when it comes to secure a seat  
in one of the IITs. The  
student must develop skills to  
translate knowledge into  
performance on the JEE  
(Advanced) examination  
day. We have observed that  
many talented students fail in  
JEE (Advanced) in spite of  
having talent, capability, and  
a strong will to succeed. Due  
to lack of confidence, poor  
examination temperament &  
time management, the  
insufficient practice of taking  
an exam in actual  
examination conditions. To  
overcome this, a student  
should do sufficient practice  
by taking similar tests several  
times before the FINAL exam  
so that student develops all  
requisite competitive skills to  
get success in the final  
examination. With this

National Best Seller From the best-selling author and Pulitzer Prize winner, a powerful nonfiction debut—an “ honest, engaging, and very moving account of a writer searching for herself in words. ” —Kirkus Reviews (starred) In Other Words is a revelation. It is at heart a love story—of a long and sometimes difficult courtship, and a passion that verges on obsession: that of a writer for another language. For Jhumpa Lahiri, that love was for Italian, which first captivated and capsized her during a trip to Florence after college. Although Lahiri studied Italian for many years afterward, true mastery always eluded her. Seeking full immersion, she decides to move

to Rome with her family, for “ a trial by fire, a sort of baptism ” into a new language and world. There, she begins to read, and to write—initially in her journal—solely in Italian. In Other Words, an autobiographical work written in Italian, investigates the process of learning to express oneself in another language, and describes the journey of a writer seeking a new voice. Presented in a dual-language format, this is a wholly original book about exile, linguistic and otherwise, written with an intensity and clarity not seen since Vladimir Nabokov: a startling act of self-reflection and a provocative exploration of belonging and reinvention.

An electrifying biography of one of the most extraordinary scientists of the twentieth century and the world he made. The smartphones in our pockets and computers like brains. The vagaries of game theory and evolutionary biology. Nuclear weapons and self-replicating spacecrafts. All bear the fingerprints of one remarkable, yet largely overlooked, man: John

---

von Neumann. Born in Budapest at the turn of the century, von Neumann is one of the most influential scientists to have ever lived. A child prodigy, he mastered calculus by the age of eight, and in high school made lasting contributions to mathematics. In Germany, where he helped lay the foundations of quantum mechanics, and later at Princeton, von Neumann's colleagues believed he had the fastest brain on the planet—bar none. He was instrumental in the Manhattan Project and the design of the atom bomb; he helped formulate the bedrock of Cold War geopolitics and modern economic theory; he created the first ever programmable digital computer; he prophesized the potential of nanotechnology; and, from his deathbed, he expounded on the limits of brains and computers—and how they might be overcome. Taking us on an astonishing journey, Ananyo Bhattacharya explores how a combination of genius and unique historical circumstance allowed a single man to sweep through a stunningly diverse array of fields, sparking revolutions wherever he went. The Man from the Future is an insightful and thrilling intellectual biography of the visionary thinker who shaped our century.
