Finance and accounting are at the heart of every business. Even if your role isn't directly focused on finance, your activities have financial implications. Understanding how money flows through your organization empowers you to make better decisions and identify profitable solutions. In this course, you'll learn about basic accounting concepts and principles and walk through the four-step accounting process. You'll also learn the fundamental principles of cash flow management and cover the four types of financial risk. It's not only the folks in the finance department who have to plan and monitor budgets. It's actually in everyone's best interest to have some basic budgetary knowledge. In this course, you'll learn about planning an effective budget, the stages involved, and different types of budgets. You'll also be introduced to Historical and Zero-based budgeting, variance analysis, capital budgeting, and performing budgeting calculations. To maintain your company's finances, you need a handle on the Income Statement, Cash Flow Statement, and Balance Sheet. And if you want to improve your company's finances, financial statements will hint at problems and possible solutions. This course will give you an overview of the three statements. You'll learn which items are included in each statement, how the statements are interlinked, and what each one indicates about your company's financial position. Financial analysis helps you understand your organization's financial standing, how it got there, and its strengths and weaknesses. In this course, you'll learn about the concept of the Time Value of Money as well as the methods for analyzing financial statements from a non-financial professional's perspective. These methods include using profitability ratios for analysis; analyzing Efficiency Ratios; Liquidity Ratio analysis; analyzing Solvency Ratios; and Vertical and Horizontal analysis.

Fundamental Managerial Accounting Concepts 7e Taxmann Publications Private Limited

"Fundamental Managerial Accounting Concepts" 4e by Edmonds/Edmonds/Tsay/Olds focuses on concepts that are isolated and introduced in a logical sequence. The authors intentionally limit the scope of the material to help students build a solid foundation of the most important concepts in managerial accounting.

"Fundamental Managerial Accounting Concepts" 4e is organized in a distinctive way, particularly in the first six chapters. The objective is to establish a coherent, integrative framework that enables students to build

knowledge in stepwise fashion. The authors' goal is for students to understand the underlying principles of accounting, not just memorize content.

SmartBook Access Card for Fundamental Financial Accounting Concepts 9th Edition McGraw-Hill/Irwin Financial Accounting provides a comprehensive coverage to course requirements of students appearing in the paper Financial Accounting at BCom, BCom (Hons) examinations of different Indian universities and Foundation Examination (NS) of the Institute of Company Secretaries of India. The book is divided into four sections: Section I explains the fundamental principles necessary for understanding the subject. It covers the entire accounting cycle—from recording of financial transactions to the preparation of final accounts. Section II deals with accounting problems related to certain specific types of business transactions. Section III deals with partnership accounts. Section IV provides suggested answers to recent examinations' questions.

Accounting Principles S. Chand Publishing Students are often overwhelmed by the amount of information presented in the introductory financial accounting course. By focusing on fundamental concepts in a logical sequence, students are able to fully comprehend the material rather than memorise seemingly unrelated terms and topics. The goal of Fundamental Financial Accounting Concepts is to enable students to understand how any given business event affects the financial statements. The "financial statements model" is a highly praised feature because it allows students to visualise the simultaneous impact of business events on all of the key financial statements (the income statement, the balance sheet, and the statement of cash flows).
