Aim High will help your students succeed as language learners in the classroom, with their homework and also in exams. How will it do this? It builds students vocabulary knowledge through a structured and progressive approach. What does this mean? There are over 50 active vocabulary items in

each unit, including words from the Oxford 3000TM. Students learn the meaning of new words but they also learn how and when to use them for themselves. And these are not just useful, everyday words. They're also introduced to expressions, idioms, phrasal verbs, and so on. Essential language for communicating well in English. As a teacher you'll want to help your students become autonomous learners. In Aim High there are lots of opportunities to prepare for this. In the

Student's Book there's a 'Dictionary Corner', with exercises to help them towards learner autonomy. There's also a Literacy Corner to extend their vocabulary, focusing on selected readers of the right level. With the self-check and review boxes they can see how they're progressing for themselves. A Grammar Reference and Grammar Builder bring together all the grammar and vocabulary for the unit. These allow students to look back over grammar points and review what they have learned.

Astronomy is written in clear non-technical language, with the occasional touch of humor and a wide range of clarifying illustrations. It has many analogies drawn from everyday life to help non-science majors appreciate, on their own terms, what our

modern exploration of the universe is revealing. The book can be used for either a one-semester or two-semester introductory course (bear in mind, you can customize your version and include only those chapters or sections you will be teaching.) It is made available free of charge in electronic form (and low cost in printed form) to students around the world. If you have ever thrown up your hands in despair over the spiraling cost of astronomy

textbooks, you owe your students a good look at this one. Coverage and Scope Astronomy was written, updated, and reviewed by a broad range of astronomers and astronomy educators in a strong community effort. It is designed to meet scope and sequence requirements of introductory astronomy courses nationwide.
