Adolescents* John Wiley &

The first of its kind, *Doing What Works in Brief Therapy* is a guidebook to strategic solution focused therapy, a model which combines the principles and techniques of the Mental Research Institute's brief strategic therapy and the Brief Family Therapy Center's solution focused therapy. The book explains how the strategic emphasis on clarification of the problem and interruption of what does not work can complement and enhance the solution-focused emphasis on amplification of what does work. The text reviews the theory and presents specific treatment techniques. Case examples illustrate how the model has

been used in brief, intermittent, and single-session therapy in a managed care setting. Brief psychotherapy doesn't have to result in chronic frustration for the therapist or superficial, second-rate care for the client. This book presents an approach that is upbeat, practical, and eminently workable in managed care. The reader learns to focus on critical issues with exquisite precision and to construct creative, individualized interventions that amplify what works and interrupt what does not. Integrates strategic therapy and solution focused therapy. Includes guidelines for intervention and when to do what. Provides applications for couples: indications for separate or joint sessions. Considers both therapy and

medication as successful and unsuccessful solutions
Features excerpts and clinically rich examples

It is also a useful resource for practitioners wanting to update their core skills and knowledge. Tools for Effective Therapy with Children and Families Routledge Solution-focused therapy is often misunderstood to be no more than the techniques

it is famous for—pragmatic, future-oriented questions that encourage clients to reconceptualize their problems and build on their strengths. Yet when applied in a "one-size-fits-all" manner, these techniques may produce disappointing results and leave clinicians wondering where they have gone wrong. This volume adds a vital dimension to the SFT literature, providing a rich theoretical framework to facilitate nonformulaic clinical decision making. The focus is on how attention to emotional issues, traditionally not emphasized in brief, strengths-based interventions, can help "unstick" difficult situations and pave the way to successful solutions. Directive Play Therapy SAGE Structured, therapist-led

approaches to play therapy are becoming increasingly popular due to their time-limited nature and efficacy for such specific disorders as trauma and attachment issues. This is the first book to provide comprehensive coverage of numerous directive play therapy techniques and interventions that are empirically validated and can be adapted for use in clinical, school, group, and family settings. Designed for both students and practitioners, the text addresses the theoretical bases for these approaches and provides in-depth, practical guidance for their use. The book describes how directive play therapies differ from nondirective therapies and illustrates best practices in using directive techniques. It examines such diverse approaches as cognitive behavioral, solution focused, sensorimotor, and the use of creative arts in play therapy. Each approach is covered in terms of its theoretical foundation, research basis, specific techniques for practice, and a case example. The text describes how to adapt directive play therapy techniques for use in various contexts, such as with families, in groups, and in schools. Helpful templates for treatment planning and case documentation are also included, making the book a valuable resource for both training courses and practicing professionals in play therapy, clinical mental health counseling, child counseling, school counseling, child and family social work, marriage and family therapy, and clinical child psychology. Key Features: Delivers step-by-

step guidance for using directive play therapy techniques--the first book to do so Addresses theoretical basis, research support, and practical techniques for a diverse range of therapies Covers varied settings and contexts including school, clinical, group, and family settings Includes case studies Provides templates for treatment planning and case documentation
