This book traces trends in nonperforming loans (NPLs) during and after financial crises in Asia and Europe. It examines the impact of high NPLs, compares the effectiveness of resolution strategies, and explores policy considerations. The volume highlights the need for decisive and comprehensive policy action to help manage NPLs swiftly. It explores the legal and economic conditions conducive to NPL resolution, the role of asset management companies, the potential of technological solutions, and the importance of regional financial cooperation. It

provides insights to help policy makers chart a course through the

financial and economic fallout of the coronavirus disease (COVID-19) pandemic to recovery and sustained financial stability in Asia, Europe, and beyond. The publication is a collaborative project of the Asian Development Bank, the European Central Bank, and the Joint Vienna Institute.

In December 2017 the Basel committee finalised its work on the reform of the Basel III framework. Together with requirements already published in 2015 and 2016, the Basel committee changes all approaches for the calculation of RWA and the corresponding Pillar III disclosure rules. This package of new standards from the Basel Committee, which is unofficially called "Basel IV", is now the most comprehensive package of modifications in the history of banking supervision. The banking industry will face major challenges in implementing these new rules. The second edition of the "Basel IV" handbook is updated with all publications up to March 2018 and also extensively enhanced with additional details, examples and case studies. The aim is to convince the reader that we are facing a new framework called "Basel IV" and not just a fine adjustment of the existing Basel III regulations. This book covers all new approaches for the calculation of RWA: - the standardised approach (CR-SA) and the IRB approach for credit risk, - the new standardised approach for counterparty credit risk (SA-CCR), - both the standardised approach and internal models approach from the "fundamental review of the trading book" (SBA and IMA) - the basic approach (BA-CVA) and standardised approach (SA-CVA) for the CVA risk, - all new approaches (SEC-IRBA, SEC-ERBA, SEC-SA, IAA) for securitisations (incl. STS), - the approaches for the calculation of RWA for equity positions in investment funds (LTA, MBA, FBA) - the new standardised approach for operational risk (SA-OpRisk) Because of the strong relation to the Pillar I requirements, the second edition covers the topics of interest rate risk in the banking

book (IRRBB), large exposures and TLAC again. Additionally, the book contains a detailed description of the Pillar III disclosure requirements. With the aid of a high-profile team of experts from countries all over the globe, the complexity of the topic is reduced, and important support is offered.

The rise of open data in the public sector has sparked innovation, driven efficiency, and fueled economic development. While still emerging, we are seeing evidence of the transformative potential of open data in shaping the future of our civic life, and the opportunity to use open data to reimagine the relationship between residents and government, especially at the local level. As we look ahead, what have we learned so far from open data in practice and how we can apply those lessons to realize a more promising future for America's cities and communities? Edited by Brett Goldstein, former Chief Data Officer for the City of Chicago, with Code for America, this book features essays from over twenty of the world's leading experts in a first-of-its-kind instructive anthology about how open data is changing the face of our public institutions. Contributors include: Michael Flowers, Chief Analytics Officer, New York City Beth Blauer, former director of Maryland StateStat Jonathan Feldman, CIO, City of Asheville Tim O'Reilly, founder & CEO, O'Reilly Media Eric Gordon, Director of Engagement Game Lab, Emerson College Beth Niblock, CIO, Louisville Metro Government Ryan & Mike Alfred, Co-Founders, Brightscope Emer Coleman, former director of the London Datastore Mark Headd, Chief Data Officer, City of Philadelphia "As an essential volume for anyone interested in the future of governance,

urban policy, design, data-driven policymaking, journalism, or civic engagement, "Beyond Transparency" combines the inspirational glow and political grit of Profiles in Courage with the clarity of an engineer's calm explanation of how something technical actually works. Here are the detailed how-to stories of many members of the first generation of open government pioneers, written in a generous, accessible style; this compilation presents us with a great deal to admire, ample provocation, and wise guidance from a group of remarkable individuals." -Susan Crawford, author of Captive Audience "Just as he did during his time in my administration, Goldstein has brought together industry leaders to discuss issues of relevance in the open data movement and the practical implications of implementing these policies... This book will help continue the work to make open government a reality across the country." - Mayor Rahm Emanuel, City of Chicago "A must-read for anyone who is passionate about what open data can do to transform city living." - Boris Johnson, Mayor of London

The most practical, real-world presentation of cost accounting on the market, this book blends a traditional and proven method of teaching cost accounting with the integration of innovative topics. Cost topics are covered in the context of organizational strategy and operational tactics, as cost management decisions are sensitive to strategies driven by quality, cost, and innovation. Kinney, Prather-Kinsey, and Raiborn reinforce the material with real-world examples and visual illustrations that bring cost management techniques into the student's sphere of understanding. A flexible organization appropriate for either a one- or two- semester course--coupled with clear and abundant visual presentations--allows students to clearly understand difficult topics. The text's revised organizational structure streamlines chapter materials as well as reduces redundancy between cost accounting and other business courses.

