This volume explores the influence of professional service firms on public policy-making from a global perspective. Drawing on cases studies from around the

world, researchers from different disciplines—including sociology, political science, geography, anthropology, history, and management studies—examine how professional service firms have generated power in the policy-making process. The chapters further investigate the structure and organization of these firms and their relationship with public agencies. They discuss the impact of strategies, techniques and models

promoted by these firms on political decision-making. And they analyze how these firms have contributed to the formation of global policy-pipelines, facilitating the quick diffusion of policy ideas across time and space. Exposing how professional advisors can undermine democratic decision-making, the chapters in this book explore the potential for resistance and regulation of public-private relationships. Transcultural Communication Through Global Englishes

MacMillan

This is an open access book.

The start of the 21st century has seen the world shaken by protests, from the Arab Spring to the Yellow Vests, from the Occupy movement to the social uprisings in Latin America.

There are periods in history when large numbers of people have rebelled against the way things are, demanding change, such as in 1848, 1917, and 1968.

Today we are living in another time of outrage and discontent, a time that has already produced some of the largest protests in world history.

This book analyzes almost three thousand protests that occurred between 2006

and 2020 in 101 countries covering over 93 per cent of the world population. The study focuses on the major demands driving world protests, such as those for real democracy, jobs, public services, social protection, civil rights, global justice, and those against austerity and corruption. It also analyzes who was demonstrating in each protest; what protest methods they

used; who the protestors opposed; what was achieved; whether protests were repressed; and trends such as inequality and the rise of women ' s and radical right protests. The book concludes that the demands of protestors in most of the protests surveyed are in full accordance with human rights and internationally agreed-upon UN development goals. The

book calls for policy-makers to listen and act on these demands.
