From a modern-day Mary Poppins and the former star of TLC 's Take Home Nanny comes a holistic and guilt-free approach to parenting children ages seven and under.

Emma Jenner lives, teaches, and nannies by this philosophy: if parents are in control, they can enjoy their children more. And what could be more enjoyable than well-behaved, respectful, healthy, thriving kids? Keep Calm and Parent On effectively places parenting expert Emma Jenner on your shoulder, helping you see your child 's behavior from an objective standpoint that puts you firmly in charge.

Each chapter opens with a checklist of questions to ask yourself when you run into a specific problem, whether it 's sleeping, nutrition, communication, manners, consequences, or self-esteem. Jenner then breaks down each checklist, explaining how bad behavior is really just a habit that needs to be corrected. By connecting the dots in all areas of your child 's life, you can understand why he or she is acting out—and how to fix it. For example, the best discipline techniques in the world

won't work if a child is sleep-deprived, and a child will not demonstrate good manners if communication is faulty and he doesn't understand what's expected of him. Each chapter also features handy sidebars, as well as instructive and memorable quizzes. A strong proponent of raising our expectations, Jenner shows how parents can do more by doing less for their children. With an interactive format and straightforward solutions, this invaluable guide is designed to give parents bite-size takeaways they can use immediately with their children. Jenner's blend of British and American parenting styles is more than advice; it is proof that all children are capable of behaving—and that you have the keys to unlocking their potential.

Hexagon (KH-9) Mapping Camera

Program and Evolution John Wiley & Sons

The United States developed the Gambit and Hexagon programs to improve the nation's means for peering over the iron

curtain that separated western democracies from east European and Asian communist countries. The inability to gain insight into vast "denied areas" required exceptional systems to understand threats posed by US adversaries. Corona was the first imagery satellite system to help see into those areas. Hexagon began as a Central Intelligence Agency (CIA) program with the first concepts proposed in 1964. The CIA's primary goal was to develop an imagery system with Corona-like ability to image wide swaths of the earth, but with resolution equivalent to Gambit. Such a system would afford the United States even greater advantages monitoring the arms race that had developed with the nation's adversaries. The Hexagon mapping camera flew on 12 of the 20 Hexagon missions. It proved to be a remarkably efficient and prodigious producer of imagery for mapping purposes. The mapping camera system was successful by every standard including technical capabilities, reliability, and capacity.

This study focuses on the connection between education and the world of work and the urgency of the endeavor to educate the work force. Part I considers the resources for adult learning in the United States, with a focus on the major providers outside the traditional education system. Technological resources that can extend educational opportunities and reach more workers are then analyzed. Examples of each medium's use are given, and its limitations and effectiveness for instruction are charted.

One new development is given special attention: artificial intelligence as an aid in training and education. Part II describes workers' training opportunities. It looks first at the skilled trades and technical fields: construction workers, office workers, administrative assistants, information systems technicians, and factory workers encountering computer-integrated manufacturing systems. Next, the education of managers is considered. Finally, updating knowledge of advanced professionals is examined. Examples from various providers show contributions toward available opportunities. Part III deals with those whom training programs fail to reach or serve adequately: dislocated workers, unemployed youth, immigrants and refugees, and welfare recipients. The report concludes that the issues call for public responsibility and action. Federal, state, and private initiatives are

urged. Endnotes for each chapter and an index are appended. (YLB)