Accounting for financial instruments is one of the most complex and taxing areas in accounting today that needs to be understood by all practicing accountants. The International Financial Reporting Standards that govern this

area of accounting are often difficult to understand and interpret. PwC's Manual of Accounting - Financial Instruments 2012 is a thoroughly comprehensive, clearly explained and informative guide to these standards. It contains practical worked examples and extracts from company financial statements that help to illustrate the explanations. Key changes from previous edition include updated guidance on: IFRS 9 - including aspects on liabilities issued in November 2010; Consequential amendments of IFRS 9; IASB amendment to IFRS 7, 'Financial instruments: Presentation', on derecognition; Annual improvements 2010; IFRIC agenda decisions; New extracts and examples. This book draws on the combined expertise and experience of financial instrument specialists in PwC's Global Accounting Consulting Services team. It will be of particular interest to preparers and users of IFRS financial statements and others who require a detailed knowledge of financial instruments accounting. Analysts, academics and students will also find it a valuable reference tool.

An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons

that go down easy. You'll be laughing and learning at the same time.

Bankruptcy prediction is one of the most important research areas in corporate finance. Bankruptcies are an indispensable element of the functioning of the market economy, and at the same time generate significant losses for stakeholders. Hence, this book was established to collect the results of research on the latest trends in predicting the bankruptcy of enterprises. It suggests models developed for different countries using both traditional and more advanced methods. Problems connected with predicting bankruptcy during periods of prosperity and recession, the selection of appropriate explanatory variables, as well as the dynamization of models are presented. The reliability of financial data and the validity of the audit are also referenced. Thus, I hope that this book will inspire you to undertake new research in the field of forecasting the risk of bankruptcy.

Die Autorin untersucht, welche Kenntnisse chinesische Manager über westliche Management-Accounting-Instrumente haben, welche Instrumente sie anwenden und wie zufrieden sie damit sind. Die Studie veranschaulicht auch die

Anwendungsschwierigkeiten mit den Instrumenten in chinesischen Unternehmen und gibt Einblick in den geschätzten Erfolg durch die Anwendung der Instrumente. Zum ersten Mal wurde die nationale chinesische Kultur als Einflussfaktor in Betracht gezogen und ihre Auswirkung auf die Anwendung der Management-Accounting-Instrumente verdeutlicht. Das Buch bietet mit dem eher wenig erschlossenen Forschungsgegenstand chinesischer Unternehmen eine rare und bereichernde Fundgrube.

This book provides a comprehensive treatment of credit risk assessment and credit risk rating that meets the Advanced Internal Risk-Based (AIRB) approach of Basel II. Credit risk analysis looks at many risks and this book covers all the critical areas that credit professionals need to know, including country analysis, industry analysis, financial analysis, business analysis, and management analysis. Organized under two methodological approaches to credit analysis—a criteria-based approach, which is a hybrid of expert judgement and purely mathematical methodologies, and a mathematical approach using regression analysis to model default probability—the book covers a cross-section of industries including passenger airline, commercial real estate, and commercial banking. In three parts, the sections focus on hybrid models, statistical models, and credit management. While the book provides theory and principles, its emphasis is on practical applications, and will appeal to credit practitioners in the banking and investment community alongside college and university students who are preparing for a career in lending.

Today managers need to be able to prevent, deter and detect fraud (and potential fraud) in their business. Internal Control and Fraud Detection takes them step by step through designing, setting up and implementing programs and controls they will need. It also supplies the essential tools for the job. Among legal responsibilities it touches on Section 404 of the Sarbanes-Oxley Act and its sweeping changes, SEC rules and Auditing Standard (AS) No. 5 which requires that the management of a public company and its auditor

issue two new reports at the end of every fiscal year. This book also covers Management's Antifraud Programs and Controls and the risk factors included in SAS No. 99. A major section then deals with forensic accounting. Finally Internal Control and Fraud Detection provides its readers with practical guides and checklists which they can immediately implement, such as indicators of financial crime, the ACFE's fraud prevention checkup, an internal control assessment form, computer applications' checklists and financial reporting information systems and a controls checklist. All in all this book will guide its readers to expertise in a specialist, but essential, area of managing their business.

Contemporary Financial Intermediation, Second Edition, brings a unique analytical approach to the subject of banks and banking. This completely revised and updated edition expands the scope of the typical bank management course by addressing all types of deposit-type financial institutions, and by explaining the why of intermediation rather than simply describing institutions, regulations, and market phenomena. This analytic approach strikes at the heart of financial intermediation by explaining why financial intermediaries exist and what they do. Specific regulations, economies, and policies will change, but the underlying philosophical foundations remain the same. This approach enables students to understand the foundational principles and to apply them to whatever context they encounter as professionals. This book is the perfect liaison between the microeconomics realm of information economics and the real world of banking and financial intermediation. This book is recommended for advanced undergraduates and MSc in Finance students with courses on commercial bank management, banking,

money and banking, and financial intermediation. Completely undated edition of a classic banking text Authored by experts on financial intermediation theory, only textbook that takes this approach situating banks within microeconomic theory

This book offers a primer on the valuation of digital intangibles, a trending class of immaterial assets. Startups like successful unicorns, as well as consolidated firms desperately working to re-engineer their business models, are now trying to go digital and to reap higher returns by exploiting new intangibles. This book is innovative in its design and concept since it tackles a frontier topic with an original methodology, combining academic rigor with practical insights. Digital intangibles range from digitized versions of traditional immaterial assets (brands, patents, know-how, etc.) to more trendy applications like big data, Internet of Things, interoperable databases, artificial intelligence, digital newspapers, social networks, blockchains, FinTech applications, etc. This book comprehensively addresses related valuation issues, and demonstrates how best practices can be applied to specific asset appraisals, making it of interest to researchers, students, and practitioners alike.
