Headlines are filled with tragic stories of senseless murders and suicides that have resulted from child and teen bullying. As social networking and technology add to the ways that kids can be bullied, parents feel powerless against this insidious force that compels even "good" kids to participate in or enable bullying in schools, in extracurricular activities, online, and at home. The Essential Guide to Bullying brings together the wisdom and experience of two people who have witnessed bullying's causes and tragic effects. School social worker Cindy Miller teams with Cynthia Lowen, the co-creator of

Bully, to arm parents and teachers with the knowledge they need to: - Understand the societal and human forces that are causing bullying to escalate - Discover who is most at risk for being bullied, being a bully, or not helping a bullying victim - Target-proof their kids and teach them coping skills - Identify even the most covert bullying situations - Infiltrate the world of cyberbullying and head off its disastrous effects - Intervene to stop a bullying situation - Know what legal recourse they have to back up other anti-bullying efforts

But in *Girl Wars*, two experts explain not only how to prevent such behavior but also how to intervene should it happen, as well as overcome the culture that breeds it. Illustrated by compelling true stories from mothers and girls, the authors offer effective, easy-to-implement strategies that range from preventive to prescriptive, such as how to -Adopt a "help, don't hurt" strategy -Provide positive role models -Teach communication skills online and off -Stress assertiveness, not aggressiveness -Learn conflict resolution skills -Identify alternatives to bullying behavior With their combined experience in offering and evaluating programs that combat bullying, the authors show that girls not only want to help rather than hurt each other, they can

This book looks in depth at the emerging issue of cyber-bullying. In this increasingly digital world cyber-bullying has emerged as an electronic form of bullying that is difficult to monitor or supervise because it often occurs outside the physical school setting and outside school hours on home computers and personal phones. These web-based and mobile technologies are providing young people with what has been described as: 'an arsenal of weapons for social cruelty'. These emerging issues have created an urgent need for a practical book grounded in comprehensive

scholarship that addresses the policy-vacuum and provides practical educational responses to cyber-bullying. Written by one of the few experts on the topic Cyber-Bullying develops guidelines for teachers, head teachers and administrators regarding the extent of their obligations to prevent and reduce cyber-bullying. The book also highlights ways in which schools can network with parents, police, technology providers and community organizations to provide support systems for victims (and perpetrators) of cyber-bullying.

This book is packed with over 100 entertaining cartoons and illustrations, as well as hundreds of strategies and solutions to immediately prevent or stop bullying, harassment and abuse of our students and young adults in a safe, enjoyable way. Hundreds of unsettling statistics will be presented from reputable government agencies and university research studies to alert parents and teachers to the pervasiveness and severity of maltreatment of our students. It is happening everywhere: in the schools, after-school activities, colleges and universities, while dating, and even in our homes. Roughly 70% of students surveyed reported that their biggest concern at school is being bullied because it occurs so frequently and grievously! About 50% of our middle school girls and about 38% of the boys have reported being bullied multiple times at their schools recently. Over 54% of our young women between 15 and 34 years of age have reported being sexually assaulted or raped while at school or dating! The first chapters show parents how to avoid raising either a bully or a victim. There is an Anti-Bullying and Anti-Victim Questionnaire for parents to complete to determine if their children are exhibiting some of the signs of becoming a bully or a victim and how to correct it. There are several chapters written for students and young adults that teach them how to avoid being on the bully's radar; how to quickly and safely stop verbal teasing, insults, mean written notes, rumors, ostracism and cyberbullying. There are two chapters for educators about creating a warm, supportive school climate that should reduce all school bullying and prevent most hardcore bullies from assaulting our students or committing a mass shooting. Chapter ten is a crucial chapter that instructs our adolescent girls and young women how to avoid dangerous dating situations or the toxic male who could be controlling and/or abusive. This book is a 'Must Read' for all parents, students and educators!

The untold story of the root cause of America's education crisis--and the seemingly endless cycle of multigenerational poverty. It was only after years within the education reform movement that Natalie Wexler stumbled across a hidden explanation for our country's frustrating lack of progress when it comes to providing every child with a quality education. The problem wasn't one of the usual scapegoats: lazy teachers, shoddy facilities, lack of accountability. It was something no one was talking about: the elementary school curriculum's intense focus on decontextualized reading comprehension "skills" at the expense of actual knowledge. In the tradition of Dale Russakoff's *The Prize* and Dana Goldstein's *The Teacher Wars*, Wexler brings together history, research, and compelling characters to pull back the curtain on this fundamental flaw in our education system--one that fellow reformers, journalists, and policymakers have long overlooked, and of which the general public, including many parents, remains unaware. But *The Knowledge Gap* isn't just a story of what schools have gotten so wrong--it also follows innovative educators who are in the process of shedding their

deeply ingrained habits, and describes the rewards that have come along: students who are not only excited to learn but are also acquiring the knowledge and vocabulary that will enable them to succeed. If we truly want to fix our education system and unlock the potential of our neediest children, we have no choice but to pay attention.
