This thoughtful book by a Harvard policy analyst shuns global answers and explores how to examine individual cases. People Or Planes Chatham House Pub From Sonoma wine country in the north to sundrenched La Jolla in the south, and from Malibu's seaside enclaves to Palm Springs nestled in the desert, California's distinctive regions are home to many of the world's most stunning swimming pools. Since the ancient times, when manmade baths enhanced the gardens

of Egyptian nobles, pools have been built as the ultimate symbols of luxury and leisure, providing a means of capturing one of nature's most elusive elements. Soon after the pool arrived in America in the nineteenth century, California became a mecca for pool owners, where many advances in pool design have been made over the last century. Reflections on the Pool presents 40 perfect pools in 100 brilliant color photographs. These include the vibrant, Mexican-style architectural design of Ricardo Legorreta and the avant-garde, sensational creations of John Lautner, and illustrate the theories of the renowned landscape designers Thomas Church and

Isabelle Greene. Each section of the book features a type of pool, or an element of pool design. Pools imitating nature, lap pools, architectural or highly ornamented pools are discussed in detail, as well as historic pools such as Hearst's Neptune Pool at San Simeon or Thomas Church's vanguard kidney-bean-shaped design of 1948, and other early California examples that set precedents for the pools of today. The introduction outlines technical aspects of design, and gives a brief history of the pool, including the influence of Hollywood on its popularity. Whether you own a pool or wish for one, and wherever you live, Reflections on the Pool is a color-

infused, fresh, and inspirational display of the boundless possibilities in pool design. "In the cozy den of the large but modest house in Omaha where he has lived since he started on his first billion, Warren Buffett watched the horrors of Hurricane Katrina unfold on

television in early September 2005. . . . On the fourth day, he beheld in disbelief the paralysis of local, state, and federal authorities unable to commence basic operations of rescue and sustenance, not just in New Orleans, but in towns and villages all along the Gulf Coast. . . He knew exactly what he had to do. . ." So begins the vivid fictional account by political activist and bestselling author Ralph Nader that answers the question, "What if?" What if a

cadre of superrich individuals tried to become a driving force in America to organize and institutionalize the interests of the citizens of this troubled nation? What if some of America's most powerful individuals decided it was time to fix our government and return the power to the people? What if they focused their power on unionizing Walmart? What if a national political party were formed with the sole purpose of advancing clean elections? What if

these seventeen superrich individuals decided to galvanize a movement for alternative forms of energy that will effectively clean up the environment? What if together they took on corporate goliaths and Congress to provide the necessities of life and advance the solutions so long left on the shelf by an avaricious oligarchy? What could happen? This extraordinary story, written by the author who knows the most about citizen action, returns us to the literature of

American social movements—to Edward Bellamy, to Upton Sinclair, to John Steinbeck, to Stephen Crane—reminding us in the process that changing the body politic of America starts with imagination. Mallard Fillmore-- Balboa Press

International Publications Presents information on how to improve a home's energy efficiency and switch to renewable energy resources to provide electricity, hot water, heat, and cooling for a home. Surfing Brilliant Corners Candlewick Press Are you keeping safe? Electrical wiring and appliances, overhead power lines, machinery, photocopiers, mobiles and cordless telephones, radio masts, TVs, tube trains, x-rays and laser beams are amongst the hundreds of everyday items that

are now known to give off high levels of microwave radiation. Electromagnetic fields (EMFs) can be biologically active and capable of making changes to the structure of human and animal cells which are exposed to them. Long-term exposure is believed by an increasing number of scientists and environmentalists to be connected to tumours, fertility problems, behaviour and mood changes, concentration and memory loss, and also to affect melatonin production and impair our immune system repair mechanisms. The

Powerwatch Handbook is a simple no-nonsense guide to EMFs and how to reduce their harmful effect. Alasdair and Jean Philips present their information in a practical, positive and lively way, in an easy-to-follow handbook style. EMF levels are graded using a star rating system, high level items are highlighted, and practical tips given in step-by-step, bullet point form. The Husbands Oberon Books A provocative, handpicked collection of relevant (and surprising) essential recipes for today 's cook. We have

countless recipes at our disposal today but what are the real keepers, the ones that don't just feed us when we're hungry or impress our friends on Saturday night, but inspire us to get into the kitchen? At the forefront of American cooking for more than 20 years, the editors at America's Test Kitchen have answered this question in an essential collection of recipes that you won't find anywhere else: 100 Recipes Everyone Should Know How to Make. Organized into three recipe sections—Absolute Essentials, Surprising

Essentials, and Global Essentials—each recipe is preceded by a thought-provoking essay that positions the dish. For example, Treating Pasta Like Rice Simplifies Everything; A Covered Pot Is a Surprisingly Good Place to Roast a Chicken; and Reimagine Pie in a Skillet to Simplify the Process. You'll find useful workday recipes like a killer tomato sauce that's almost as easy as opening a jar of the store-bought stuff; genius techniques for producing amazing flavor—try poaching chicken breasts over a garlic-

and-soy- spiked brine (trust us, it's that good); and familiar favorites reinvigorated—the best beef stew comes from Spain (and it's even easier to make than the stateside stew you've been eating for years). Gorgeous photography (shot right in the test kitchen) accompanies every recipe, revealing the finished dish as well as highlights of its preparation. Likely to stir debate among anyone interested in food and cooking, 100 Recipes Everyone Should Know How to Make provides a snapshot of how we cook today and will galvanize even the

most jaded cook to get into the kitchen. From the Hardcover edition.
