From the dawn of the early modern period around 1400 until the eighteenth century, Latin was still the European language and its influence extended as far as Asia and the Americas. At the same time, the production of Latin writing exploded thanks to book printing and new literary and cultural dynamics. Latin also entered into a complex interplay with the rising vernacular languages. This Handbook gives an accessible survey of the main genres, contexts, and regions of Neo-Latin, as we have come to call Latin writing composed in the wake of Petrarch (1304-74). Its emphasis is on the period of Neo-Latin's greatest cultural relevance, from the fifteenth to the eighteenth centuries. Its chapters, written by specialists in the field, present individual methodologies and focuses while retaining an introductory character. The Handbook will be valuable to all readers wanting to orientate themselves in the immense ocean of Neo-Latin literature and culture. It will be particularly helpful for those working on early modern languages and literatures as well as to classicists working on the culture of ancient Rome, its early modern reception and the shifting characteristics of post-classical Latin language and literature. Political, social, cultural and intellectual historians will find much relevant material in the Handbook, and it will provide a rich range of material to scholars researching the history of their respective geographical areas of interest.

The early modern and modern cultural world in the West would be unthinkable without Petrarch and Boccaccio. Despite this fact, there is still no scholarly contribution entirely devoted to analysing their intellectual revolution. Internationally renowned scholars are invited to discuss and rethink the historical, intellectual, and literary roles of Petrarch and Boccaccio between the great model of Dante's encyclopedia and the ideas of a double or multifaceted culture in the era of Italian Renaissance Humanism. In his lyrical poems and Latin treatises, Petrarch created a cultural pattern that was both Christian and Classical, exercising immense influence on the Western World in the centuries to come. Boccaccio translated this pattern into his own vernacular narratives and erudite works, ultimately claiming as his own achievement the reconstructed unity of the Ancient Greek and Latin world in his contemporary age. The volume reconsiders Petrarch's and Boccaccio's heritages from different perspectives (philosophy, theology, history, philology, paleography, literature, theory), and investigates how these heritages shaped the cultural transition between the end of the Middle Ages and the early modern era, as well as European identity.

A Zen poem is nothing other than an expression of the enlightened mind, a handful of simple words that disappear beneath the moment of insight to which it bears witness. Poetry has been an essential aid to Zen Buddhist practice from the dawn of Zen—and Zen has also had a profound influence on the secular poetry of the countries in which it has flourished. Here, two of America's most renowned poets and translators provide an overview of Zen poetry from China and Japan in all its rich variety, from the earliest days to the twentieth century. Included are works by Lao Tzu, Han Shan, Li Po, Dogen Kigen, Saigyō, Bashō, Chiao Jan, Yuan Mei, Ryōkan, and many others. Hamill and Seaton provide illuminating introductions to the Chinese and Japanese sections that set the poets and their work in historical and philosophical context. Short biographies of the poets are also included.

The purpose of this volume is to: (1) establish the importance of music—especially in Luther's early life, in his education in the schools, and in his life in the monastery—in shaping his understanding of the role of music in the Christian life; (2) show how Luther's developing understanding of music in Christian life and worship led him to a practical and many-faceted involvement in a variety of music's aspects; (3) bring into sharp relief several distinct paradigms, or patterns of thought, that dominated Luther's theological understanding of the role of music in the church's life and ministry.

Horace's Satires owe debts of influence to a wide range of genres and authors, including, as this study demonstrates, the moral tradition of Epicureanism. Focusing on the philosopher Philodemus of Gadara, it argues that the central concerns of his work lie at the heart of the poet's criticisms of Roman society and its shortcomings.

The 17th century was the century of the organ in much the same way the 19th century was the century of the piano. Almost without exception, the major composers of the century wrote for the instrument, and most of them were practicing organists themselves. This historical book surveys, analyzes, and discusses the major national styles of 17th century European organ music. Due to the extraordinarily extensive body of literature produced during this 100-year period, this text includes 350 musical examples to illustrate the various styles. The book also includes brief discussions of the various national styles of organ building, an appendix about the various notational methods used in the 17th century, and a chapter on Spain and Portugal written by Andre Lash, an expert on the subject.
