This unique tool provides a fresh approach to construction scheduling by focusing on ways in which the Critical Path Method (CPM) can be used to answer the important questions that arise on virtually every construction project. Critical Path Method (CPM) Tutor for Construction Planning and Scheduling helps commercial contractors meet today's ever-increasing demands to improve operational efficiency and increase profitability. The construction schedule is heavily dependent upon the skill of the practitioner and responsible participants, and one which greatly impacts the efficiency, cost, and overall success or failure of a project. This book explains the practical application of the CPM, the most widely used and taught technique for construction planning and scheduling. You'll be guided through each step of the CPM process—from planning and communication to deciding payment and/or claims. Practitioners and students will quickly understand both the mechanics and the use of the CPM. Contractors will be able to apply this knowledge to plan their work more completely, better

communicate their plans, accurately evaluate the impact of delays, and make better on-the-spot decisions. Features real-world construction examples and worked problems Describes how to measure on-site/field productivity and address potential issues Shows how to effectively communicate progress, targets, and requests with subcontractors and stakeholders

How the Politics of Literacy Shape Thinking in the Classroom Springer Science & Business Media

This expanded twelfth edition of the bestselling guide to style is based on the Economist's own updated house style manual, and is an invaluable companion for everyone who wants to communicate with the clarity, style and precision for which the Economist is renowned. As the introduction says, 'clarity of writing usually follows clarity of thought.' The Economist Style Guide gives general advice on writing, points out common errors and clichés, offers guidance on consistent use of punctuation, abbreviations and capital letters, and contains an exhaustive range of reference material - covering everything from accountancy ratios and stock market indices to laws of nature and science. Some of the numerous useful rules and common mistakes pointed out in the guide include: *Which informs, that defines. This is the house that Jack built. But: This house, which Jack built, is now falling down. Discreet means circumspect or prudent; discrete means separate or distinct. Remember that "Questions are never indiscreet. Answers sometimes are" (Oscar Wilde). Flaunt means display, flout means disdain. If you flout this distinction you will flaunt your ignorance Forgo means do without; forego means go before. Fortuitous means accidental, not fortunate or well-timed. Times: Take care. Three times more than X is four times as much as X. Full stops: Use plenty. They keep sentences short. This helps the reader.

Anthropology is the study of all humans in all times in all places. But it is so much more than that. "Anthropology requires strength, valor, and courage," Nancy Scheper-Hughes noted. "Pierre Bourdieu called anthropology a combat sport, an extreme sport as well as a tough and rigorous discipline. ... It teaches students not to be afraid of getting one's hands dirty, to get down in the dirt, and to commit yourself, body and mind. Susan Sontag called anthropology a "heroic" profession." What is the payoff for this heroic journey? You will find ideas that can carry you across rivers of doubt and over mountains of fear to find the light and life of places forgotten. Real anthropology cannot be contained in a book. You have to go out and feel the world's jagged edges, wipe its dust from your brow, and at times, leave your blood in its soil. In this unique book, Dr. Michael Wesch shares many of his own adventures of being an anthropologist and what the science of human beings can tell us about the art of being human. This special first draft edition is a loose framework for more and more complete future chapters and writings. It serves as a companion to anth101.com, a free and open resource for instructors of cultural anthropology. This 2018 text is a revision of the "first draft edition" from 2017 and includes 7 new chapters.

The Revolutionary Program to Restore the Body's Natural Ability to Heal Itself W. W. Norton & Company

An exciting guide to, and celebration of, the Whitney Museum and its outstanding collection of American art This all-new handbook, a fresh look at the Whitney Museum of American Art's collection, highlights the museum's extraordinary holdings and its fascinating history. Featuring iconic pieces by artists such as Calder, Hopper, Johns, O'Keeffe, and Warhol--as well as numerous works by under-recognized individuals--this is not only a guide to the Whitney's collection, but also a remarkable primer on modern and contemporary American art. Beautifully illustrated with abundant new photography, the book pairs scholarly entries on 350 artists with images of some of their most significant works. The museum's history and the evolution of its collection, including the Whitney's important distinction as one of the few American museums founded by an artist, and the notion of "American" in relation to the collection, are covered in two short essays. Published to coincide with the Whitney's highly anticipated move to a new facility in downtown New York in the spring of 2015, this book celebrates the museum's storied past and vibrant present as it looks ahead to its future.

The 9/11 Commission Report Harper Collins

The winners of the Nobel Prize show how economics, when done right, can help us solve the thorniest social and political problems of our day. Figuring out how to deal with today's critical economic problems is perhaps the great challenge of our time. Much greater than space travel or perhaps even the next revolutionary medical breakthrough, what is at stake is the whole idea of the good life as we have known it. Immigration and inequality, globalization and technological disruption, slowing growth and accelerating climate change--these are sources of great anxiety across the world, from New Delhi and Dakar to Paris and Washington, DC. The resources to address these challenges are there--what we lack are ideas that will help us jump the wall of disagreement and distrust that divides us. If we succeed, history will remember our era with gratitude; if we fail, the potential losses are incalculable. In this revolutionary book, renowned MIT economists Abhijit V. Banerjee and Esther Duflo take on this challenge, building on cutting-edge research in economics explained with lucidity and grace. Original, provocative, and urgent, *Good Economics for Hard Times* makes a persuasive case for an intelligent interventionism and a society built on compassion and respect. It is an extraordinary achievement, one that shines a light to help us appreciate and understand our precariously balanced world.

Basic Skills for Building Construction John Wiley & Sons

The book is devoted to structural issues, algorithms, and applications of resource allocation problems in project management. Special emphasis is given to a unifying framework within which a large variety of project scheduling problems can be treated. Those problems involve general temporal constraints among project activities, different types of scarce resources, and a broad class of regular and nonregular objective functions ranging from time-based and financial to resource levelling functions. The diversity of the models proposed allows for covering many features arising in scheduling applications beyond the field of project management such as short-term production planning in the manufacturing or process industries.

The Standard for Portfolio Management The Economist

The primary focus of this text is to provide a bridge for students between the academic world and the real world. This bridge is built through an understanding of what is law, how law is created, how law affects almost every activity of human conduct, and how legal institutions operate. Intended mainly for architectural and engineering students, but increasingly for those in business schools and law schools, this text

features a clear, concise, and jargon-free presentation. It probes beneath the surface of legal rules and uncovers why these rules developed as they did, outlines arguments for and against these rules, and examines how they work in practice. Updated with the most recent developments in the legal aspects of architectural, engineering, and the construction processes, this text is also a valuable reference for practitioners and has been cited in over twenty-five court decisions. Business Analytics: Data Analysis & Decision Making Rand Corporation

PV power plant integration into the grid has been a relevant topic of interest over the last years. Policies supported by governments, technology maturity, favorable incentives, and cost decreasing have significantly promoted the integration of PV power plants into power systems at the transmission and distribution levels. Nevertheless, some barriers remain in terms of forecasting generation, grid reliability, and power quality, which must be overcome for the massive PV integration into future power systems. Additionally, the ancillary services provided by these generation units are increasingly required by different agents to facilitate grid operation under a high proportion of renewables. Topics of interest for this Special Issue include the following areas: large-scale PV power plants, energy policies related to PV power plants, grid integration and interaction, PV power plant modeling, monitoring and case studies, communication systems for PV power plants integration, economic analyses, PV inverters and sizing analyses, new trends in PV technologies, and reviews.
