The Trouble with Twin Studies questions popular genetic explanations of human behavioral differences based upon the existing body of twin research. Psychologist Jay Joseph outlines the fallacies of twin studies in the context of the ongoing decades-long failure to discover genes for human behavioral differences, including IQ, personality, and the major psychiatric disorders. This volume critically examines twin research, with a special emphasis on reared-apart twin studies, and incorporates new and updated perspectives, analyses, arguments, and evidence.

"Primary care is the new frontier for preventing suicide and Bryan and Rudd are its pioneers, offering wisdom and guidance based on their experience in bridging behavioral health care to the primary health care setting. This is a truly significant reference." Lanny Berman, PhD, ABPP Executive Director, American Association of Suicidology President, International Association for Suicide Prevention "In their pragmatic and useful book titled *Managing Suicide Risk in Primary Care*, Bryan and Rudd provide an essential reference guide for health care professionals working in primary care settings."--*PsycCRITIQUES* "This book offers a comprehensive approach that can help the physician become competent to assess and intervene with suicidal risk as well as lessen his or her anxiety when dealing with patients at suicide risk. Needless to say, this can be a life and death matter for some patients... One of the great strengths of this book is how they have adapted insights and interventions from traditional mental health care for the uniqueness of primary care... I highly recommend this book for any professional working in primary care. It will be taken off the shelf for reference and reviewed many times in the course of a career."--*Family Medicine*

Journal Roughly forty-five percent of individuals who commit suicide make contact with a primary medical provider in the month prior to their death; nearly twenty percent make contact within one day of their death. This practical guide demonstrates how the primary care setting—an increasingly important provider of mental health treatment—can be an effective place for preventing suicide and providing ameliorative care. Firmly grounded in the clinical realities of primary care, Bryan and Rudd address the key issues that often plague behavioral health consultants (BHCs) in such settings where appointments are brief, patient contact is limited, and decision making and treatment are collaborative. They offer effective strategies for BHCs to manage patients across a suicidal crisis beginning with the development of procedures prior to crisis, steps to take during a crisis, planning for post-crisis care, transition to specialty mental health facilities, and legal issues. Key Features: Targets techniques for suicide assessment and prevention in primary care settings Addresses the clinical realities of working in a primary care setting and how to adapt them to the needs of suicidal patients Covers clinical protocols, legal issues, and risk management Discusses the formation of collaborative relationships with patients and staff Provides brief interventions with suicidal patients and post-crisis strategies Written by leading specialists in behavioral health, primary care, and suicidology *The Counseling Dictionary Theory and Practice of Counseling and Psychotherapy* The first comprehensive textbook on political psychology, this user-friendly volume explores the psychological origins of political behavior. Using psychological concepts to explain types of political behavior, the authors introduce a broad range of theories and cases of political activity to illustrate the behavior. The book examines many patterns of political behaviors including leadership, group behavior, voting, race, ethnicity, nationalism, political extremism, terrorism, war, and genocide. Text boxes highlight current and historical events to help students see the connection between the world around them and the concepts they are learning. Examples highlight a variety of research methodologies used in the discipline such as experimentation and content analysis. The "Political Being" is used throughout to remind the reader of the psychological theories and concepts to be explored in each chapter. *Introduction to Political Psychology* explores some of the most horrific things people do to one another for political purposes, as well as how to prevent and resolve conflict, and how to

recover from it. The goal is to help the reader understand the enormous complexity of human behavior and the significant role political psychology can play in improving the human condition. Designed for upper division courses on political psychology or political behavior, this volume also contains material of interest to those in the policymaking community. Nothing could hurt worse. But even in the darkness . . . there ' s hope. The pain of suicide loss is indescribable. It seems beyond survival. Yet with faith, perseverance, and the tools of brain science, there is a way through. It will take time. It will take struggle. But hope is real, for there are things you can do to make it to the other side. If you are struggling with suicide loss or you need to come alongside someone who is, Rita Schulte wants to help you move forward. As a suicide loss survivor herself, she understands the pain you ' re feeling because she has been there too. Rita, an experienced therapist and expert in traumatic loss, offers a science-based therapy model that also takes into account the role of human spirituality. Chapters in this book include: Making Sense of the Desire to Die The Mind-Body Connection Unfinished Business Making Peace with Ourselves Facing the Dark Side Children—Living Behind the Shadow The Time that Remains When it comes to suicide loss, you ' ll never have all the answers. But one thing is certain: there are real pathways to help you heal—body, mind, and spirit.

