Since the late 1800s, Chicago has been a mecca for aviation. Chicago's Octave Chanute kept the skies filled with revolutionary gliders and his expertise in aeronautics contributed to the Wright Brothers' success. Chicago: City of Flight tells the story of aviation in the city with exciting chapters on early "birdmen," the birth of Chicago as a major airmail center, the spectacular chills and thrills of international airports and

airplane manufacturers, and airlines, such as United Airlines, that were born in the city. Later topics include the city's modern aerospace industry and an exclusive look at Chicago's Wright Redux project, members of which designed and manufactured a replica Wright flyer. They plan to fly it over the city on December 17, 2003, in celebration of 100 years of manned, powered flight.

This book represents a collection of papers presented at the 3rd World Congress on Integrated Computational Materials Engineering (ICME), a specialty conference organized by The Minerals, Metals & Materials Society (TMS), and held in Colorado Springs, Colorado, May 31 - June 4, 2015. This meeting convened ICME stakeholders to examine topics relevant to the global advancement of ICME as an engineering discipline. The 42 papers presented in these proceedings are divided into six sections: (1) ICME Applications; (2) ICME Building Blocks; (3) ICME Success Stories and Applications (4) Integration of ICME Building Blocks: Multi-scale Modeling; (5) Modeling, Data and Infrastructure Tools, and (6) Process Optimization. The papers represent a cross section of the presentations and discussions from the conference. These papers are intended to further the global implementation of ICME, broaden the variety of applications to which ICME is applied, and ultimately help industry design and produce new materials more efficiently and effectively.
