Alzheimer's disease (AD) is a chronic neurodegenerative disorder characterized by progressive cognitive dysfunction and memory loss, inability to perform the activities of daily living and mood disorders. According to the so-called

“amyloid cascade hypothesis”, amyloid- β -peptide (A β), produced by beta- and gamma-secretase-mediated cleavages of the amyloid precursor protein (APP), plays a pivotal role in the pathogenesis of AD. A β was also shown to contribute to AD pathology by stimulating the hyperphosphorylation of tau which is responsible for the formation of neurofibrillary tangles. However, the “amyloid cascade hypothesis” was

challenged by other theories which lend support to the idea that A β is not causative but can be considered as an “innocent bystander” in AD. Although preclinical research generated impressive lines of evidence about the several intracellular mechanism(s) whose impairment leads to the onset and progression of AD, clinical research aimed at the development of new drugs capable of preventing or delaying the

onset of neuronal damage in AD patients has produced limited results. The drugs currently available for the treatment of AD are acetylcholinesterase inhibitors (AChEI) and the NMDA glutamate receptor antagonist memantine. The AChEI increase acetylcholine levels in the synaptic cleft, which are reduced because of the progressive damage of cholinergic neurons in cognitive brain areas (e.g. amygdala, hippocampus, and frontal cortex), whereas memantine is used to prevent/reduce calcium-dependent excitotoxic neuronal cell death. Both classes of drugs have been shown to improve symptoms related to cognitive decline, but their effects are confined largely to patients with mild to moderate AD, in particular during the first year or so of treatment. An alternative to this symptomatic treatments involves the use of drugs that intervene in the pathogenesis of the disease. Recently, monoclonal antibodies against A β were proposed as novel agents capable to remove A β from the brain thus preventing neuronal damage. The research topic focuses on the preclinical and clinical evidence about the several factors that contribute to the pathogenesis of AD as well as the potential therapeutic role of new classes of drugs still under preclinical or clinical

development.

The Review of Maritime Transport is an UNCTAD flagship publication, published annually since 1968. It provides an analysis of structural and cyclical changes affecting seaborne trade, ports and shipping, as well as an extensive collection of statistical information. The present edition of the Review of Maritime Transport takes the view that the long-term growth prospects for seaborne trade and maritime businesses are positive, with ample

opportunities for developing countries to generate income and employment and help promote foreign trade.

This collection of essays focuses on the important, but under-discussed, role of higher education institutions in both delivering academic programmes that provide relevant cognitive and professional skills and competences to future adult educators, and in being more actively involved in the current dialogue with regard to the

professionalization paths of adult educators and trainers. The topics discussed here vary from the initial education and training of adult educators in higher education environments, to the role of universities as validating agencies of existing psychopedagogical competences for in-service adult educators. Particular attention is also drawn to the ways in which adult education policies and initial education and training opportunities for prospective adult educators affect the role of higher education institutions in

terms of academic orientation and programme delivery.

Maritime-Port Technology and Development contains the latest research results and innovations as presented at the 2014 International Maritime and Port Technology and Development Conference (Trondheim, Norway, 27- 29 October 2014). The volume is divided into a wide range of

topics: Efficient and environmentally friendly energy use in ships and port Ships' Routing Cambridge University Press

This book provides a coherent and systematic view of the key concepts, principles, and techniques in maritime container transport and logistics chains including all the main segments: international maritime trade and logistics, freight logistics, container logistics, vessel logistics, port and terminal management, and sustainability issues in maritime transport. Container Logistics and Maritime Transport emphasizes analytical methods and current optimization models to tackle

challenging issues in maritime transport and logistics. This book takes a holistic approach to cover all the main segments of the container shipping supply chains to achieve an efficient and effective logistics service system across the entire global transport chain. Sustainability issues such as social concern and carbon emissions from shipping and ports are also discussed. Each maritime transport segment is addressed using an approach from qualitative/descriptive analytics to quantitative/prescriptive analytics. Cutting-edge optimization models are presented and explained to tackle various strategic, tactical, and operational planning problems. The book will help readers better