Incorporating the thinking, feeling, and behaving dimensions of human experience, the ninth edition of Corey's best-selling text offers an easy-to-understand text that helps students compare and contrast the therapeutic models expressed in counseling theories. Corey introduces students to the major theories (psychoanalytic, Adlerian, existential, person-centered, Gestalt, reality, behavior, cognitive-behavior, family systems, feminist, and postmodern approaches) and demonstrates how each theory can be applied to a single case (Stan). With his trademark style, he shows students how to apply those theories in practice, and helps them learn to integrate the theories into an individualized counseling style. This book is the center of a suite of products that includes a revised student manual, Case Approach to Counseling and Psychotherapy (2013), The Art of Integrative Counseling (2013) and media resources like the DVDs titled DVD for Theory and Practice of Counseling and Psychotherapy: The Case of Stan and Lecturettes, and DVD for Integrative Counseling: The Case of Ruth and Lecturettes, which features the same videos as the Integrative Counseling CD-ROM redesigned for today's classrooms. Aaron W. Marrs challenges the accepted understanding of economic and industrial growth in antebellum America with this original study of the history of the railroad in the Old South. Drawing from both familiar and overlooked sources, such as the personal diaries of Southern travelers, papers and letters from civil engineers, corporate records, and contemporary newspaper accounts, Marrs skillfully expands on the conventional business histories that have characterized scholarship in this field. He situates railroads in the fullness of antebellum life, examining how slavery, technology, labor, social

convention, and the environment shaped their evolution. Far from seeing the Old South as backward and premodern, Marrs finds evidence of urban life, industry, and entrepreneurship throughout the region. But these signs of progress existed alongside efforts to preserve traditional ways of life. Railroads exemplified Southerners' pursuit of progress on their own terms: developing modern transportation while retaining a conservative social order. Railroads in the Old South demonstrates that a simple approach to the Old South fails to do justice to its complexity and contradictions. -- Dr. Owen Brown and Dr. Gale E. Gibson

Each chapter in The Counselor and the Law has been updated to reflect changes in the 2014 ACA Code of Ethics, findings of recent court cases, and new federal and state legislation. Attorney Nancy Wheeler and Burt Bertram, a private practitioner and counselor educator, provide a comprehensive overview of the law as it pertains to counseling practice; an in-depth look at counselors ' legal and ethical responsibilities; and an array of risk management strategies. This edition contains a thoroughly updated chapter on distance counseling, technology, and social media; regulatory updates to the HIPAA and the HITECH Act; and recent case law developments regarding legal risks for counselor educators. The issues surrounding civil malpractice liability, licensure board complaints, confidentiality, duty to warn, suicide and threats of harm to self, professional boundaries, records and documentation, and managing a counseling practice are also addressed in detail.

Artificial intelligence, or AI, has become a ubiquitous part of our lives. Hardly a day goes by without hearing or reading about AI and the impacts it is having on society. Up until now, industry has led the charge in developing and implementing AI technologies to help achieve commercial goals. However, the public sector is increasingly turning to AI technologies to carry out its functions, develop and inform policy, and deliver services to its citizens. How governments and regulators respond to technological and social developments in AI will have a large and lasting impact on our society. We need to encourage worthwhile technological innovation, but we need to do so with our eyes open. This requires us to be alert to the far-reaching effects AI can have. We all have a role to play in determining what the society in which we want to live looks like. <https://ovic.vic.gov.au/wp-content/uploads/2019/08/closer-to-the-machine-web.pdf>
