This introductory text emphasises physical principles, rather than the mathematics. Each topic begins with a discussion of the physical characteristics of the motion or system. The mathematics is kept as clear as possible, and includes elegant mathematical descriptions where possible. Designed to provide a logical development of the subject, the book is

divided into two sections, vibrations followed by waves. A particular feature is the inclusion of many examples, frequently drawn from everyday life, along with more cutting-edge ones. Each chapter includes problems ranging in difficulty from simple to challenging and includes hints for solving problems. Numerous worked examples included throughout the book.

While there are many great research articles, good books, and provocative policy analyses related to the economics of education, these materials are often written to influence the policy process and not

necessarily for students with limited knowledge of the underlying policies and the economic framework. This textbook is intended to serve as a foundation for a broad-based course on the economics of education. Its goal is to provide an overview of economics of education research: to lay out the evidence as clearly as possible, note agreements, disagreements, and unresolved points in literature, and to help students develop the tools necessary to draw their own conclusions.

Applied Marketing is a concise product that provides the very latest examples of marketing techniques and campaigns from today's business world without compromising on traditional theories of marketing. Marketing is about decision making

and professors want material that will help students develop their critical thinking skills so they can think like a marketer and see that marketing is everywhere around them. Who better to develop such a product than a practitioner, Andrew Loos of Attack Marketing, and an academic, Daniel Padgett of Auburn University. Together these authors provide insights into what employers need, know the latest tools used by companies today and can help students smoothly move from the classroom to their careers. Applied Marketing connects traditional marketing with customer-perspective marketing, thus teaching students the value of allowing customers to feel more connected to the product, brand and company.

Management 9e McGraw-Hill Ryerson Accounting Information for Business Decisions is a business-focused introduction to Accounting for all students - not just those intending to be Accounting majors. Lead

students through the real-world business cycle and how accounting information informs decision-making. Departing from the traditional approach taken by other introductory accounting textbooks, students apply both managerial and financial approaches within the topics examined in each chapter, to see the direct impact that Managerial Accounting decisions make on the Financial Accounting processes (and vice versa). The conversational writing engages students in the theoretical content and how it applies to contemporary real-world scenarios. Students follow a retail coffee business in the relatable Cafe Revive running case study integrated into every chapter, to learn about applying accounting issues in the real world. Intermediate Accounting, 3e, by

Spiceland/Sepe/Tomassini will gain support in

traditional and technology-driven accounting

departments, especially those looking for a

more concise, decision-making text that

reinforces challenging concepts via CD-ROM.

The revision of this text is based around a

"Learning System." The revision of this

"Learning System" was built on improving the

clarity of the chapters, emphasizing more

decision-making in order to prepare students

for the changes taking place on the CPA exam,

acknowledging the diversity of students and

their learning styles by creating supplemental

materials to assure the success of every student,

and creating a consistent text and supplemental

package for both students and instructor's giving

us the best possible intermediate text on the

market. Returning to the Third edition is the

award winning "Coach" CD-ROM. The Coach

CD-ROM is a multimedia product integrating

audio and video clips, animated illustrations,

cases, and alternative reading material that

helps students comprehend some of the more

difficult topics associated with intermediate

accounting. Designed specifically for the

Spiceland text, instructors and students will find

these learning tools placed strategically

throughout the text. This is the most

comprehensive Learning System in

Intermediate Accounting. At only 1120 pages (300 pages less than the average intermediate accounting text), Spiceland/S/T has not sacrificed content for pages. Instead, the authors have created a very flexible text with a student friendly writing style that focuses on explaining not just how to apply a procedure, but why it's applied. Ethical Obligations and Decision-Making in Accounting gives students a robust ethical framework that is crucial for accountants in the post-Enron era. Incorporating the principles of the AICPA code and other systems of ethics, Mintz and Morris show accounting students how a commitment to ethics can enable accounting professionals to meet their ethical obligations both to investors and creditors. No other book so comprehensively examines the elements of the financial reporting system - including the ethics of the internal control environment and the effectiveness of board of director and audit committee oversight - that determine the ethical standard of the accounting process.

Applied Marketing, Loose-Leaf Thomson Specifically designed as an introduction to the exciting world of engineering, **ENGINEERING FUNDAMENTALS: AN INTRODUCTION TO ENGINEERING** encourages students to become engineers and prepares them with a solid foundation in the fundamental principles and physical laws. The book begins with a discovery of what engineers do as well as an inside look into the various areas of specialization. An explanation on good study habits and what it takes to succeed is included as well as an introduction to design and

problem solving, communication, and ethics.

Once this foundation is established, the book moves on to the basic physical concepts and laws that students will encounter regularly. The framework of this text teaches students that engineers apply physical and chemical laws and principles as well as mathematics to design, test, and supervise the production of millions of parts, products, and services that people use every day. By gaining problem solving skills and an understanding of fundamental principles, students are on their way to becoming analytical, detail-oriented, and creative engineers. From the creator of the popular website Ask a Manager and New York's work-advice columnist comes a witty, practical guide to 200 difficult professional conversations—featuring all-new advice! There's a reason Alison Green has been called “the Dear Abby of the work world.” Ten years as a workplace-advice columnist have taught her that people avoid awkward conversations in the office because they simply don't know what to say. Thankfully, Green does—and in this incredibly helpful book, she tackles the tough discussions you may need to have during your career. You'll learn what to say when • coworkers push their work on you—then take credit for it • you accidentally trash-talk someone in an email then hit “reply all” • you're being micromanaged—or not being managed at all •

you catch a colleague in a lie • your boss seems unhappy with your work • your cubemate's loud speakerphone is making you homicidal • you got drunk at the holiday party Praise for Ask a Manager "A must-read for anyone who works . . . [Alison Green's] advice boils down to the idea that you should be professional (even when others are not) and that communicating in a straightforward manner with candor and kindness will get you far, no matter where you work."—Booklist (starred review) "The author's friendly, warm, no-nonsense writing is a pleasure to read, and her advice can be widely applied to relationships in all areas of readers' lives. Ideal for anyone new to the job market or new to management, or anyone hoping to improve their work experience."—Library Journal (starred review) "I am a huge fan of Alison Green's Ask a Manager column. This book is even better. It teaches us how to deal with many of the most vexing big and little problems in our workplaces—and to do so with grace, confidence, and a sense of humor."—Robert Sutton, Stanford professor and author of The No Asshole Rule and The Asshole Survival Guide "Ask a Manager is the ultimate playbook for navigating the traditional workforce in a diplomatic but firm way."—Erin Lowry, author of Broke Millennial: Stop Scraping By and Get Your Financial Life Together

Just as bridges connect parts of Canada together, Canadian Income Taxation: Planning and Decision Making connects tax law and its application, to business and investment transactions and decision

making. The 2020-2021 Edition of Buckwold/Kitunen/Roman maintains its highly readable student friendly format and full coverage of the CPA competency map without compromising the planning content needed for professional exams. The changes to this edition continue to broaden the subject base and provide current updates, ensuring complete coverage of the taxation competencies in the 2020 Competency Map, issued in December 2019. A new online appendix covering Data Analytics as it relates to taxation has been added.
