"All the sizzle, chaos, noise and scariness of war is clay in the hands of ace storyteller Lynch." -- Kirkus Reviews for the World War II series Discover the secret missions behind America's greatest conflicts. Fergus Frew thought he knew what to expect when he signed up with the Navy's demolitions team. But as the Korean War rages on, Fergus and his fellow divers -- AKA "frogmen" -- are tasked with more than just scouting mudflats. Soon they're planting mines. And sabotaging tunnels, bridges... and even fishing nets. Strangest of all, it falls to Fergus to transport a spy into the country -- and that means traveling far from Navy-controlled waters. But frogmen are amphibious. And Fergus may not realize it, but he's in a position to change the way the whole world thinks about combat. National Book Award finalist Chris Lynch continues his explosive fiction series based on the real-life, top-secret history of US black ops and today's heroic Navy SEALs.

Edwidge Danticat, the award-winning, best-selling author of *THE FARMING OF BONES* and *KRIK? KRAK!* offers a powerful addition to *The Royal Diaries* series with the story of Haiti's heroic queen Anacaona. With her signature narrative grace, Edwidge Danticat brings Haiti's beautiful queen Anacaona to life. Queen Anacaona was the wife of one of her island's rulers, and a composer of songs and poems, making her popular among her people. Haiti was relatively quiet until the Spanish conquistadors

discovered the island and began to settle there in 1492. The Spaniards treated the natives very cruelly, and when the natives revolted, the Spanish governor of Haiti ordered the arrests of several native nobles, including Anacaona, who was eventually captured and executed, to the horror of her people.

Such is the voice of Shan Sa's unforgettable heroine in her latest literary masterpiece, *Empress*. Empress Wu, one of China's most controversial figures, was its first and only female emperor, who emerged in the seventh century during the great Tang Dynasty and ushered in a golden age. Throughout history, her name has been defamed and her story distorted by those taking vengeance on a woman who dared to become emperor. But now, for the first time in thirteen centuries, Empress Wu (or Heavenlight, as we come to know her) flings open the gates of the Forbidden City and tells her own astonishing tale—revealing a fascinating, complex figure who in many ways remains modern to this day. Writing with epic assurance, poetry, and vivid historic detail, Shan Sa plumbs the psychological and philosophical depths of what it means to be a striving mortal in a tumultuous, power-hungry world. *Empress* is a great literary feat and a revelation for the ages.

An evocative, beautifully written story of a young Jewish woman trapped on the occupied island of Jersey during World War II. SUMMER 1940: Hedy Bercu watches the skies over Jersey for German planes, convinced that an invasion is imminent. For Hedy is Jewish. With no means of escape, Hedy hides in plain sight, working as a translator for the Germans while silently working against them. But as the war intensifies, Hedy knows she is in greater danger each day. Violence against women and children is a serious public health concern, with costs at multiple levels of society. Although violence is a threat to everyone, women and children are particularly susceptible to victimization because they often have fewer rights or lack appropriate means of protection. In some societies certain types of violence are deemed socially or legally acceptable, thereby contributing further to the risk to women and children. In the past decade research has documented the growing magnitude of such violence, but gaps in the data still remain. Victims of violence of any type fear stigmatization or societal condemnation and thus often hesitate to report crimes. The issue is compounded by the fact that for women and children the perpetrators are often people they know and because some countries lack laws or regulations protecting victims. Some of the data that have been collected suggest that rates of violence against women range from 15 to 71 percent in some countries and that rates of violence against

children top 80 percent. These data demonstrate that violence poses a high burden on global health and that violence against women and children is common and universal. Preventing Violence Against Women and Children focuses on these elements of the cycle as they relate to interrupting this transmission of violence. Intervention strategies include preventing violence before it starts as well as preventing recurrence, preventing adverse effects (such as trauma or the consequences of trauma), and preventing the spread of violence to the next generation or social level. Successful strategies consider the context of the violence, such as family, school, community, national, or regional settings, in order to determine the best programs.

This is the long-awaited second edition of this highly regarded comparative overview of corporate law. This edition has been comprehensively updated to reflect profound changes in corporate law. It now includes consideration of additional matters such as the highly topical issue of enforcement in corporate law, and explores the continued convergence of corporate law across jurisdictions. The authors start from the premise that corporate (or company) law across jurisdictions addresses the same three basic agency problems: (1) the opportunism of managers vis- à -vis shareholders; (2) the opportunism of controlling shareholders vis- à -vis minority shareholders; and (3) the opportunism of shareholders as a class vis- à -vis other corporate constituencies, such as corporate creditors and employees. Every jurisdiction must address these problems in a variety of contexts, framed by the corporation's internal dynamics and its interactions with the product, labor, capital, and takeover markets. The authors' central claim, however, is that corporate (or company) forms are fundamentally similar and that, to a surprising degree, jurisdictions pick from among the same handful of legal strategies to address the three basic agency issues. This book explains in detail how (and why) the principal European jurisdictions, Japan, and the United States sometimes select identical legal strategies to address a given corporate law problem, and sometimes make divergent choices. After an introductory discussion of agency issues and legal strategies, the book addresses the basic governance structure of the corporation, including the powers of the board of directors and the shareholders meeting. It proceeds to creditor protection measures, related-party transactions, and fundamental corporate actions such as mergers and charter amendments. Finally, it concludes with an examination of friendly acquisitions, hostile takeovers, and the regulation of the capital markets.

Is animal labour inherently oppressive, or can work be a source of meaning, solidarity, and social membership for animals? This challenging question drives this thought-provoking collection which explores the possibilities and complexities of animal labour as a site for interspecies justice. The book assembles an international and interdisciplinary group of scholars who carefully grapple with the many facets, implications, and entanglements of animal labour, and who, crucially, place animals at the heart of their analyses. Can animals engage in good work and have humane jobs? What kinds of labour rights are appropriate for animal workers? Can animals consent to work? Would recognizing animals as workers improve their legal and political status, or simply reinforce the perception that they are beasts of burden? Can a focus on labour help to create or deepen bonds between animal advocates and other social justice movements? While the authors present a range of views on these questions, their contributions make clear that labour must be taken seriously by everyone interested in more just and ethical multispecies futures.