Unconventional Lawmaking in the Law of the Sea explores the ways that actors operating at the international level develop standards of behaviour to regulate varied maritime activities beyond

traditional lawmaking. Other than conventions and customary international law, there is a plethora of international agreements that influence international conduct. This 'soft law' or 'informal law' is now prolific in ocean governance, and so it is time to consider its significance for the law of the sea. This monograph brings together ocean law-of-the-sea scholars with expertise in specific areas of the law of the sea, as well as international law more generally. Informal lawmaking is examined in

relation to ocean resources, maritime security, shipping and navigation, and the marine environment. In each instance, there are reflections on the diverse actors, processes, and outputs shaping the regulation of the oceans. The analyses in this book further consider what this activity means within the rules on the sources, formation, and interpretation of international law. The growing reliance on informal agreements to fill legal gaps provides quick responses to pressing matters. We must

assess and understand these new forms of cooperation in order to influence existing treaties or customary international law. *Unconventional Lawmaking in the Law of the Sea* surveys the scope of informal lawmaking in the law of the sea and evaluates the significance of this activity for the UN Convention on the Law of the Sea, as well as for ocean governance more broadly, now and in the future. *Cases and Materials on the Law of the Sea, Second Edition* CRC Press

Maritime Law - Current Developments and Perspectives
Springer Nature

This book deals with ship design and in particular with methodologies of the preliminary design of ships. The book is complemented by a basic bibliography and five appendices with useful updated charts for the selection of the main dimensions and other basic characteristics of different types of ships (Appendix A), the determination of hull form

from the data of systematic hull form series (Appendix B), the detailed description of the relational method for the preliminary estimation of ship weights (Appendix C), a brief review of the historical evolution of shipbuilding science and technology from the prehistoric era to date (Appendix D) and finally a historical review of regulatory developments of ship's damage stability to date (Appendix E). The book can be used as textbook for ship design courses or as additional reading for university or college students of naval architecture courses and related disciplines; it may also serve as a reference book for naval architects, practicing engineers of related disciplines and ship officers, who

like to enter the ship design field systematically or to use practical methodologies for the estimation of ship's main dimensions and of other ship main properties and elements of ship design.

This book examines educational policy at primary, secondary and university level in Ireland from the foundation of the State to the present day. Primarily an attempt to set policy within a historical context, the book draws together compelling research on the evolution of

key changes in topics as diverse as the use of corporal punishment, the evolution of skills policy in post-primary settings and the development of the universities in the post-1922 period. The book includes detailed analysis of more recent policy initiatives and changes in, initial teacher education, curriculum change, and special and inclusive education and will be of interest to those working in the various fields, students and the general public. It presents detailed discussions of change in the Irish education system, demonstrating how policy initiatives, particularly since the early 1990s, have brought about significant transformation at all levels. In doing so, the book also demonstrates that the origin of change often lay in earlier developments, particularly those of the mid-1960s. Policy development is closely linked to external factors and influences and chapters on academic selection and teachers' recollections of policy, for example, set developments within the wider historical context employing the views and recollections of teachers so that the influence of change on day-to-day practice is revealed.

Frontiers in Pharmacology was launched in 2010, with a number of sections which were eventually reorganized. The founding Field Chief Editor was Prof. Théophile Godfraind, an eminent scientist active in cardiovascular pharmacology, who pioneered the discovery of calcium antagonists. At that

time he invited me to serve as Chief Editor for a section named “ Analytical and Experimental Pharmacology ” . Later on, our section enlarged and was re-named as “ Experimental Pharmacology and Drug Discovery ” to outline the translational potential of fundamental pharmacological research and theoretical analysis to the improvement of human health, through the invention of novel medicinal products. We are now entering the 10th year of editorial activity, which sees

the publication of the 1,000th paper in our section. Such an achievement is very rewarding for us and our community, but it is even more remarkable when placed into the timeline of our development. In fact, in a 10-year frame we have significantly grown in quantity and quality, e.g. both in number of published papers and in scientific impact. The International Code on Intact Stability 2008 (2008 IS Code), presents mandatory and recommendatory stability criteria and other measures for ensuring the safe operation of ships, to minimize the risk to such ships, to the personnel on board and to the environment. The 2008 IS Code took effect on 1 July 2010. The 2008 IS Code features: a full update of the previous IS Code; criteria based on the best state-of-the-art concepts available at the time they were developed, taking into account sound design and engineering principles and

