"By means of your democracy we shall invade you, by means of our religion we shall conquer you. Victory will come to us from the wombs of our women." The post Brexit Europe should aim to stop the creeping incursion of illiberal and authoritarian ideologies disguised as "religions" or "cultures" into the continent's liberal and democratic way of life.

In most European nations, our adherence to liberal values has resulted in the growth of illiberal values. To put it differently our liberal societies began to tolerate the intolerant. If this trend is not stopped, its long term consequences will be catastrophic for the face of Europe as we and our ancestors have known it. Europe's tolerance and support of the wrongly called ideal of multi-culturalism has resulted in the growth of a continent of multi-faithism.

The revival of a religious narrative as an inevitable backlash to the growth of alien religiosity amidst secular Europe is a disturbing phenomenon. It took Europe five hundred years of evolution to reach this stage of separation of state and religion. Michael Nimier

Gender in Science and Technology Routledge

The impact of constant technological change upon our perception of the world is so pervasive as to have become a commonplace of modern society. But this was not always the case; as Wolfgang Schivelbusch points out in this fascinating study, our adaptation to technological change—the development of our modern, industrialized consciousness—was very much a learned behavior. In *The Railway Journey*, Schivelbusch examines the origins of this industrialized consciousness by exploring the reaction in the nineteenth century to the first dramatic avatar of technological change, the railroad. In a highly original and engaging fashion, Schivelbusch discusses the ways in which our perceptions of distance, time, autonomy, speed, and risk were altered by railway travel. As a history of the surprising ways in which technology and culture interact, this book covers a wide range of topics, including the changing perception of landscapes, the death of conversation while traveling, the problematic nature of the railway compartment, the space of glass architecture, the pathology of the railway journey, industrial fatigue and the history of shock, and the railroad and the city. Belonging to a distinguished European tradition of critical sociology best exemplified by the work of Georg Simmel and Walter Benjamin, *The Railway Journey* is anchored in rich empirical data and full of striking insights about railway travel, the industrial revolution, and technological change. Now updated with a new preface, *The Railway Journey* is an invaluable resource for readers interested in nineteenth-century culture and technology and the prehistory of modern media and digitalization.

The Leader in Me MIT Press

We are defined by the tools and technologies we use. They shape our identity. They feed and shelter us. But they also threaten our very existence. What separates us from all other animals is primarily the plethora of tools and technologies we created for our well-being and for our very survival. They are the source of our admirable success as a species; and they are the source of our most terrifying problems. Sometimes, they are the only solution to the very problems they created. That puts us in a race against ourselves, a race among technologies, a race between the good they do and the misery they cause, often the same technology doing both at different times and under different conditions. This has been the human condition from the beginning of our species, and it will likely be the human condition at the end. Although we appear helpless, being dragged along a road carved by our own creations, there are some things we can do to minimize the risk to ourselves, without giving up all the advantages of a myriad of technologies we created. We may not be able to eliminate the basic paradox of human existence, but we may somewhat reduce the suffering. This book is about the beauty and the misery of our technological human society, offering some modest remedies for the misery, while praising the beauty.
