Whether you've got a tiny Shuffle, a Nano, the Classic, or the new Touch, you'll learn everything from turning your iPod off and on to charging your iPod without a computer. Special coverage for iPod owners with trickster friends: How to reset the iPod's menus to English if they've been changed to, say, Korean. In tune with iTunes. iTunes can do far more than your father's jukebox. Learn how to pick and choose which parts of your iTunes library loads onto your iPod, how to move your sacred iTunes Folder to a bigger hard drive, and how to add album covers to your growing collection. The power of the 'Pod. Download movies and TV shows, play photo slideshows, find cool podcasts, and more: this book shows you how to unleash all your iPod's power. iPod is simply the best music player available, and this is the manual that should have come with it.

Passport to World Band Radio 2001

Hearing, health, and technologies are entangled in multi-faceted ways. This edited volume addresses this complex relationship by arguing that modern hearing was and is increasingly linked to and mediated by technological innovations. By providing a set of original interdisciplinary investigations that shed new light on the history, theory, and practices of hearing techniques, it is able to explore the heterogeneous entanglements of sound, hearing practices, technologies, and health issues. As the first book to bring together historians, scholars from media studies, social sciences, cultural studies, acoustics, and neuroscientists, the volume discusses modern technologies and their decisive impact on how "normal" hearing, enhanced and smart hearing, as well as hearing impairment have been configured. It brings both new insights into the histories of hearing technologies as well as allowing us to better understand how enabling hearing technologies have currently been unfolding an increasingly hybrid ecology engaging smart hearing devices and offering stress-free hearing and acoustic well-

being in novel auditory environments. The volume will be of interest to all scholars and students of disability studies, sound studies, sociology of health and illness, medical history, health and society, as well as those interested in the practices and techniques of self-monitored and smart hearing.
