When the people of Flint, Michigan, turned on their faucets in April 2014, the water pouring out was poisoned with lead and other toxins. Through a series of disastrous decisions, the state government had switched the city's water supply to a source that corroded Flint's aging lead pipes. Complaints about the foul-smelling water were dismissed: the residents of Flint, mostly poor and African American, were not seen as credible, even in matters of their own lives. It took eighteen months of activism by city residents and a band of dogged outsiders to force the state to

admit that the water was poisonous. By that time, twelve people had died and Flint's children had suffered irreparable harm. The long battle for accountability and a humane response to this man-made disaster has only just begun. In the first full account of this American tragedy, Anna Clark's *The Poisoned City* recounts the gripping story of Flint's poisoned water through the people who caused it, suffered from it, and exposed it. It is a chronicle of one town, but could also be about any American city, all made precarious by the neglect of infrastructure and the erosion of democratic decision making. Places like Flint are set up to fail—and for the people who live and work in them, the consequences can be fatal.

In a time before computers, GPS, the Internet, and other technological advances, reliance on blood, sweat, tears, and an old-fashioned work ethic were often the only tools people had to survive. And for an infantryman in the early

days of Vietnam, helicopter rides into hot landing zones, coping with leeches, enemy combatants, difficult orders, and surviving in the jungle took all the grit and determination necessary both to endure and to approach victory. In Storm in the Jungle, a soldier chronicles his life caught seemingly in the middle of nowhere between a strange land and culture, as he is sent to war in a troop ship and tasked to set up base camps, engage in search and destroy missions, and manage tense relations with his fellow brothers in arms. As he sees the tragedy of death unfold before him for the first time and many other times thereafter he and the other men around him cannot help but be changed forever. Personally facing the enemy in combat and battling his way through the physical, mental, and psychological turmoil of the Vietnam War, discover how for this young infantryman the tolls of war are paid with his blood, sweat, and tears and almost a chance at coming home.
