As a built environment student you are likely to be required to research, write and submit a dissertation as a core component of your degree studies. As a vocational profession, students of the built environment often have strong practical aspirations. Writing a Built Environment Dissertation provides practical guidance and will help to steer you into a

position where you can develop a good dissertation by mixing your practical strengths with more theoretical tools. The book is ordered around a common dissertation structure: that is, it starts with material that should be in the introduction and finishes with material that should be in the conclusion. Each chapter provides a commentary on the kind of information that you should put in each chapter of your dissertation, supported by a variety of examples using a range of methodological designs. The book has a strong focus on data collection, data analysis, reliability and validity – all areas where student dissertations are often weak. Material that will help you think about study skills and ethics is embedded throughout the book, and the chapters on qualitative and quantitative analysis will show you how to carry out a rigorous analysis while avoiding some of the complexity in statistical work. If you are an under-graduate student in the final year of an honours degree programme in the built environment, or perhaps a student at masters or

PhD level and have been away from academic study for some time, then this book will help you to write a more innovative and thorough dissertation.

Ditch the storybook wedding, banish Bridezilla, and walk down the aisle in truth and in style: You are a Stone Fox Bride and this is your bridal guide. Molly Rosen Guy founded the brand Stone Fox Bride as an alternative to outdated, plastic-princess wedding culture. Her stylish and subversive approach is being embraced by creative, modern brides who believe in love and romance, but have no interest in running off into the sunset. In an inspiring mix of intimate storytelling, gorgeous visuals, and candid advice, with an aesthetic that channels Bianca Jagger in a white tux rather than Cinderella in a frilly gown, Molly Rosen Guy—your cool, hippie chic guide through the wilds of wedding planning—encourages brides-to-be, and their ladies in tow, to say no to all things phony, frilly, and silly. Featuring personal essays that explore the nuances of the process, including a raw, unairbrushed look at the realities of the early days of marriage, she tells us that a Stone Fox Bride should never sacrifice her style, her story, or her sanity to please others; she reassures us that weddings don't have to be free of confusion, shades of gray, or cellulite; and reminds us that marriage, like love, is equal parts complicated and beautiful. Praise for Molly Rosen Guy and the Stone Fox Bride phenomenon “The current wedding-wear darling of the jammin’ and Instagrammin’ set [offers] an insouciant, antiestablishment approach to weddings.”—The New York Times “[Molly Rosen Guy is] making waves in the bridal industry thanks to her eclectic eye and refusal to conform to clichéd traditions.”—W “Molly Rosen Guy built a business filling the needs of women who long for something more than your run-of-the-mill, princess-y flou for their big day.”—Vogue

Writing a Built Environment Dissertation The Turncoat's Widow
Recently widowed, Rebecca Parcell is too busy struggling to maintain her farm in Morristown to give a fig who wins the War for Independence. But rumors are spreading in the winter of 1780 that she's a Loyalist sympathizer who betrayed her husband to the British—quite a tidy way to end her disastrous marriage, the village gossips whisper. Everyone knows that her husband was a Patriot, a hero who died aboard a British prison ship moored in New York Harbor. But "everyone" is wrong. Parcell was a British spy, and General Washington—who spent that winter in Morristown—can prove it. He swears he'll safeguard Becca's farm if she unravels her husband's secrets. With a mob ready to exile her or worse, it's an offer she can't refuse. Escaped British prisoner of war Daniel Alloway was the last person to see Becca's husband alive, and Washington throws this unlikely couple together on an espionage mission to British-occupied New York City. Moving from glittering balls to an underworld of brothels and prisons, Becca and Daniel uncover a plot that threatens the new country's future. But will they move quickly enough to warn General Washington? And can Becca, who's lost almost everyone she loves, fight her growing attraction to Daniel, a man who always moves on?

First published in 1988, this book analyses the changes that took place in the economic organisation of the British construction industry throughout the 1970s and early 1980s, in

particular considering its social and economic structure and examining the causes of its poor industrial record. Michael Ball describes how the major firms survived the economic slump between 1973 and 1982 - when construction workloads collapsed - by substantially restructuring their operations, relationships with clients, workforces and subcontractors. Detailed attention is paid to construction firms, the workers they employ, the influence of trade unionism and the role of other agencies in the building process. Reissued at a particularly challenging time for the British construction industry, this relevant and practical title will be of value to students and academics of economics and social change, as well as those on courses for construction professionals.
