This textbook, originally by D. Annand and H. Dauderis, was intended for a first course in introductory financial accounting. It focuses on core introductory financial accounting topics that match pre-requisite requirements for students advancing to Intermediate Financial Accounting. A

corporate approach is utilized versus beginning with a sole proprietorship emphasis and then converting to a corporate approach; this consistency throughout the book reduces confusion for the introductory student. This most recent revision by D. Marchand converted the text from IFRS to reflect the Generally Accepted Accounting Principles of the United States (U.S. GAAP).

Lo/Fisher is praised for its readability and conversational writing style that helps students better understand difficult concepts in Accounting.

Lo/Fisher presents the how and why of reporting accounting information from within an easily-understood theoretical framework. Lo/Fisher has a clean layout that engages the reader with a clear writing style using plain English. This text is built on the current International Financial Reporting Standards (IFRS) and incorporates Accounting Standards for Private Enterprise (ASPE) where appropriate. Our philosophy is that when students understand the current standards, they will be able to analyze and interpret changes in the future. As a small business owner, knowing where your money comes from and where it goes is vital to your success. As a student of accounting, understanding debits and credits is the basis of all your further study. Wouldn't it be helpful to have a simple primer on these lessons, written in plain English? In *Easy Accounting*, practicing accountant, teacher, and author Becky Egan demystifies and simplifies the accounting process, clearly articulating the basics before gently adding layers to build on this knowledge. With more than 10 years' experience training clients, Egan holds your hand in *Easy Accounting* for the whole journey, from creating Balance Sheets and Income Statements to more advanced topics such as Depreciation, Mezzanine Accounts, and Inventory Management. These lessons are then reinforced with exercises, examples, and, helpfully, the answers. Egan loves Accounting - her love for the subject shines through in her engaging and easy style - and the financial acumen and freedom it bestows to its disciples. You will be inspired by your own financial know-how, which is of course the big goal. But you will also be amazed at the therapeutic benefits - and satisfaction - to be gleaned from balancing the dollars and cents. To sum up in Egan's words: "Realize, that when your books are balanced, every debit matches a credit, the Assets equal the Liabilities and Equity, and there is a harmony in the universe. How many other areas in your life tie out this neatly?"

An innovative new valuation framework with truly useful economic indicators *The End of Accounting and the Path Forward for Investors and Managers* shows how the ubiquitous financial reports have become useless in capital market decisions and lays out an actionable alternative. Based on a comprehensive, large-sample empirical analysis, this book reports financial documents' continuous deterioration in relevance to investors' decisions. An enlightening discussion details the reasons why accounting is

losing relevance in today's market, backed by numerous examples with real-world impact. Beyond simply identifying the problem, this report offers a solution—the Value Creation Report—and demonstrates its utility in key industries. New indicators focus on strategy and execution to identify and evaluate a company's true value-creating resources for a more up-to-date approach to critical investment decision-making. While entire industries have come to rely on financial reports for vital information, these documents are flawed and insufficient when it comes to the way investors and lenders work in the current economic climate. This book demonstrates an alternative, giving you a new framework for more informed decision making.

Discover a new, comprehensive system of economic indicators Focus on strategic, value-creating resources in company valuation Learn how traditional financial documents are quickly losing their utility Find a path forward with actionable, up-to-date information Major corporate decisions, such as restructuring and M&A, are predicated on financial indicators of profitability and asset/liabilities values. These documents move mountains, so what happens if they're based on faulty indicators that fail to show the true value of the company? *The End of Accounting and the Path Forward for Investors and Managers* shows you the reality and offers a new blueprint for more accurate valuation.
