laser was transmitted horizontally at a six foot depth in Lake Winnepesaukee, N.H. The irradiance was measured at distances from 0 to 100 feet and for off-axis angles from 0 to 58 degrees. The water had an attenuation length of 4.54 ft/ln and an absorption coefficient of 0.0446 ln/ft. The ratio of attenuation coefficient to absorption coefficient was 4.94. The fractional power contained within a cone of various angles was computed. At 20 attenuation lengths only 10%

of the total power is contained within a cone of 4 degrees whereas at 4 attenuation lengths this same cone contains 50% of the power. (Author).

forces us to rethink the history of cinema. Dan Streible's thought-provoking rediscovery of an entire lost genre of hundreds of early films reminds us how much we still do not know about the development of American movie culture. The fact that only a fraction of these forgotten films survive, and those mostly in fragments, makes this historical account of them all the more valuable."—Martin Scorsese "Men in skimpy clothing engaged in the manly art of beating each other became the cinema's very first movie stars. With masterful historical research in both film and sport history, Dan Streible's book provides the definitive account of the complex fascination these first films exerted, as prizefighting collided with early cinema and staged new battles over gender, race and class."—Tom Gunning, author of *D. W. Griffith and the Origins of American Narrative Film*, and *The Films of Fritz Lang* "'Sporting' men and curious women, slumming elites and working-class laborers, nativists and European immigrants, Great White Hopes and insurgent African Americans—Dan Streible's meticulous research brings to life the dynamic, overlapping, and often contentious public spheres that fight films pull into focus. Written in smart and straightforward prose, *Fight Pictures* combines new critical insights about early cinema's aesthetics of display

sound. In this inventive and inviting book, Chion considers how cinema has deployed music. He shows how music and film not only complement but also transform each other. The first section of the book examines film music in historical perspective, and the second section addresses the theoretical implications of the crossover between art forms. Chion discusses a vast variety of films across eras, genres, and continents, embracing all the different genres of music that filmmakers have used to tell their stories. Beginning with live accompaniment of silent films in early movie houses, the book analyzes Al Jolson ' s performance in *The Jazz Singer*, the zither in *The Third Man*, Godard ' s patchwork sound editing, the synthesizer welcoming the flying saucer in *Close Encounters of the Third Kind*, and the Kinshasa orchestra in *Félicité*, among many more. Chion considers both original scores and incorporation of preexisting works, including the use and reuse of particular composers across cinematic traditions, the introduction of popular music such as jazz and rock, and directors ' attraction to atonal and dissonant music as well
