandate and a manifesto on the engagement of technology in classrooms.

Mitosis/Cytokinesis provides a comprehensive discussion of the various aspects of mitosis and cytokinesis, as studied from different points of view by various authors. The book summarizes work at different levels of organization, including phenomenological, molecular, genetic, and structural levels. The book is divided into three sections that cover the premeiotic and premitotic events; mitotic mechanisms and approaches to the study of mitosis; and mechanisms of cytokinesis. The authors used a uniform style in presenting the concepts by including an overview of the field, a main theme, and a conclusion so that a broad range of biologists could understand the concepts. This volume also explores the potential developments in the study of mitosis and cytokinesis, providing a background and perspective into research on mitosis and cytokinesis that will be invaluable to scientists and advanced students in cell biology. The book is an excellent reference for students, lecturers, and research professionals in cell biology, molecular biology, developmental biology, genetics, biochemistry, and physiology.

 Start developing single-page applications (SPAs) with modern architecture. This book shows you how to create, design, and publish native

web components, ultimately allowing you to piece together those elements in a modern JavaScript framework. *Building Native Web Components* dives right in and gets you started building your first web component. You'll be introduced to native web component design systems and frameworks, discuss component driven development and understand its importance in large-scale companies. You'll then move on to building web components using templates and APIs, and custom event lifecycles. Techniques and best practices for moving data, customizing, and distributing components are also covered. Throughout, you'll develop a foundation to start using Polymer, Vue.js, and Firebase in your day-to-day work. Confidently apply modern patterns and develop workflows to build agnostic software pieces that can be reused in SPAs. *Building Native Web Components* is your guide to developing small and autonomous web components that are focused, independent, reusable, testable, and works with all JavaScript frameworks,

modern browsers, and libraries. What You Will Learn Incorporate Conserved Domain Database (CDD) and design systems into your workflow Build apps with reusable UI components that are agnostic to JavaScript frameworks Utilize Polymer and Vue.js in your day-to-day work Publish your UI components in npm (or Node Package Manager) Who This Book Is For The book is intended for Intermediate–Advanced level readers interested in single-page applications (SPAs), as well as Polymer, Vue.js, and Firebase.

As managerial roles diversify, the phenomenon of management becomes increasingly puzzling. Demand for formal management training, theories and qualifications has increased, yet our ability to think critically about management has diminished. At a time of organizational and environmental turbulence, the question of effective management is more complex than ever. Unpicking the puzzles faced by both the manager and the student of management, this introductory guide explores the major issues of management, organization and knowledge, asking questions of our 'guru' culture and raising debates on so-called expert thinking. Written from the viewpoint that the most effective managers are those that can think for themselves and put aside the advice of the management 'guru', it is a topical, challenging and thought-provoking study. Thoroughly revised and reorganized, this second edition features two completely new chapters that cover gender issues in management, debates

on globalization, post-modernity and the future of management. Designed to bring readers into the debate, rather than simply providing a framework of answers, this new edition also includes an orientation questionnaire, discussion questions for each area covered and further reading suggestions.

Joyful Mending shows you how to fix old items of clothing, linens and household objects by turning tears and flaws into beautiful features. Simply by applying a few easy sewing, darning, felting, or crocheting techniques, as well as some sashiko and other favorite embroidery stitches, you can repair your favorite pieces in a transformative way. These techniques don't just save

you money, but make your life more joyful, fulfilling and sustainable in an age of disposable "fast fashion." Author Noriko Misumi teaches you her philosophy of mending and reusing items based on the age-old Japanese concepts of mindfulness and Wabi Sabi (an appreciation of old and imperfect things). In her book, she shows you how to: Repair any kind of fabric that is torn, ripped or stained—whether knitted or woven Work with damaged flat or curved surfaces to make them aesthetically pleasing again Create repairs that blend in, as well as bold or whimsical visible repairs Darn your handmade or expensive gloves, sweaters and socks to make them look great again The joy to be found in working with your hands and the personal artistry you discover within yourself lie at the heart of this book. While nothing lasts forever, there's pleasure, as well as purpose, in appreciating age and imperfection. Joyful Mending allows you to surround yourself with the things that truly give you joy, whether they were given to you

by a loved one, picked up in your travels or simply have a special place in your heart.
