### The Publishers' Trade List Annual Charles C Thomas Publisher

An introduction to the theory and practice of optometry in one succinct volume. From the fundamental science of vision to clinical techniques and the management of common ocular conditions, this book encompasses the essence of contemporary optometric practice. Now in full colour and featuring over 400 new illustrations, this popular text which will appeal to both students and practitioners wishing to keep up to date has been revised significantly. The new edition incorporates recent advances in technology and a complete overview of clinical procedures to improve and update everyday patient care. Contributions from well-known international experts deliver a broad perspective and understanding of

current optometric practice. A useful aid for students and the newly qualified practitioner, while providing a rapid reference guide for the more experienced clinician. - Comprehensive and logical coverage detailing the full spectrum of optometric practice in one volume. - Succinctly covers the basics of anatomy, physiology, pharmacology, investigative techniques and clinical management of common eye conditions to provide key topics likely to be met in clinical practice. - Discusses the full range of refractive correction, from spectacles and contact lenses to surgical treatment. - Includes chapters on the management of special populations, including paediatric, elderly, low vision and special needs patients. - Heavily illustrated throughout with key diagrams and images to support the text. - Complete restructuring of contents into three sections: basic sciences, clinical techniques and patient management. - Full colour throughout with over 400 illustrations. - Many new chapters reflecting the changes in optometric practice and technology over the last 20 years, including new imaging and diagnostic procedures and methods of ocular treatment and refractive correction. - Now includes internationally renowned authors from around the world. - Details a full range of refractive and management approaches for patient care.

*Government Reports Announcements & Index* Taylor & Francis

This handbook describes in detail different contemporary approaches to group work with children and adolescents. Further, this volume illustrates the application of these models to work with the youth of today, whether victims of trauma, adolescents struggling with LGBT

issues, or youth with varying common diagnoses such as autism spectrum disorders, depression, and anxiety. It offers chapters presenting a variety of clinical approaches written by experts in these approaches, from classic (play therapy and dialectical behavior therapy) to cutting-edge (attachment-based intervention, mindfulness, and sensorimotor psychotherapy). Because of its broad scope, the book is suitable for a wide audience, from students to first-time group leaders to seasoned practitioners.

*Title-author-company Index to Reports Published by the U.S. Department of the Interior, Office of Saline Water Through July 1972* SAGE Publications

Now fully revised and updated, *Textbook of Adult Emergency Medicine* provides clear and consistent coverage of this rapidly evolving specialty. Building on the success of previous editions, it covers all the major topics that present to the trainee doctor in the emergency department. It will also prove invaluable to the range of other professionals working in this setting - including nurse specialists and paramedics - who require concise, highly practical guidance, incorporating latest best practices and current guidelines. For the first time, this edition now comes with access to additional ancillary material, including practical procedure videos and self-assessment material. Updates throughout reflect latest practice developments, curricula requirements and essential guidelines. Key point boxes highlight topic 'essentials' as well as controversial areas of treatment. An expanded list of leading international contributors ensures comprehensive coverage and maximizes worldwide relevance. New and enhanced coverage of important and topical areas - including latest imaging in emergency medicine; organ donation; massive transfusion protocols; medico legal issues; patient safety and quality measures. All new accompanying electronic ancillary material, including procedure videos and self-assessment materials to check your understanding and aid exam preparation. Expansion of administration section - especially patient safety. New and enhanced coverage of important and topical areas - including latest imaging in emergency medicine; organ donation; massive transfusion protocols; medico legal issues; patient safety

### Books in Print Supplement

Official organ of the book trade of the United Kingdom.

### **National Union Catalog**

The primary objective of this book is to provide comprehensive descriptions and make comparative evaluations of each of the mental health systems of four Western, industrialized countries. The countries selected illustrate a continuum from a highly centralized and publicly financed, national health service in Great Britain to a predominantly decentralized and more privately financed market of mental health services in the United States. In between these two contrasting types are examples of national health services and insurance programs in Norway and Canada. Contributing experts from each country begin their chapters with an overview of the geographic, demographic, political, economic, and cultural contexts in which their mental health systems are situated. Thereafter, they (a) present national data to estimate the need for mental health services, (b) describe national mental health policies and programs designed to meet their population's need, (c) indicate how mental health services are organized and delivered, and (d) discuss how their system is financed and provided resources. A common chapter outline facilitates comparisons among all four systems on relevant evaluation criteria: (a) access and equity, (b) quality and efficacy, (c) cost and efficiency, (d) financing and fairness, (e) protection and participation, and (f) population relevance. In the final section of each chapter, the authors provide recommendations for improved performance of their mental health system. In the initial chapter, the editor provides an overview, introduces the four countries selected, and defines the evaluation criteria applied by all contributing authors. The final two chapters address convergence and divergence among the four systems and provide recommendations for improvement and for future comparative studies. The intended audience includes mental health policymakers, program administrators and managers;
