What is an ideal business process documentation software?

Software documentation is a type of process documentation that helps with efficient and appropriate use of software. While originally designed to aid experienced users, it has evolved to include teaching new users. This evolution resulted in task orientation, which is explaining information sequentially, such as how-to's or tutorials.

Software Process Flow Document

The procedure

flowchart is developed to ensure that the co-workers, employees and persons in charge have complete, correct and consistent information and instruction. Documents should be numbered orderly so that others could easily find. New documents must be passed through the approval procedure before issue. The draft documents have no significance to work in progress until they are signed and activated.