experience gained from operating ships; influences on intact stability such as the dead ship condition, wind on ships with large windage area, rolling characteristics and severe seas. This publication also presents Explanatory Notes to the 2008 IS Code, intended to provide administrations and the shipping industry with specific guidance to assist in the uniform interpretation and application of the intact stability requirements of the 2008 IS Code. Education Policy in Ireland Since 1922 Frontiers Media SA Sea and freshwater ports are a key component of critical infrastructure and essential for

maintaining global and domestic economies. In order to effectively secure a dynamic port facility operation, one must understand the business of maritime commerce. Following in the tradition of its bestselling predecessor, Port Security Management, Second Edition continues to supply readers with this understanding. This fully updated edition covers the latest in continuously changing legislation regarding federal mandates, securing vessels, cargo security, and granting employee credentials. Focusing on best practices, it details real-world solutions that law enforcement authorities and security management professionals can put to use immediately. Assuming little prior knowledge of

the industry, the book examines port security in the context of global transportation systems. It supplies practitioners and educators with a framework for managing port security and details risk assessment and physical security best practices for securing ships and ports. The book explains how the various stakeholders, including port management, security, government, and private industry, can collaborate to develop safe and secure best practices while maintaining efficient operations. Addressing the legislative measures, regulatory issues, and logistical aspects of port security, the book includes coverage of cruise ships, cargo security, CT-PAT, and emergency operations. Complete

with a new chapter on intelligence, this book is ideal for anyone with a vested interest in secure and prosperous port facilities who wants to truly understand how to best tackle the management of port security.

Asia-Pacific and the Implementation of the Law of the Sea SOLAS This publication contains the amendments to the International Convention for the Safety of Life at Sea (SOLAS) 1974

and to its 1988 Protocol that were adopted by the Maritime Safety Committee (MSC) in 2010 and 2011. Resolution MSC.290(87) was adopted in May 2010 by the MSC at its eighty-seventh session and contains amendments to SOLAS chapter II-1, regulation 2 in Part A which adds a new definition and also adds, in Part A-1, a new regulation 3-10 on Goal-based ship construction standards for bulk carriers and oil tankers. These amendments were accepted on 1 July 2011 and entered into force on 1 January 2012. Resolution MSC.291(87) was also adopted by the MSC at its eighty-seventh session and adds a new regulation 3-11 to chapter II-1 in Part A-1 on Corrosion protection of cargo oil

tanks of crude oil tankers. This resolution also amends, in Part A, chapter II-2, regulation 1 "Application" and Part B, regulation 4 Probability of ignition. These amendments were accepted on 1 July 2011 and entered into force on 1 January 2012. Resolution MSC.308(88) was adopted in December 2010 by the MSC at its eighty-eighth session and contains amendments to chapters II-1 and II-2 and adds new regulations to chapter V "Safety of navigation". Further amendments were made to the appendix certificates. These amendments will enter into force on 1 July 2012 pending their acceptance on 1 January 2012. Resolution MSC.309(88) was also adopted by the MSC at its eighty-

eighth session and contains amendments to the 1988 Protocol and modifications and additions to the appendix to the Annex to the 1974 SOLAS Convention. These amendments modify the safety certificate forms for passenger and cargo ships. These amendments will enter into force on 1 July 2012 pending their acceptance on 1 January 2012. Resolution MSC.317(89) was adopted in May 2011 by the MSC at its eighty-ninth session and contains an amendment to chapter III, Life-saving appliances and arrangements, regulation 1 which adds a new paragraph on lifeboat on-load release mechanisms. These amendments will enter into force on 1 January 2013, pending their

acceptance on 1 July 2012. Wings The Marine Environment Protection Committee (MEPC) of IMO, at its sixty-second session in July 2011, adopted the Revised MARPOL Annex V, concerning Regulations for the prevention of pollution by garbage from ships, which enters into force on 1 January 2013. The associated guidelines which assist States and industry in the implementation of MARPOL Annex V have been reviewed and updated and two Guidelines were adopted in March 2012 at MEPC's sixty-third session. The 2012 edition of this publication contains: the 2012 Guidelines for the implementation of MARPOL Annex V (resolution MEPC.219(63)); the 2012

Guidelines for the development of garbage management plans (resolution MEPC.220(63)); and the Revised MARPOL Annex V (resolution MEPC.201(62)).
