"The global disruption to education caused by the COVID-19 pandemic is without parallel and the effects on learning are severe. The

crisis brought education systems across the world to a halt, with school closures affecting more than 1.6 billion learners. While nearly every country in the world offered remote learning opportunities for students, the quality and reach of such initiatives varied greatly and were at best partial substitutes for in-person learning. Now, 21 months later, schools remain closed for millions of children and youth, and millions more are at risk of never returning to education. Evidence of the detrimental impacts of school closures on children's learning offer a harrowing reality: learning losses are substantial, with the most marginalized children and youth often disproportionately affected. Countries have an opportunity to accelerate learning recovery and make schools more efficient, equitable, and resilient by building on investments made and lessons learned during the crisis. Now is the time to shift from crisis to recovery - and beyond recovery, to resilient and transformative education systems that truly deliver learning and well-being for all children and youth."--The World Bank website.

Despite having a number of potential attributes (such as being English-speaking, having poverty levels below that of comparable countries and a reasonably well-educated labour force), Jamaica's economic history is marked by the paradoxes of low growth in GDP and high employment despite high investment and important achievements in poverty reduction. This publication seeks to examine these issues, and topics discussed include: poverty reduction and income inequality; whether Jamaica's GDP growth has been underestimated; policy options for reducing the fiscal and debt burden, revitalising the financial system; improving education outcomes, tackling the economic costs of crime, and improving international competitiveness.
