Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Me is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.

This volume addresses the issue of the human encounter with the Mystery of God and the purpose of human life. It explores major themes from diverse cultural and philosophical traditions, starting with questions about the possibility of belief in God, His transcendence as seen in both East and West, and ending with questions about ethics and about personhood, human dignity and human rights. Taking an eclectic approach, the chapters in this book each uniquely address aspects of the human encounter with the Mystery of God, drawing from specific cultures and traditions, and using a particular philosophical and theological style. Together, the chapters provide a fresh approach and a synergy that ensures that each topic contributes something new to the dialogue between religion and culture.

Since the dawn of history, the sea has connected and divided human societies. In order to address this, increasingly ingenious and innovative technological solutions have been developed, and the sea has never been an insuperable barrier to mankind. This book presents the proceedings of ICNM 2019, the 3rd International Conference on Nautical and Maritime Culture, held in Naples, Italy, on 14 and 15 November 2019. The conference covers all conceptual and theoretical aspects relating to nautical and maritime culture, and topics covered by the 21 papers presented here include: the history of ships and navigation; maritime museums and libraries; naval architecture and the evolution of marine engineering; the conservation of nautical marine and maritime heritage; ship and nautical design; careers at sea; and the evolution of the waterfront and the coastal marine environment. The ICNM conference promotes dialogue between academics, professionals, and those involved in maritime research and development, and the book will be of interest to all those with an involvement in nautical and maritime culture.

This book describes the discourse of biology from a systemic functional linguistic perspective. It offers a detailed description of resources based on text analysis. The description reveals co-textual patterns of language features, their expressions through grammatical resources, as well as their functions in the disciplinary context. The book also applies the description to analyse student texts in undergraduate biology, revealing characteristics of language and knowledge development. Although the discussion in this book focuses on the discourse of biology, both the language description and the descriptive principle can be used to inform the examination of knowledge in academic discourse in general, making this key reading for students and researchers in systemic functional linguistics, discourse analysis, English for academic purposes, applied linguistics, and science education.

Focusing on particular historical blind spots by telling stories of individuals and groups that did not fit the favoured identity mould, the essays in 'Migrant Nation' work within the gap between Australian image and experience and offer fresh insights into the 'other' side of identity construction. The volume casts light on the hidden face of Australian identity and remembers the experiences of a wide variety of people who have generally been excluded, neglected or simply forgotten in the long-running quest to tell a unified story of Australian culture and identity. Drawing upon memories, letters, interviews and documentary fragments, as well as rich archives, the authors have in common a commitment to give life to neglected histories and thus to include, in an expanding and open-ended national narrative, people who were cast as strangers in the place that was their home.

Club*, *Nylon*, *The Week*, *The Rumpus*, *The Millions*, *The Guardian*, *Publishers Weekly*, and more. "A lyrical work of self-discovery that's shockingly intimate and insistently universal...Not so much briefly gorgeous as permanently stunning." —Ron Charles, *The Washington Post* Poet Ocean Vuong's debut novel is a shattering portrait of a family, a first love, and the redemptive power of storytelling *On Earth We're Briefly Gorgeous* is a letter from a son to a mother who cannot read. Written when the speaker, Little Dog, is in his late twenties, the letter unearths a family's history that began before he was born — a history whose epicenter is rooted in Vietnam — and serves as a doorway into parts of his life his mother has never known, all of it leading to an unforgettable revelation. At once a witness to the fraught yet undeniable love between a single mother and her son, it is also a brutally honest exploration of race, class, and masculinity. Asking questions central to our American moment, immersed as we are in addiction, violence, and trauma, but undergirded by compassion and tenderness, *On Earth We're Briefly Gorgeous* is as much about the power of telling one's own story as it is about the obliterating silence of not being heard. With stunning urgency and grace, Ocean Vuong writes of people caught between disparate worlds, and asks how we heal and rescue one another without forsaking who we are. The question of how to survive, and how to make of it a kind of joy,

powers the most important debut novel of many years. Island Landscapes takes a critical look at the evolution of European islandscapes and seascapes to examine the conditions facing them in the twenty first century. Considering island landscapes as an expression of European culture, this book envisages future trends and presents clearly the need to find a balance between preservation and development to ensure sustainability. Both large and small islands are illustrated in the book including the British Isles, Malta and Cyprus as well as archipelagos in Norway, Italy and Greece. Their unique identities and values reveal the remarkable breadth of cultural heritage possessed by these diverse European islands. An interdisciplinary approach is applied to the history, perception, characterisation and planning of islandscapes and seascape in Europe, to support culturally-oriented strategies for these fragile landscapes.

Analysing Scientific Discourse from A Systemic Functional Linguistic Perspective Pascal Press

In the United States, female seminaries and their antecedents, the female academies, were crucial first institutions that played a vital role in liberating women from the "home sphere," a locus that was the primary domain of Euro-American women. The female seminaries founded by Native Americans and African Americans had different founding rationales but also played a key role in

empowering women. On the whole, the initial intent of these schools was to prepare women for their proper role in American society as wives and mothers. An unintended effect, however, was to prepare women for the first socially accepted profession for women: teaching. Thus equipped, women played a crucial role in the development of American education at all levels while achieving varying degrees of social justice for themselves and other groups through engagement in the reform movements of their times--including women's suffrage, abolition, temperance, and mental health reform. By recapturing the role religion played in shaping education for women, Welch and Ruelas offer a refreshing take on history that draws on several primary texts and details more than one hundred female seminaries and academies opened in the United States.

Annotation “ This book bears the hallmark of Open University Press texts. It is well laid out and nicely produced. It manages a good balance between textbook and cutting edge research ... The book is impressive in its command of a wide range of writings on sexuality, gender, masculinity and schooling. ” - Educational Review
This book focuses on the impact and effects of masculinities on the lives of boys at school. Through interviews with boys from diverse backgrounds, the authors explore the various ways in which boys define and negotiate their masculinities at school. The following questions and issues are addressed: * What does it mean to be a 'normal' boy and who decides this? * How do issues of masculinity impact on boys from culturally diverse backgrounds, indigenous boys, those with disabilities and boys of diverse sexualities? * What issues of power impact on these boys' lives and relationships at school? What effects do these issues have on boys' learning at school? Through problematizing and interrogating the question of what makes a boy a boy, this fascinating title offers recommendations and indicates future directions for working with boys in school.

Australian Culture, Society and Identity McGraw-Hill Education (UK)

The present ecological mutation has organized the whole political landscape for the last thirty years. This could explain the deadly cocktail of exploding inequalities, massive deregulation, and conversion of the dream of globalization into a nightmare for most people. What holds these three phenomena together is the conviction, shared by some powerful people, that the ecological threat is real and that the only way for them to survive is to abandon any pretense at sharing a common future with the rest of the world. Hence their flight offshore and their massive investment in climate change denial. The Left has been slow to turn its attention to this new situation. It is still organized along an axis that goes from investment in local values to the hope of globalization and just at the time when, everywhere, people dissatisfied with the ideal of modernity are turning back to the protection of national or even ethnic borders. This is why it is urgent to shift sideways and to define politics as what leads toward the Earth and not toward the global or the national. Belonging to a territory is the phenomenon most in need of rethinking and careful redescription; learning new ways to inhabit the Earth is our biggest challenge. Bringing us down to earth is the task of politics today.
