"This manual, the first of its kind focused on district nursing, provides the means to build competence and confidence in nurses new to the community, or developing their skills. The comprehensive and evidence-based content

provides essential information for competence in key areas of district nursing." —From the Foreword, by Rosemary Cook CBE, Hon D Lett, MSc, PG Dip, RGN Director, The Queen's Nursing Institute Clinical skills are a fundamental aspect of district nursing care. The District Nursing Manual of Clinical Procedures is a practical, evidence-based manual of clinical skills which reflects the unique challenges of district nursing care within the patient's home. It provides a comprehensive resource for all district nurses, community nurses, students and healthcare professionals involved in the district nursing team, enabling them to practice competently and confidently and deliver clinically effective, person-centred care. The District Nursing Manual of Clinical Procedures addresses the complexity of district nursing care and encompasses key aspects of clinical practice, including decision making in areas that district and community nurses often struggle with or find difficult when they are on their own in a patient's home. It utilises the latest clinical research and expert clinical knowledge to address these challenges, and to provide the underlying theory and evidence for district nursing care. Key features Evidence-based manual of practical clinical skills in district nursing care Clear, user-friendly and easy to understand Contains recommendations for expert care within a patient's own home Addresses key concerns of district and

community nurses working on their own within a patient's home Encompasses key aspects of district nursing care Placed in the context of person-centred care All procedures include the rationale for each action - 'why' as well as 'how' This title is also available as a mobile App from MedHand Mobile Libraries. For twenty years this book, now in its 5th edition, has provided information on adverse drug interactions that is unrivalled in coverage and scholarship. Adverse drug reactions, many of them ascribable to interactions with other drugs or with chemical substances in food or the environment, are thought to cause or complicate one in twenty of hospital admissions. The book is conveniently divided into two parts: Part 1 comments on drug interactions and their mechanisms, on a pharmacokinetic and pharmacodynamic level, while Part 2 consists of drug interaction tables, divided and subdivided into categories of disorders, and the drugs used in the treatment of these disorders. If safety in drugs is to improve, education of prescribers is vitally important. This book, with its up-to-date and coordinated approach, serves that purpose well. The real threat, as the authors remind us, is the ignorance of practitioners, not the drug itself. The volume is therefore an essential addition to the shelves of those responsible for the prescription of drugs, in order to prevent a potential backlash

when used in combination with other drugs or chemical substances.

Laboratory Manual for Science is a series of five books for classes 6 to 10. These are complimentary to the Science textbooks of the respective classes. The manuals cover a wide range of age-appropriate experiments that give hands-on experience to the students. The experiments help students verify scientific truths and principles, and at the same time, expose them to the basic tools and techniques used in scientific investigations. Our manuals aim not only to help students better comprehend the scientific concepts taught in their textbooks but also to ignite a scientific quest in their young inquisitive minds.
