We have a solaris 10 update11 OS(Native multipathing) with LDOM in sun cluster. It is possible to install EMC powerptah,if yes the what is the procedure. Becauseafter installing power path we are facing problem with did no and because of that we can not bring Metaset up under Sun cluster.

Planning the Oracle Solaris Cluster HA for SAP ...

Oracle Solaris Cluster extends the Oracle Solaris OS to provide enhanced availability to SAP environments. Oracle Solaris Cluster

delivers instant support for SAP through specific integration modules called agents that monitor an application to detect whether it is operating correctly, or take action if a problem is detected.

[Solaris Cluter 3.2 for SAP | Oracle Community](#)

A typical SAP Web AS configuration in a VCS cluster has the following characteristics: ?VCS is installed and configured in a two-node cluster. ?The sapmnt directory is installed on shared storage and mounted on all the nodesintheclustervi aNetworkFileSystem(NFS)orClusterFileSystem(C FS).

Solaris Cluster with PowerPath and LDOM configuration ...

Oracle Solaris Cluster expands Oracle Solaris' high availability and disaster recovery capabilities, delivering the best Unix availability for SAP deployments. Oracle Solaris Cluster is engineered for business-critical applications such as SAP, providing application and service recovery for both traditional Oracle Solaris enterprise deployments and Oracle Solaris-based private, public, and hybrid clouds.

Cluster Configuration - Prerequisites

SAP ASE version 15.0 does not support Sun Cluster version 2.2. If you currently have these clusters configured, you must upgrade the respective cluster versions to configure SAP ASE 15.0 for High Availability on Sun Solaris. An active-passive configuration includes two nodes and a single SAP ASE server. The node that hosts the SAP ASE server under normal conditions is the primary node; the node that can potentially host the SAP ASE server is called the secondary node.
