Throughout his career, Eduardo Galeano has turned our understanding of history and reality on its head. Isabelle Allende said his works "invade the reader's mind, to persuade him or her to surrender to the charm of his writing and power of his idealism." Mirrors, Galeano's most ambitious project since Memory of Fire, is an unofficial history of the world seen through history's unseen, unheard, and forgotten. As Galeano notes: "Official history has it that Vasco Núñez de Balboa was the first man to see, from a summit in Panama, the two oceans at once. Were the people who lived there blind?" Recalling the lives of artists, writers, gods, and visionaries, from the Garden of Eden to twenty-first-century New York, of the black slaves who built the White House and the women erased by men's fears, and told in hundreds of kaleidoscopic vignettes, Mirrors is a magic mosaic of our humanity.

Witchcraft and magic are topics of enduring interest for many reasons. The main one lies in their extraordinary interdisciplinarity: anthropologists, folklorists, historians, and more have contributed to build a body of work of extreme variety and consistence. Of course, this also means that the subjects themselves are not easy to assess. In a very general way, we can define witchcraft as a supernatural means to cause harm, death, or misfortune, while magic also belongs to the field of supernatural, or at least esoteric knowledge, but can be used to less dangerous effects (e.g., divination and astrology). In Western civilization, however, the witch hunt has set a very peculiar perspective in which diabolical witchcraft, the invention of the Sabbat, the persecution of many thousands of (mostly) female and (sometimes) male presumed witches gave way to a phenomenon that is fundamentally different from traditional witchcraft. This Special Issue of Religions dedicated to Witchcraft, Demonology, and Magic features nine articles that deal with four different regions of Europe (England, Germany, Hungary, and Italy) between Late Medieval and Modern times in different contexts and social milieus. Far from pretending to offer a complete picture, they focus on some topics that are central to the research in those fields and fit well in the current "cumulative concept of Western witchcraft" that rules out all mono-causality theories, investigating a plurality of causes.

This report of the President's Commission on Law Enforcement and Administration of Justice -- established by President Lyndon Johnson on July 23, 1965 -- addresses the causes of crime and delinquency and recommends how to prevent crime and delinquency and improve law enforcement and the administration of criminal justice. In developing its

findings and recommendations, the Commission held three national conferences, conducted five national surveys, held hundreds of meetings, and interviewed tens of thousands of individuals. Separate chapters of this report discuss crime in America, juvenile delinquency, the police, the courts, corrections, organized crime, narcotics and drug abuse, drunkenness offenses, gun control, science and technology, and research as an instrument for reform. Significant data were generated by the Commission's National Survey of Criminal Victims, the first of its kind conducted on such a scope. The survey found that not only do Americans experience far more crime than they report to the police, but they talk about crime and the reports of crime engender such fear among citizens that the basic quality of life of many Americans has eroded. The core conclusion of the Commission, however, is that a significant reduction in crime can be achieved if the Commission's recommendations (some 200) are implemented. The recommendations call for a cooperative attack on crime by the Federal Government, the States, the counties, the cities, civic organizations, religious institutions, business groups, and individual citizens. They propose basic changes in the operations of police, schools, prosecutors, employment agencies, defenders, social workers, prisons, housing authorities, and probation and parole officers.

The imagery of Hell, the Christian account of the permanent destinations of the human soul after death, has fascinated people over the centuries since the emergence of the Christian faith. These landmark volumes provide the first large-scale investigation of this imagery found across the Byzantine and post-Byzantine world. Particular emphasis is placed on images from churches across Venetian Crete, which are comprehensively collected and published for the first time. Crete was at the centre of artistic production in the late Byzantine world and beyond and its imagery was highly influential on traditions in other regions. The Cretan examples accompany rich comparative material from the wider Mediterranean – Cappadocia, Macedonia, the Peloponnese and Cyprus. The large amount of data presented in this publication highlight Hell's emergence in monumental painting not as a concrete array of images, but as a diversified mirroring of social perceptions of sin.

Walking the Black Cat How My Gay Uncle F'ed Up Christmas

This fascinating book is the first volume in a projected cultural history of the United States, from the earliest English settlements to our own time. It is a history of American folkways as they have changed through time, and it argues a thesis about the importance for the United States of having been British in its cultural origins. While most people in the United States today have no British ancestors, they have assimilated regional cultures which were created by British colonists, even while preserving ethnic identities at the same time. In this sense, nearly all Americans are "Albion's Seed," no matter what their ethnicity may be. The concluding section of this remarkable book explores the ways that regional cultures have continued to dominate national politics from 1789 to 1988, and still help to shape attitudes toward education, government, gender, and violence, on which differences between American regions are greater than between European nations.

"At various times, homosexuality has been considered the noblest of loves, a horrible sin, a psychological condition or grounds for torture and execution. David F. Greenberg's careful, encyclopedic and important new book argues that homosexuality is only deviant because society has constructed, or defined, it as deviant. The book takes us over vast terrains of example and detail in the history of homosexuality."—Nicholas B. Dirks, New York Times Book Review

See Jack Die (Part I in the series) Jack Pagan might as well be 4½ months old. He awoke in a hospital after suffering a head injury that left him dead for over 67 minutes. All of his long-term memories were destroyed. Now he has to start his life again. But his accidental flirt with death left him a special gift. In those few minutes as he fades off to sleep each night, and in those early hours of the morning as he numbly awakens . . . he sees them. At first, the shadows would just stretch into strange shapes and forms. Jack thought that he was hallucinating. That his medication was playing with his vision. Then the strange shadows began to walk around, moving freely. Jack chalked it up to a brain tumor. Some disease in his cerebral cortex. Schizophrenia, even. Something he could live with. Run, Jack, run. Now these creatures are not only haunting his nights, but his days. And they have a tendency to show themselves around people who are about to die. Seeking help he turns to a psychic who gives him a very special book. A book that he was destined to find. Jack learns that the only way he will ever know about who he was, is to face his worst fears, and die . . . again. In a series of incredible twists and turns, Jack finds out that the worlds of the living and of the dead are much closer than any of us can possibly imagine. And monsters . . . are real.

More than three decades after its first publication, Edward Said's groundbreaking critique of the West's historical, cultural, and political perceptions of the East has become a modern classic. In this wide-ranging, intellectually vigorous study, Said traces the origins of "orientalism" to the centuries-long period during which Europe

dominated the Middle and Near East and, from its position of power, defined "the orient" simply as "other than" the occident. This entrenched view continues to dominate western ideas and, because it does not allow the East to represent itself, prevents true understanding. Essential, and still eye-opening, Orientalism remains one of the most important books written about our divided world.

This book includes perspectives from a broad range of victims. including family members of the crime victims; convicted persons whose rights are violated by the justice system through wrongful convictions, unequal and discriminatory application of justice, lack of a due process, imposition for crimes that do not meet the most serious crimes threshold or to the categories of perpetrators that should be protected from the death penalty (minors, persons with mental or intellectual disabilities, pregnant women), as well as third parties including family members of the convicted person (especially children and primary caretakers) and persons included in criminal proceedings or executions (such as prosecutors, judges, lawyers and executioners). It is argued in this thought provoking book that the states right to execute violates the right to life and negatively reflects on human rights of its citizens in general.
