"... a curriculum geared toward helping students gain skills in consciously regulating their actions, which in turn leads to increased control and problem solving abilities. Using a cognitive behavior approach, the curriculum's learning activities are designed to help students recognize when they are in different states called "zones," with each of four zones represented by a different color. In the activities, students also learn how to use strategies or tools to stay in a zone or move from one to another. Students explore calming techniques, cognitive strategies, and sensory supports so they will have a toolbox of methods to use to move between zones. To deepen students' understanding of how to self-regulate, the lessons set out to teach students these skills: how to read others' facial expressions and recognize a broader range of emotions, perspective about how others see and react to their behavior, insight into events that trigger their less regulated states, and when and how to use tools and problem solving skills. The curriculum's learning activities are presented in 18 lessons. To reinforce the concepts being taught, each lesson includes probing questions to discuss and instructions for one or more learning activities. Many lessons offer extension activities and ways to adapt the activity for individual student needs. The curriculum also includes worksheets, other handouts, and visuals to display and share. These can be photocopied from this book or printed from the accompanying CD."--Publisher's website.

Aim High will help your students succeed as language learners in the classroom, with their homework and also in exams. How will it do this? It builds students vocabulary knowledge through a structured and progressive approach. What does this mean? There are over 50 active vocabulary items in each unit, including words from the Oxford 3000™. Students learn the meaning of new words but they also learn how and when to use them for themselves. And these are not just useful, everyday words. They're also introduced to expressions, idioms, phrasal verbs, and so on. Essential language for communicating well in English. As a teacher you'll want to help your students become autonomous learners. In Aim High there are lots of opportunities to prepare for this. In the Student's Book there's a 'Dictionary Corner', with exercises to help them towards learner autonomy. There's also a Literacy Corner to extend their vocabulary, focusing on selected readers of the right level. With the self-check and review boxes they can see how they're progressing for themselves. A Grammar Reference and Grammar Builder bring together all the grammar and vocabulary for the unit. These allow students to look back over grammar points and review what they have learned.
