Software systems for wireless and mobile communications are a key component in pervasive computing and are crucial for the materialization of easy-to-use and intelligent services that people can use ubiquitously. As indicated by its acronym (MOBILE Wireless MiddleWARE, Operating Systems, and Applications), these are the type of systems that form the topic of the MOBILWARE conferencing series. In particular, the goal of MOBILWARE is to provide a forum for researchers and practitioners to disseminate and discuss recent advances in software systems for wireless and mobile communications, ranging from work on communication middleware and operating systems to networking protocols and applications. For its second edition, held in Berlin in April 2009, the MOBILWARE Organizing Committee decided to add a full day of workshops on topics related to the main conference. Our goals were threefold: 1. Put together a high-quality workshop program consisting of a few focused workshops that would provide ample time for discussion, thus enabling presenters to quickly advance their work and workshop attendees to quickly get an idea of - going work in selected research areas. 2. Provide a more complete picture of ongoing work by not only including technical workshops, but also workshops on business and user aspects. We expected that this multi-viewpoint approach would be an added value as technology, business models, and user experiences are usually interrelated. 3. Create a breeding ground for submissions for MOBILWARE 2010 and beyond.

Praise for VALUE MAPS "Equivocator, Explorer, Experimenter, Exploiter, Extender—Chapter 12 might be well served as mandatory reading for all subject matter experts! SPARC is not a valuation, per se, but rather a separate consulting engagement that might interest a client—especially if that client is preparing for a sale or planning an exit strategy. Miller has taken the good ideas from five disciplines and married them with value enhancement, creating what could become a very good 'add-on' consulting engagement. NACVA recommends, and looks forward to, further dialogue related to this new approach. This book will open your eyes to new opportunities." —Parnell Black, MBA, CPA, CVA, Chief Executive Officer, National Association of Certified Valuation Analysts (NACVA) "No one illuminates the murky intersection where business strategy and private company value creation meet better than Warren Miller. Now he's focused his extensive professional training and real-world experience to produce this intellectually rich, yet down-to-earth and fun-to-read road map we can all use. Business owners and leaders, financial analysts, management consultants, wealth managers, CPAs, business brokers, private equity investors, business appraisers—no one should plan to increase the value of an enterprise without Value Maps in their passenger seat." —David Foster, CEO, Business Valuation Resources "Private-equity analysts do not often come across scholarly and technical professional reading laced with laugh-out-loud moments! Yet this is exactly what one finds in Value Maps. Warren Miller's advice stems from his career as a finance executive, a CPA, a valuation analyst, and a 'recovering academic.' With pitch-perfect balance, Warren has created both a must-have professional reference guide and a best-practices road map designed to enhance the profitability of your client's business and your own—all in a very readable style with just a 'spoon-full of sugar.' Enjoy the read!" —Gary M. Karlitz, ASA, CPA, Partner-in-Charge, Valuation Services, Forensic Services, and Forensic Accounting, Citrin Cooperman & Company, LLP "Extremely readable, with numerous real-world examples—valuation specialists who don't read this book will soon be looking for a new profession. Miller takes the term 'valuation' to new levels, suggesting that appraisers can indeed add real value to their clients' businesses. Clients should demand that a valuation professional read this book before he or she will be hired." —Alfred M. King, Vice Chairman, Marshall & Stevens, Inc.
