The geopolitical landscape of China-Africa relations has been overlooked during the G8's purported 'Year of Africa', which generated debate in the build-up to the China-Africa Summit in Beijing in 2006. This book offers surveys of China's return to Africa, examining what this relationship holds for diplomacy, trade and development.

Rediscovering the Secrets to Creating Lasting Value Createspace Independent Publishing Platform

Over the concluding decades of the twentieth century, the historic preservation community increasingly turned its attention to modern buildings, including bungalows from the 1930s, gas stations and diners from the 1940s, and office buildings and architectural homes from the 1950s. Conservation efforts, however, were often hampered by a lack of technical information about the products used in these structures, and to fill this gap Twentieth-Century Building Materials was developed by the U.S. Department of the Interior ' s National Park Service and first published in 1995. Now, this invaluable guide is being reissued—with a new preface by the book ' s original editor. With more than 250 illustrations, including a full-color photographic essay, the volume remains an indispensable reference on the history and conservation of modern building materials. Thirty-seven essays written by

leading experts offer insights into the history, manufacturing processes, and uses of a wide range of materials, including glass block, aluminum, plywood, linoleum, and gypsum board. Readers will also learn about how these materials perform over time and discover valuable conservation and repair techniques. Bibliographies and sources for further research complete the volume. The book is intended for a wide range of conservation professionals including architects, engineers, conservators, and material scientists engaged in the conservation of modern buildings, as well as scholars in related disciplines. Edited by Harvard Business School professor Jay W. Lorsch, the preeminent authority on corporate boards, this book gathers the leading voices from business and academia to address the challenges of governance in the 21st century. We are at a crucial juncture in the evolution of business and the economy. We must now reshape the structures and practices of business leadership to avoid going down the same path again. To a large

extent this is a question of governance and the role of corporate boards, to help us wrestle with critical issues like CEO performance and succession, compensation, and forward-looking strategy. In *The Future of Boards*, governance sage Jay Lorsch has gathered thought leaders and some of the most experienced voices at Harvard Business School to describe the moment we are in, identify and analyze the salient issues, and chart a course for the future. Articles include Bill George on how boardroom conflicts can be understood and managed; Krishna Palepu on how directors can gain the knowledge necessary to effectively oversee strategy; Lorsch himself and colleague Rakesh Khurana on how boards can set reasonable compensation while still motivating top talent; and Ken Merchant and Kat Pick on group pathologies in the boardroom and how to overcome them. *The Future of*

Boards will be must reading for CEOs, business and industry leaders, policymakers, and anyone involved in influencing and reshaping business in the 21st century.

"Beyond a brilliantly innovative toolkit for making social change, you will find here a 'deep structure' of activist patterns and principles that can unite millions in creating a new world beyond capitalist sociopathy and strong man despotism. Read this optimistic book for hope in grim times. " --Charles Derber, professor of sociology at Boston College and author of *Welcome to the Revolution: Universalizing Resistance for Social Justice and Democracy in Perilous Times* Based on face-to-face jam sessions held in Yangon, Amman, Harare, Dhaka, Kampala and Oaxaca, Beautiful

Rising includes stories of the Ugandan organizers who smuggled two yellow-painted pigs into parliament to protest corruption; the Burmese students' 360-mile long march against undemocratic and overly centralized education reforms; the Lebanese "honk at parliament" campaign against politicians who had clung to power long after their term had expired; and much more. Now, in one remarkable book, you can find the collective wisdom of more than a hundred grassroots organizers from five continents. It's everything you need for a DIY uprising of your own.

Building Materials Routledge Case Problems in Finance is a Harvard case course presenting real business situations that pose debatable alternative courses of action. The cases contain problems that can be narrowed but not always settled by the usual techniques of financial analysis. It will teach students to discover ways of thinking that are productive in handling different types of managerial problems intelligently. The cases are grouped by major topics: financial

analysis and forecasting, cost of capital, working capital management, capital budgeting, dividend policy, debt policy, financial execution, and mergers and restructuring.

The case focuses on two major challenges in deal making in emerging market economies deal sourcing and negotiation by focusing on a real (but disguised) Indian private equity deal. In 2010 Surya Tutoring was a fast-growing tutoring academy for high school students aspiring to gain admission to the prestigious Indian Institute of Technology (IIT). Surya's CEO, R. K. Sharma, wanted to expand its reach beyond Kota (a city of 1 million people in the northern state of Rajasthan), which had become the center of the IIT prep school industry and home to tens of thousands of students studying for the rigorous IIT entrance exam. Sharma knew there was vast untapped potential in the

teeming Indian metropolises of Mumbai, Chennai, Delhi, and Bangalore, as well as in foreign markets such as Dubai and Australia. Sharma had received term sheets from two private equity firms willing to finance Suryas expansion. By the end of the month he needed to decide which to accept: the offer from big bulge bracket fund Blackgem, or the one from ZenCap, a small Indian firm based in Mumbai with which he had become intimately familiar during the past year.

Over the last 10 years advances in the new field of neuromarketing have yielded a host of findings which defy common stereotypes about consumer behavior. Reason and emotions do not necessarily appear as opposing forces. Rather, they complement one another. Hence, it reveals that consumers utilize mental accounting processes different from those assumed in marketers' logical inferences when it comes to time, problems with rating and choosing, and in post-purchase evaluation. People are often guided by illusions not only when they perceive the outside world but also when planning their actions - and consumer behavior is no exception. Strengthening the control over their own desires and the ability to navigate the maze of data are crucial skills consumers can

gain to benefit themselves, marketers and the public. Understanding the mind of the consumer is the hardest task faced by business researchers. This book presents the first analytical perspective on the brain - and biometric studies which open a new frontier in market research.

A Social Strategy John Wiley & Sons

What people get out of social media—and how businesses can get more out of it Almost no one had heard of social media a decade ago, but today websites such as Facebook, Twitter, and LinkedIn have more than 1 billion users and account for almost 25 percent of Internet use. Practically overnight, social media seems indispensable to our lives—from friendship and dating to news and business. What makes social media so different from traditional media? Answering that question is the key to making social media work for

any business, argues Miko?aj Piskorski, one of the world's leading experts on the business of social media. In *A Social Strategy*, he provides the most convincing answer yet, one backed by original research, data, and case studies from companies such as Nike and American Express. Drawing on his analysis of proprietary data from social media sites, Piskorski argues that the secret of successful ones is that they allow people to fulfill social needs that either can't be met offline or can be met only at much greater cost. This insight provides the key to how companies can leverage social platforms to create a sustainable competitive advantage. Companies need to help people interact with each other before they will promote products to their friends or help companies in other ways. Done right, a company's social media should benefit customers and the firm.

Piskorski calls this "a social strategy," and he describes how companies such as Yelp and Zynga have done it. Groundbreaking and important, *A Social Strategy* provides not only a story- and data-driven explanation for the explosion of social media but also an invaluable, concrete road map for any company that wants to tap the marketing potential of this remarkable phenomenon.
