### **Diversity Across the Curriculum** Praeger

My first book had a perilous childhood. With this new edition, I hope it has reached a secure middle age. The book was born in 1969 as an "innovative text book"-a breed everyone claims to want but which usu ally goes straight to the orphanage. My original plan had been to write a small supplementary textbook on differen tial forms, but overly optimistic publishers talked me out of this modest intention and into the wholly unrealistic ob jective (especially unrealistic for an unknown 30-year-old author) of

writing a full-scale advanced calculus course that would revolutionize the way advanced calculus was taught and sell lots of books in the process. I have never regretted the effort that I expended in the pursuit of this hopeless dream-{}nly that the book was published as a textbook and marketed as a textbook, with the result that the case for differential forms that it tried to make was hardly heard. It received a favorable tele graphic review of a few lines in the American Mathematical Monthly, and that was it. The only other way a potential reader could learn of the book's existence was to read an advertisement or to encounter one of the publisher's sales men. Ironically, my subsequent books-Riemann :S Zeta Function, Fermat:S Last Theorem and Galois Theory-sold many more copies than the

---

original edition of *Advanced Calculus*, even though they were written with no commercial motive at all and were directed to a narrower group of readers.

For courses in Performance Appraisal, Compensation Management, and Training and Development. Discover where the real success in business can be found. What makes some businesses more successful than others? The answer: people.

Organizations with motivated, talented employees that offer outstanding customer service are more likely to pull ahead of the competition. Performance Management is the first text to emphasize this key competitive advantage, showing students that success in today's globalized business world can be found, not in technology and products, but in an organization's people. The third edition includes updated and current information, and features over forty new cases.

"In an ideal world, all children would grow up in a stable, nurturing and healthy home. However, the reality is that globally, many bear the brunt of conflicts, trafficking, poverty, sexual victimisation, broken families, school disruption and harming cultural practices. Socialisation structures to teach children the fundamental moral values of right and wrong are often absent, and children spend too many hours on social media platforms or playing games on smart devices, which affects their physical, emotional and psychological development. It is

therefore hardly surprising that the world is seeing an increase in youth offenders. *Child and youth misbehaviour in South Africa* addresses the complex and poorly understood phenomenon of juvenile misbehaviour and the factors that cause these activities. *Child and youth misbehaviour in South Africa* discusses and analyses various presumptions on the nature and causes of aberrant behaviour and assesses them critically with regard to their applicability to South Africa. It presents the relevant legal processes pertaining to young people and reinforces theoretical explanations with research and real-world examples. The female youth offender is also given special attention in this book. *Child and youth misbehaviour in South Africa* is aimed at enabling both practitioners and students to address the plight of the South African youth in a constructive way and so become part of creating a safer South Africa for its people."

#### Advanced Calculus AOSIS

The present book is about Hausa linguacultural practices. Its primary goal is to demonstrate aspects of the relationship between Hausa language and culture as it affects northern Nigeria, the territory with the largest concentration of native-Hausa speakers on earth today. Using various examples, illustrations and real-life situations, the book seeks to portray Hausa speakers experiences and practices as they daily exploit their language to communicate their needs and, in the process, express their culture. These experiences and practices are realised largely through Hausa verbal and non-verbal means or both which together give rise to linguacultural patterns of behaviour unique to the speakers. It is hoped that readers, particularly non-Hausas, will find the book enjoyable especially in

---

trying to experience what native-Hausa speakers, using their language to communicate, experience during social interactions. Supported by a number of optional activities and exercises, students and teachers of Hausa will particularly find the book not only resourceful and entertaining but also reader-friendly especially with regard to the role of culture in language learning and teaching. Indeed the book has been partly written to encourage the use of Hausa culture in language teaching and learning.

