DescriptionThis workbook contains 60 subtraction facts worksheets with answers. Mastering the basic math facts develops automaticity in kids. Automaticity is the ability to do things without occupying the mind with the low-level details that are required; this is usually the result of consistent learning, repetition, and practice. Each worksheet has designated room at the top for students to write their names and for teachers or parents to record the score and time. All of the exercises are

numbered for easy reference. All of the answers are tabulated in the back of the book, also with numbers so that teachers or parents can easily check the solutions. It is recommended for students to attempt 1 set daily for consistent practice. Book starts with addition strategies to help students grasp basic concepts and get started.

High-Performance Coaching for Managers Cambridge University Press

Children are naturally inquisitive and eager to explore and learn about the world around them. It is important for their guardians, both Parents and Teachers, to satisfy their queries, and that too, in such a way that the children are able to understand and comprehend the concepts as well as learn from them. Also, there exists a gap in the level of information and knowledge provided to the children by the Parents vs. that provided by their Teachers. Discrepancies might also exist in the methodology(ies) through which the information and knowledge is relayed. This increases the possibility that the children might either not understand the concept clearly or become confused about the correct interpretation of the concepts. With these objectives in mind, and to build connectivity between the teaching methodologies by Parents and Teachers, we at Oswaal Books, have come up with this Manual for Teachers and Parents. Some benefits of using this manual are:

- It aims to aid the Teachers and Parents in simplifying the concepts studied by children as a part of their curriculum
- It equips the parents and teachers to enable the children to understand the subjects, and also evaluate their measure of understanding and creativity.
- It includes Learning and Understanding Aids along with a Lesson Plan for each Chapter
- It demonstrates Effective Teaching Techniques
- It also gives various Propositions for Step-wise Learning and Building up of Concepts

IMPORTANT FEATURES OF THE BOOK:

Strictly based on latest NCERT Textbook The manual is based on the latest NCERT Textbook 6 Exploratory Learning objectives These provide explicit instructions to parents and teachers to teach their wards Effective Teaching Techniques The manual

has tried and tested teaching techniques for higher success rate **WHAT THIS BOOK HAS FOR YOU:** Lesson Plan for each Chapter This provides clarity and direction to the users Tabulated and Categorised information This helps in creating and effectively executing the lesson plan 5Es of Learning This Manual is based on the 5 Es of Learning: Engage, Explore, Explain, Elaborate & Evaluate About Oswaal Books: We feel extremely happy to announce that Oswaal Books has been awarded as 'The Most Promising Brand 2019' by The Economic Times. This training guide introduces development practitioners, policy analysts, and students to social accounting matrices (SAMs) and their use in policy analysis. There are already a number of books that explain the System of National Accounts and SAM multipliers- some of these are recommended at the end of this training guide. However, most books tend to be quite technical and move quickly from an introduction to more complex applications. By contrast, this guidebook uses a series of hands-on exercises to gradually introduce SAMs and multiplier analysis. It therefore complements more theoretical SAM and multiplier literature and provides a first step for development practitioners and students wishing to understand the strengths and limitations of these economic tools. It is also useful for policy analysts and researchers embarking on more complex SAM-based methodologies. One such methodology is computable general equilibrium (CGE) modeling, for which IFPRI has also developed a series of introductory exercises and a standard modeling framework. To download the exercises, go to

Most technologies have been harnessed to enable educators to conduct their business remotely. However, the social context of technology as a mediating factor needs to be examined to address the perceptions of barriers to learning due to the lack of social interaction between a teacher and a learner in such a setting. *Developing Technology Mediation in Learning Environments* is an essential reference source that widens the scene of STEM education with an all-encompassing approach to technology-mediated learning, establishing a context for technology as a mediating factor in education. Featuring research on topics such as distance education, digital storytelling, and mobile learning, this book is ideally designed for teachers, IT consultants, educational software developers, researchers, administrators, and professionals seeking coverage on developing digital skills and professional knowledge using technology.

Chemistry Quick Study Guide & Workbook Routledge

Coaching is a necessary skill for managers. It is important as a fundamental part of an organization's talent efforts—including talent acquisition, development and retention strategies. For a coaching program to succeed in an organization, it should be recognized as a useful approach throughout the organization and become part of the fabric of the corporate culture. *Performance Coaching for Managers* provides an important tool for organizations to use to train their managers on coaching. This book differs significantly from other books in the coaching market. Many books on coaching cast coaches as facilitators who questions their clients (the coachees), helping them to articulate their own problems, formulate their own solutions, develop their own action plans to solve problems, and measure the success of efforts to implement those plans. That is called a nondirective approach. But this book adopts a directive approach by casting the coach as a manager who diagnoses the problems with worker job performance and offers specific advice on how to solve those problems. While there is nothing wrong with a nondirective approach, it does not always work well in job performance reviews in which the manager must inform the worker about gaps between what is needed (the desired) and what is performed (the actual). The significant difference between what is currently available in the market and what we are offering in *Performance Coaching* is the authors' collective experience of over 70 combined years of hands-on research and delivery experiences in the Human Resources Development field. According to the Harvard Business Review (2015), workers generally expect their immediate supervisors to give them honest feedback on how well they do their jobs—and specific advice on what to do if they are not performing in alignment with organizational expectations. When workers do not receive advice—but instead are questioned about their own views—they regard their managers as either incompetent or disingenuous. Effective managers should be able to offer direction to their employees. After all, managers are responsible for ensuring that their organizational units deliver the results needed by the organization. If they fail to do that, the organization does not achieve its strategic goals. This book gives managers direction in how to offer directive

coaching to their workers.
