Variant Configuration with SAP SAP PRESS

In this IBM® Redbooks® publication, we give an overview of different data management topics related to a typical SAP® data center. The intrinsic functionality of SAP is not designed to completely handle all the tasks of a data center by itself, but the SAP system offers several interface possibilities to attach external tools to it to accomplish this task We explain SAP basic concepts and the issues with SAP data management. We introduce Tivoli® Storage Manager and all of its products that are

related to SAP data management. We provide some comparison between database backup and recovery tools. Finally, we discuss data archiving using IBM DB2® CommonStore for SAP, and discuss high availability requirements and disaster recovery considerations. The second part of this book discusses a practical implementation of SAP backup and recovery with Tivoli Storage Manager. We implement this setup on two separate SAP systems: one running DB2 and the other running Oracle® database. We also implement LAN-free backup and FlashCopy® scenarios. In the sample implementation section, we show many different tasks, such as backup and restore, database recovery, backup monitoring, and tuning. We also cover some advanced backup/availability considerations, such as split mirror backup and standby databases. This book helps individuals that operate an SAP environment to devise a strategy for a sound and comprehensive data backup solution using the

IBM Tivoli Storage Management product family.

Ce travail de diplôme est relatif à SAP Solution Manager, son rôle au sein d'un paysage de systèmes SAP et une présentation de la configuration de ses fonctions relatives à la surveillance des systèmes et au support. ARIS Platform, suite d'utilitaires développée par IDS Scheer pour l'excellence dans la gestion des processus métiers, est également présentée et mise en lien avec SAP Solution Manager. Le travail a été réalisé en collaboration avec le Centre de compétences SAP de la HES-SO Valais et suivi par le Prof. Dr. Werner Maier. Messieurs Olivier Tosi et Ivan Schnyder, assistants, m'ont également apporté leur aide. Le document final se décompose en deux parties principales. Une partie théorique et une partie pratique. La partie théorique comprend les éléments suivants : - Présentation du Centre de compétence SAP de la HES-SO Valais - Présentation de l'entreprise SAP - Présentation du support offert par SAP - Présentation de SAP Solution Manager - Présentation de la méthodologie ITIL - Présentation d'ARIS La partie pratique relative à SAP Solution Manager présente à l'aide de captures d'écran les éléments suivants : - Configuration de la surveillance centralisée des systèmes (System

Monitoring) - Planification et exécution centralisée des tâches d'administration (Central System Administration) - Configuration et génération automatique de rapports EarlyWatch Alerts - Configuration et génération automatique de rapports de niveau de service (Service Level Reporting) - Création, affichage et surveillance de processus métiers (Business Process Monitoring) - Implémentation du support à l'utilisateur centralisé de base et analyse et configuration des améliorations possibles (Service Desk) Concernant ARIS, le scénario implique la création d'un processus métier au sein de SAP Solution Manager, puis son transfert vers ARIS Business Architect for SAP NetWeaver 7.0 sous forme de schéma EPC. Ensuite, ce processus peut être modifié et synchronisé à nouveau avec SAP Solution Manager.

Throughout the world, high-profile large organizations (aerospace and defense, automotive, banking, chemicals, financial service providers, healthcare, high tech, insurance, oil and gas, pharmaceuticals, retail, telecommunications, and utilities) and governments are using SAP software to process their most mission-critical, highly sensitive data. With more than 100,000 installations, SAP is the world's largest enterprise software company and the world's third largest independent software supplier overall. Despite this widespread use, there have been very few books written on SAP implementation and security, despite a great deal of interest. (There are 220,000 members in an on-line SAP 'community' seeking information, ideas and tools on the IT Toolbox Website alone.) Managing SAP user authentication and authorizations is becoming more complex than ever, as there are more and more SAP products involved that have very different access issues. It's a complex area that requires focused expertise. This book is designed for these network and systems administrator who deal with the complexity of having to make judgmental decisions regarding enormously complicated and technical data in the SAP landscape, as well as pay attention to new compliance rules and security regulations. Most SAP users experience significant challenges when trying to manage and mitigate the risks in existing or new security solutions and usually end up facing repetitive, expensive re-work and perpetuated compliance challenges. This book is designed to help them properly and efficiently manage these challenges on an ongoing basis. It aims to remove the

'Black Box' mystique that surrounds SAP security. * The most comprehensive coverage of the essentials of SAP security currently available: risk and control management, identity and access management, data protection and privacy, corporate governance, legal and regulatory compliance. * This book contains information about SAP security that is not available anywhere else to help the reader avoid the "gotchas" that may leave them vulnerable during times of upgrade or other system changes *Companion Web site provides custom SAP scripts, which readers can download to install, configure and troubleshoot SAP.