The purpose of this volume is two-fold. First, the book attempts to initiate a research-based dialogue from a variety of perspectives specifically about teacher training and teaching in the context of student linguistic and cultural diversity; and, second, to cast a wide net over three major areas of professional development that have the potential to impact on teacher quality and on the educational services provided to ELLs at all levels of instruction. This book represents a first attempt to a quiet revolution going on in teacher education (Johnson, 2000). It allows the reader to uncover research activities and experiences that constitute individual teacher education program initiatives. A revolution, because it is stirring the very essence of what stands at the core of teacher education, a core that has long been based more on training to teach monolingual English speaking students and less on teaching ELLs, their first and second language development, using their bilingualism to teach academics, and on the process of becoming an effective teacher of ELLs. This state-of-the-art review brings together research on effective pedagogy and teacher training. The nine feature chapters are directly concerned with effective new structures and practices for professional development and are presented in a framework that considers a wide spectrum of topics to address issues such as: what teachers need to understand about English language learners, what kind of professional experiences are likely to facilitate those understandings, and what kinds of teacher education programs and

---

school settings are able to support their ongoing learning. The authors also discuss the implications of their work for helping English language learners connect and benefit from school from the points of view of (1) school reform, (2) teachers' bilingual proficiencies, (3) teachers' knowledge and beliefs, and (4) teacher training programming and sustainability.

In this work, G.A. Swanson and Hugh Marsh present an interpretive and analytical study of the function of internal auditing, not only from the viewpoint of its role in an organization, but also in regard to the role it plays in the economics of societies and governments. They create a theory of internal auditing and place it within the

context of a scientific conceptual framework called Living Systems Theory. Using this approach, they are able to provide a basis for developing a systematic theoretical framework of internal auditing, as well as a theory based on observable, measurable entities. The book begins with a survey of the auditing profession and an introduction to the basic principles of the Living Systems Theory. From this base, Swanson and Marsh discuss a series of specific issues and areas of concern in internal auditing, including its functions, profession, and history, and its professional standards. Subsequent chapters address such topics as money-information, non-monetary quantitative information, estimating compound measurement and forecasting error, non-quantitative assessments, concrete process analysis and living systems process analysis, and ethics. Throughout the book, Swanson and Marsh identify the advantages of using the living systems theory to advance the knowledge and understanding of organizations, and also propose a higher level of internal audit functions that can advance modern societies. This work will be an important tool for members of the accounting and auditing professions, for students of business and accounting practices, and for professionals in other business and finance positions.

This book disseminates original research on learning in and from practice in pre-service teacher education. Authors such as Lederman and Lederman describe the student teaching practicum (or work-integrated learning [WIL]), which is an essential component of pre-service teacher education, as the 'elephant in the room'. These authors note that 'the capstone

---

experience in any teacher education programme is the student teaching practicum... [a]fter all, this is where the rubber hits the road'. However, many teacher educators will agree that this WIL component is sometimes very insufficient in assisting the student teacher to develop their own footing and voice as a teacher. This is the ' gap ' that this research book addresses. Most of the chapters in the book report empirical data, with the exception of two chapters that can be categorized as systematic reviews. WIL is addressed from various angles in the chapters. Chapter 6 focuses on research related to what makes Finnish teacher education so effective, and in Chapter 4 researchers of the University of Johannesburg disseminate their findings on establishing a teaching school (based on Finnish insights) in Johannesburg. Chapter 3 highlights the challenges faced in open-and distance learning teacher education contexts. Several of the chapters disseminate research findings on alternative interventions to classic WIL, namely, where " safe spaces " or laboratories are created for student teachers to learn and grow professionally. These could either be simulations, such as software programmes and avatars in the intervention described in Chapter 2; student excursions, as the findings in chapters 5, 7 and 10 portray; or alternative approaches to WIL (e.g. Chapters 11 and 12). The book is devoted to scholarship in the field of pre-service teacher education. The target audience is scholars working in the fields of pre-service teacher education, work-integrated learning, and self-directed learning. The book makes a unique contribution in terms of firstly its extensive use of Cultural-Historical Activity Theory as a research lens, and secondly in drawing on

various theoretical frameworks. Both quantitative and qualitative research informed the findings of the book.
