This book brings to light an expanded

valuation toolkit, consisting of nine well-defined valuation principles hailing from the fields of economics, finance, accounting, taxation, and management. It ultimately argues that the "value functional" approach to business valuation avoids most of the shortcomings of its competitors, and more correctly matches the actual motivations and information set held by stakeholders. Much of what we know about corporate finance and mathematical finance derives from a narrow subset of firms: publicly traded corporations. The value functional approach can be readily applied to both large firms and companies that do not issue publicly traded stocks and bonds, cannot borrow without constraints, and often rely upon entrepreneurs to both finance and manage their operations. With historical side notes from an international set of sources and real-world exemplars that run throughout the text, this book is a future-facing resource for scholars in economics and finance, as well as the academically minded valuation practitioner.

While in the past a lot of attention has been paid to the business process side, this book now focusses information quality and valuation, master data and hierarchy management, business rules automation and business semantics as examples for business innovation opportunities. The book shows how to take "Business Concept Maps" further as information models for new IT paradigms. In a way this books redefines and extends business analysis towards solutions that can be described as business synthesis or business development. Business

 Praise for VALUE MAPS
 "Equivocator,
 Explorer,
 Experimenter,
 Exploiter,
 Extender—Chapter 12 might be well served as mandatory reading for all subject matter experts! SPARC is not a valuation, per se, but rather a separate consulting engagement that might interest a client—especially if that client is preparing for a sale or planning an exit

strategy. Miller has taken the good ideas from five disciplines and married them with value enhancement, creating what could become a very good 'add-on' consulting engagement. NACVA recommends, and looks forward to, further dialogue related to this new approach. This book will open your eyes to new opportunities."

–Parnell Black, MBA, CPA, CVA, Chief Executive Officer, National Association of Certified Valuation Analysts (NACVA) "No one illuminates the murky intersection where business strategy and private company value creation meet better than Warren Miller. Now he's focused his extensive professional training and real-world experience to produce this intellectually rich, yet down-to-earth and fun-to-read road map we can all use. Business owners and leaders, financial analysts, management consultants, wealth managers, CPAs, business brokers, private equity investors, business appraisers—no one should plan to increase the value of an enterprise without Value Maps in their passenger seat." –David Foster, CEO, Business Valuation Resources

"Private-equity analysts do not often come across scholarly and technical professional reading laced with laugh-out-loud moments! Yet this is exactly what one finds in Value Maps. Warren Miller's advice stems from his career as a finance executive, a CPA, a valuation analyst, and a 'recovering academic.' With pitch-perfect balance, Warren has created both a must-have professional reference guide and a best-practices road map designed to enhance the profitability of your client's business and your own—all in a very readable style with just a 'spoon-full of sugar.' Enjoy the read!" –Gary M. Karlitz, ASA, CPA, Partner-in-Charge, Valuation Services, Forensic Services, and Forensic Accounting, Citrin Cooperman & Company, LLP "Extremely readable, with numerous real-world examples—valuation specialists who don't read this book will soon be looking for a new profession. Miller takes the term 'valuation' to new levels, suggesting that appraisers can indeed add real value to their clients' businesses. Clients should demand that a valuation professional read this book before he or she will be hired." –Alfred M. King, Vice Chairman, Marshall & Stevens, Inc.
