**Saunders Solutions in Veterinary Practice: Small Animal Ophthalmology E-Book** Arihant Publications India limited

The branch of agriculture that deals with the raising of animals for the provision of food, fiber and other products is referred to as animal husbandry. Many commercial sectors are dependent on the optimum production and management of animals. These include the dairy and meat industry, aquaculture production, honey manufacture, silk farming, etc. Animals can be reared both intensively and extensively. In

extensive farming, animals are allowed to roam at will. In intensive systems, they are kept in high-density feedlots, climate-controlled buildings, barns, cages, etc. and their forage is provided. There is an increased reliance on intensive animal farming and production systems suited to the land available in modern animal husbandry. Besides these, there is also an increased use of chemical and mechanized methods. Embryo transfer and artificial insemination are common practices today to improve productivity or quality of the animals. This book discusses the fundamentals as well as modern approaches of animal husbandry. It attempts to understand the multiple branches that fall under this discipline and how such concepts have practical applications. For all readers who are interested in modern animal husbandry, the case studies included herein will serve as an excellent guide to develop a comprehensive understanding.

**Improving Animal Welfare** Disha Publications

Modern agriculture faces many challenges, most crucially food security and the need for sustainable farming systems. Decisions and actions in the agricultural sector come from government and stakeholder policies and on-farm decision-making. This comprehensive monograph provides a perspective on the current state of agri-environmental management in Europe from both a policy and practical perspective. Some of the issues in agriculture discussed are climate change and air pollution, biodiversity, water use and quality, pesticides, pathogens, flooding and drought, energy resources, land use, soil composition, nutrients, livestock, cropping, habitat management and cultural considerations. These important issues form the framework of the book, with each issue discussed in the context of its history, and asking the questions 'why is it an issue', 'what is the current scientific understanding regarding it' and 'how has policy shaped it'. The book takes an integrated approach by not just examining these issues separately, but examining the whole system in which these problems are manifested. At the end, technologies and solutions which are currently being developed and could be used in the future are discussed and the horizon scanned for future environmental challenges. Agri-environmental Management in Europe is an authoritative source for both undergraduate and post-graduate studies that consider the agri-environmental challenges society faces.

**Animal Husbandry** Arihant Publications India limited

Questions are the root cause of success. The more new & authentic questions you will have, the more new & authentic knowledge you will have. Considering this fact, the Department of Education in Science & Mathematics (DESM) with an aim to improve the quality of teaching/learning process in schools has made an attempt to develop resource books of Exemplar Problems in different subjects

at secondary and higher-secondary stage. These specialized resource books named NCERT Exemplars are not meant to serve merely as question banks for examinations but are primarily meant to discourage rote learning. The first and the only books of its kind by Arihant Publications is an attempt at providing comprehensive guide to NCERT Exemplar Problems-Solutions for Class 6th to 12th. The present book for Class 8th Science contains different types of questions of varying difficulty level. Also detailed explanation for comprehensive understanding has been given for all objective and subjective problems. The present book has been divided into 18 chapters namely Crop Production & Management, Microorganisms: Friend & Foe, Synthetic Fibres & Plastics, Materials: Metals & Non-Metals, Coal & Petroleum, Combustion & Flame, Conservation of Plants & Animals, Cell: Structure & Functions, Reproduction in Animals, Reaching the Age of Adolescence, Force & Pressure, Friction, Sound, Chemical Effects of Electric Current, Some Natural Phenomena, Light, Stars & Solar System and Pollution of Air & Water. The problems provided in the book will test comprehension, information recall, analytical thinking and problem-solving ability, creativity and speculative ability. Detailed explanation has been provided for all objective and subjective problems covered in the book. The book will also be highly useful for school examinations and to build foundation for entrance examinations. As the book contains detailed and comprehensive solutions for NCERT Exemplar problems for Class 8th Science, it for sure will act as a catalyst in helping discourage rote learning.
