Beyond point-and-click The goal of the Exploring series is to move students beyond the point-and-click, to understanding the why and how behind each skill. And because so much learning takes place outside of the classroom, this series provides learning tools that students can access anywhere, anytime. Students go to college now with a different set of skills than they did years ago. With this in mind, the Exploring series seeks to move students beyond the basics of the software at a faster pace, without sacrificing coverage of the fundamental skills that everyone needs to know. Also available with MyITLab MyITLab @ is an online homework, tutorial, and assessment program designed for Information Technology (IT) courses, which engages students and improves results. HTML5 Simulation exercises and Live-in-Application Grader projects come with the convenience of auto-grading and instant feedback, helping students learn more quickly and effectively. Digital badges lets students showcase their Microsoft Office or Computer Concepts competencies, keeping them motivated and focused on their future careers. How reliable is our intuition? How much should we depend on gut-level instinct rather than rational analysis when we play the stock market, choose a mate, hire an employee, or assess our own abilities? In this engaging and accessible book, David G. Myers shows us that while intuition can provide us with useful—and often amazing—insights, it can also dangerously mislead us. Drawing on recent psychological research, Myers discusses the powers and perils of intuition when: • judges and jurors determine who is telling the truth; • mental health workers predict whether someone is at risk for suicide or crime; • coaches, players, and fans decide who has the hot hand or the hot bat; • personnel directors hire new employees; • psychics claim to be clairvoyant or to have premonitions; • and much more.

Applied Social Psychology: Understanding and Addressing Social and Practical Problems is an excellent introductory textbook that

helps students understand how people think about, feel about, relate to, and influence one another. The book is unique in that it provides a balanced emphasis on social psychological theory and research. Editors Frank W. Schneider, Jamie A. Gruman, and Larry M. Coutts examine the contributions of social and practical problems in several areas including everyday life, clinical psychology, sports, the media, health, education, organizations, community psychology, the environment, and human diversity. Worth Publishers

This version of the main text breaks down the chapters into shorter modules, for more accessibility. The smaller chunks allow students to better grasp and explore psychological concepts. The modules also allow more flexibility in teaching, as cross-references to other chapters have been replaced with brief explanations.

**Pursuit of Happiness** Macmillan

Social psychologist David G. Myers has reviewed thousands of recent scientific studies conducted worldwide in search of the key to happiness. With wit and wisdom, he explodes some of the popular myths on the subject and presents specific techniques for finding true joy in living: Are most people happy? What are the inner traits of happy people? Are extroverts happier than introverts? Are men happier than women? Does religious faith promote inner peace and joy? Does well-being come with being well-off? Are happy children more likely to become happy adults? What part do friends play in personal happiness? Is age a factor in feeling happy? What can you do to improve your own sense of well-being? and much more

The new edition of Exploring Psychology offers outstanding currency on the research, practice, and teaching of psychology. Myers and DeWall inspire students with fascinating findings and applications, effective new study tools and technologies, and a compassionate and compelling storytelling voice. Their presentation is based on the same guiding principles behind the entire family of textbooks that have made David Myers the world's bestselling introductory psychology author: Facilitate learning by teaching critical thinking and helping students at every step. Present psychology as a science, emphasizing the process of inquiry and putting facts in the service of concepts. Make sure students come away with an appreciation of psychology's big ideas, and with a deeper respect for humanity—what drives us, distinguishes us, unifies us. This Exploring Psychology is the first to include Myers' handpicked co-author. Nathan DeWall shares Myers' belief that instilling a sense of curiosity and inquiry about psychological science is an effective way to help students navigate the content, think critically, and prepare for a lifetime of learning and living. The extraordinary, longtime Myers ancillary author team is also here—a group

whose teamwork, consistency, and commitment again sets the industry-standard for instructor and student supplements.

Some 28 million people in America and 350 million people worldwide live with hearing loss. How do these people and their families cope? What are their experiences of pain, humor, and hope? What support do medicine and technology now offer them, and what is on the horizon? In this engaging and practical book, David Myers, who has himself suffered gradual hearing loss, explores the problems faced by the hard of hearing at home and at work and provides information on the new technology and groundbreaking surgical procedures that are available. Drawing on both his own experiences and his expertise as a social psychologist, Myers recounts how he has coped with hearing loss and how he has incorporated technological aids into his life. The family and friends of the hard of hearing also face adjustments. Myers addresses their situation and provides advice for them on how best to alert loved ones to a hearing problem, persuade them to seek assistance, and encourage them to adjust to and use hearing aids.
