How Air Pollution is slowly Killing the World| Facts | Causes | Solutions | #WorldEnvironmentDay2018 ~~Drinking Nasty Swamp Water (to save the world)~~ pollution | National Geographic Society Recycling is one of the best solutions for land pollution. In fact, the European Union projects that their recycling rate target for the UK would have reached at least 50% by 2020. And

achieving the target just calls for the stepping up of recycling efforts in a bid to reduce the amount of waste being dumped into the landfills.

Finding solutions to Earth ' s pollution problems seems daunting, but we should remember that the international community has already rallied to phase out chemicals that had been depleting Earth ' s ozone layer, and the ozone layer has begun to recover. Positive change is always possible, even at the global scale.
