This publication presents fascinating new findings on ancient Romano-Egyptian funerary portraits preserved in international collections.

Once interred with mummified remains, nearly a thousand funerary portraits from Roman Egypt survive today in

museums around the world, bringing viewers face-to-face with people who lived two thousand years ago. Until recently, few of these paintings had undergone in-depth study to determine whom they were made and how. An international collaboration known as APPEAR (Ancient Panel Paintings: Examination, Analysis, and Research) was launched in 2013 to promote the study of these objects and to gather scientific and historical findings into a

shared database. The first phase of the project was marked with a two-day conference at the Getty Villa. Conservators, scientists, and curators presented new research on topics such as provenance and collecting, comparisons of works across institutions, and scientific studies of pigments, binders, and supports. The papers and posters from the conference are collected in this publication, which offers the most up-to-date information

available about these fascinating remnants of the ancient world. The free online edition of this open-access publication is available at www.getty.edu/publications/mummyporraits/ and includes zoomable illustrations and graphs. Also available are free PDF, EPUB, and Kindle/MOBI downloads of the book. [Bobby the Brave \(Sometimes\)](#) Scholastic Inc. "She's hysterical." For centuries, the term "hysteria" has been used by physicians and laymen to

diagnose and dismiss the extreme emotionality and mysterious physical disorders presumed to bedevil others—especially women. How did this medical concept assume its power? What cultural purposes does it serve? Why do different centuries and different circumstances produce different kinds of hysteria? These are among the questions pursued in this absorbing, erudite reevaluation of the history of hysteria. The widely respected authors draw upon the insights of social and cultural history,

rather than Freudian psychoanalysis, to examine the ways in which hysteria has been conceived by doctors and patients, writers and artists, in Europe and North America, from antiquity to the early years of the twentieth century. In so doing, they show that a history of hysteria is a history of how we understand the mind. Worst Enemies/Best Friends Scholastic Inc. Failing math but great at writing, Gregory finds the poetry (and humor) in what's hard. Gregory K is the middle child in a family of mathematical geniuses. But if he claimed to love math? Well, he'd be fibbing.

What he really wants most is to go to Author Camp. But to get his parents' permission he's going to have to pass his math class, which has a probability of 0. THAT much he can understand! To make matters worse, he's been playing fast and loose with the truth: "I LOVE math" he tells his parents. "I've entered a citywide math contest!" he tells his teacher. "We're going to author camp!" he tells his best friend, Kelly. And now, somehow, he's going to have to make good on his promises. Hilariously it's the "Fibonacci

Sequence" -- a famous mathematical formula! -- that comes to the rescue, inspiring Gregory to create a whole new form of poem: the Fib! Maybe Fibs will save the day, and help Gregory find his way back to the truth. For every kid who equates math with torture but wants his own way to shine, here's a novel that is way more than the sum of its parts. [Becoming Artists](#) Scholastic Inc. Twelve-year-old Rosie Goldglitt is a never-been-kissed, hopeless romantic. Her mother has a new boyfriend. So why can't

Rosie attract the attentions of the cutest boy in the seventh grade, Robbie Romano? Is it because she's two inches taller than he is? Is it her horrible name? Or is she simply a dork? If only she could be more like her rival, the perfect and popular Mary Katz, then maybe Robbie would notice her. As Rosie navigates the ups and downs of adolescence, she eagerly anticipates the experience of a first kiss - when she's not completely grossed out at the thought of it.

But by the time the big dance rolls around, Rosie manages to surprise herself, in more ways than one. This perceptive and funny story captures the bittersweetness and euphoria of growing up, the messiness of having a crush, and how sometimes the most unexpected things in life are the most enjoyable. Warp Speed Random House Books for Young Readers Who would have thought being smart could be so hard (and funny)?

Millicent Min is having a bad summer. Her fellow high school students hate her for setting the curve. Her fellow 11-year-olds hate her for going to high school. And her mother has arranged for her to tutor Stanford Wong, the poster boy for Chinese geekdom. But then Millie meets Emily. Emily doesn't know Millicent's IQ score. She actually thinks Millie is cool. And if Millie can hide her awards, ignore her grandmother's

advice, swear her parents to silence, blackmail Stanford, and keep all her lies straight, she just might make her first friend. What's it going to take? Sheer genius. Stanford Wong Flunks Big-Time (The Millicent Min Trilogy, Book 2) Scholastic Inc.
