*Ten Years to Midnight* RainbowSA

A guide for mining the imagination to find powerful new ways to succeed. We need imagination now more than ever—to find new opportunities, rethink our businesses, and discover paths to growth. Yet too many companies have lost their ability to imagine. What is this mysterious capacity? How does imagination work? And how can organizations keep it alive and harness it in a systematic way? The Imagination Machine answers these questions and more. Drawing on the experience and insights of CEOs across several industries, as well as lessons from neuroscience, computer science, psychology, and philosophy, Martin Reeves of Boston Consulting Group's Henderson Institute and Jack Fuller, an expert in neuroscience, provide a fascinating look into the mechanics of imagination and lay out a process for creating ideas and bringing them to life: The Seduction: How to open yourself up to surprises The Idea: How to generate new ideas The Collision: How to rethink your idea based on real-world feedback The Epidemic: How to spread an evolving idea to others The New Ordinary: How to turn your novel idea into an accepted reality The Encore: How to repeat the process—again and again. Imagination is one of the least understood but most crucial ingredients of success. It's what makes the difference between an incremental change and the kinds of pivots and paradigm shifts that are essential to transformation—especially during a crisis. The Imagination Machine is the guide you need to demystify and operationalize this powerful human capacity, to inject new life into your company, and to head into unknown territory with the right tools at your disposal.

Consultants are playing an increasingly important role in the challenging world of nonprofits. Yet despite the demand for consulting services, nonprofit professionals often lack the necessary insight into how best to choose and work with a consultant. Nonprofit Consulting Essentials is a vital resource both for nonprofit leaders selecting and working with a consultant to guarantee the best use of their agency's resources, as well as consultants seeking a clear understanding of the more subtle dynamics that define a successful consulting practice working with social sector organizations. Drawing on Penelope Cagney's years of experience as a top-level nonprofit consultant, Nonprofit Consulting Essentials is filled with keen insights and in-depth interviews with the founders and leaders of influential consulting firms. Throughout the book, Cagney outlines a number of concrete consulting strategies that can serve as additional tools for managers seeking to resolve complex organizational development issues. Nonprofit Consulting Essentials also offers recommendations to nonprofit leaders and consultants to make their relationship the best it can be. Once a solid alliance is formed, they can tackle complex organizational challenges together, such as fundraising and marketing, governance and management, and organizational development. Cagney explores what it takes to make the consulting experience a success and covers vital topics such as: the key differences between consulting with nonprofits versus for-profit organizations, the primary areas of nonprofit consultation, making the consulting relationship work, the special ethical considerations of consulting in the sector, and understanding emerging trends in consulting. Nonprofit Consulting Essentials reviews the best practices and thinking in the nonprofit consulting practice, providing leaders and consultants a way to ensure a robust organization in the future.

*Engineering News-record*

"Shows how humans have brought us to the brink and how humanity can find solutions. I urge people to read with humility and the daring to act." —Harpal Singh, former Chair, Save the Children, India, and former Vice Chair, Save the Children International In conversations with people all over the world, from government officials and business leaders to taxi drivers and schoolteachers, Blair Sheppard, global leader for strategy and leadership at PwC, discovered they all had surprisingly similar concerns. In this prescient and pragmatic book, he and his team sum up these concerns in what they call the ADAPT framework: Asymmetry of wealth; Disruption wrought by the unexpected and often problematic consequences of technology; Age disparities--stresses caused by very young or very old populations in developed and emerging countries; Polarization as a symptom of the breakdown in global and national consensus; and loss of Trust in the institutions that underpin and stabilize society. These concerns are in turn precipitating four crises: a crisis of prosperity, a crisis of technology, a crisis of institutional legitimacy, and a crisis of leadership. Sheppard and his team analyze the complex roots of these crises--but they also offer solutions, albeit often seemingly counterintuitive ones. For example, in an era of globalization, we need to place a much greater emphasis on developing self-sustaining local economies. And as technology permeates our lives, we need computer scientists and engineers conversant with sociology and psychology and poets who can code. The authors argue persuasively that we have only a decade to make headway on these problems. But if

we tackle them now, thoughtfully, imaginatively, creatively, and energetically, in ten years we could be looking at a dawn instead of darkness.

*The Directory of Management Consultants, 1997-1998*

The Department of Defense (DoD) offers two markets for small business and small disadvantaged business seeking defense contracting and defense subcontracting opportunities. The first market encompasses prime contracting opportunities; the second market encompasses defense subcontracting opportunities. The publication exclusively addresses the defense subcontracting opportunities market. The DoD encourages small business and small disadvantaged business to enter the defense subcontracting market. By entering the market, goods and services flow to strengthen national security and the defense industrial base.
