Studies of online public access catalog use have shown that failure rates of 40 percent are common, advanced features (series searches, Boolean searches, and call number browsing, etc.) aren't used heavily, and about 20 percent of all failed searches are due to misspellings and typographical errors. The emphasis of this work is on user behavior, rather than attitudes, wishes and comments. Problems with the use of online catalogs are identified, and potential solutions examined. Also included is a classified, annotated bibliography.

This book explores the evolution of products from the beginning idea through mass-production. Rather than prescribing a one-size-fits-all process, the authors explain

the theory behind product development and challenge readers to develop their own customized development process uniquely suited for their individual situation. In addition to theory, the book provides development case studies, exercises and self-evaluation criteria at the end of each chapter, and a product development reference that introduces a wide variety of design tools and methods. Class-tested for three consecutive years by hundreds of students in four different courses, the book is an ideal text for senior design classes in mechanical engineering and related disciplines as well as a reference for practicing engineers/product designers. Throughout the book, theoretical foundations necessary for understanding Electronic Commerce (EC) are presented, ranging from consumer behavior to the economic theory of competition.

Furthermore, this book presents the most current topics relating to EC as described by a diversified team of experts in a variety of fields, including a senior vice president of an e-commerce-related company. The authors provide website resources, numerous exercises, and extensive references to supplement the theoretical presentations. At the end of each chapter, a list of online resources with links to the websites is also provided. Additionally,

extensive, vivid examples from large corporations, small businesses from different industries, and services, governments, and nonprofit agencies from all over the world make concepts come alive in Electronic Commerce. These examples, which were collected by both academicians and practitioners, show the reader the capabilities of EC, its cost and justification, and the innovative ways corporations are using EC in their operations. In this edition (previous editions published by Pearson/Prentice Hall), the authors bring forth the latest trends in e-commerce, including social businesses, social networking, social collaboration, innovations, and mobility.

The Handheld Library: Mobile Technology and the Librarian IGI Global
Library Technology Reports October 2011 vol.47 no. 7 Libraries have entered a highly competitive marketplace for providing content to their constituents. Researchers are finding convenience in paying for material from highly accessible websites over assessing materials for free from a library. Web search engines and crowd-source content portals have shifted the value of a library dramatically. However, libraries have begun a transformation from the physical space and collections to the electronic medium. This issue of Library Technology Reports analyzes five different academic libraries to better understand why they have made an investment in a next-generation catalog and what the outcome of this investment has been.
