- All major topics are

included—from calculating percentages to conducting a one-way ANOVA.

- Over 40 humorously illustrated, interactive guides give your students solid advice on study skills covering everything from how to get the most out of a statistics textbook to how to work with a tutor.
- The 64-page instructor's answer key shows all the steps in the solutions for the computational problems. This key makes it easy for you to start using the workbook right away.
