Solutions 1.1– 1.4 7 Chapter 1 Pattern Recognition 1.1 Substituting  
(1.1) into (1.2) and then differentiating with respect to  $w_i$  we obtain  $XN$   
 $n=1 \sum_{j=0}^M w_{jx} j^n \xi = 0$ . (1) Re-arranging terms then gives the  
required result. 1.4 We are often interested in finding the most  
probable value for some quantity. In

Likewise, he is forthcoming in critically evaluating techniques.

Although this book is called an “introduction,” it is neither easy  
nor a tutorial. The author developed it for use in a graduate-level  
course in statistical pattern recognition. A good undergraduate  
background in statistics, linear algebra, and matrices is essential.

design of pattern recognition machines is still in its infancy. In the  
30’s R.A. Fisher laid out the mathematical principles of statistical  
Pattern Recognition which is one of the most principled ways to  
cope with the problem. A real world example will elucidate the  
principles of statistical pattern recognition at work:

Introduction. Pattern recognition techniques are used to automatically  
classify physical objects (handwritten characters, tissue samples, faces) or  
abstract multidimensional patterns ( $n$  points in  $d$  dimensions) into known or  
possibly unknown number of categories. A number of commercial pattern  
recognition systems are available for character recognition, signature  
recognition, document ...
