Introduction to Accounting Piatkus

In this companion to Urs Widmer's novel *My Mother's Lover*, the narrator is again the son who pieces together the fragments of his parents' stories. Since the age of twelve, Karl, the father, has observed the family tradition of recording his life in a single notebook, but

when his book is lost soon after his death, his son resolves to rewrite it. Here, we get to know Karl's friends--a collection of anti-fascist painters and architects known as Group 33. We learn of the early years of Karl's marriage and follow his military service as the Swiss fear a German invasion during World War II, his political activity for the Communist Party, and his brief career as a teacher. ? Widmer brilliantly combines family history and historical events to tell the story of a man more at home in the world of the imagination than in the real world, a father who grows on the reader, just as he grows on his son.

Governmental and Not-for-Profit Organizations,
13e is best suited for those professors whose

objective is to provide more concise coverage than what is available in larger texts. The main focus of this text is on the preparation of external financial statements which is a challenge for governmental reporting. The approach in this edition is similar to that used in practice. Specifically, day to day events are recorded at the fund level using the basis of accounting for fund financial statements.

Governmental activities are recorded using the modified accrual basis. The fund-basis statements are then used as input in the preparation of government-wide statements. The preparation of government-wide statements is presented in an Excel worksheet. NEW for the 13th edition is McGraw-Hill Connect, a digital teaching and learning environment that saves students and instructors time while improving performance over a variety of critical outcomes.

This book is intended to help readers to understand financial accounting and to see how it can be used in practice, particularly in the interpretation and management of company finances. It should appeal to future managers, rather than to those who want to become accountants. It is intended to be “user friendly”™ for those who are put off by conventional presentations of the subject based on arcane rules and procedures. Students from an arts background, for whom figures are

sometimes a painful necessity, will probably find that this is as good as it gets with accounting textbooks.
