The BBC Visual Effects Department closed its doors in 2003. For almost fifty years it had been responsible for some of television 's most iconic images – from exploding newsreaders on Monty Python 's Flying Circus to Blake 's 7 's majestic Liberator sailing through outer space; from the Queen Vic being engulfed in flames in Eastenders to severed heads dripping blood in The Borgias. Using interviews with the effects designers themselves, together with

hundreds of concept drawings, production photographs and stills from completed programmes, this book tells the story of the VFX Department and celebrates the work of a group of craftsmen who lived by the mantra, ' If it can be imagined, it can be made... ' Working largely before the age of cgi, the Department was responsible for every kind of visual effect, from physical effects such as rain and explosions, to miniatures and models, to sculpture and animatronics. Following a preliminary chapter on effects techniques, the book features in-depth accounts of fifty key shows, representing every genre from sci-fi and drama to comedies and documentaries. In each we see how the designers worked, from receiving the original script to creating the finished effects. There are numerous anecdotes about their tricks of the trade. Find out how the Martian 's eyes in Quatermass and the Pit

were animated using inflated condoms, and how Mrs Slocombe 's infamous pussy was manipulated by remote control. Filled with fascinating insights, wonderful stories and numerous photographs and artworks which have never been published, this is an essential book for FX fans and anyone who loves television

This new series of Expanded Guides focuses on photographic techniques not only to give you a comprehensive grounding in the subject but also takes you a step further to enable you to get much more from your photography.

Expert advice, with useful hints and tips, is given by professional photographers, using practical examples of techniques for clarity, illustrated in full colour with the aid of clear diagrams and charts. The digital revolution in cameras has led those who may have been successful with film format into a whole new area of learning. The RAW file format is digital photography's equivalent of a negative in film photography: it contains untouched, 'raw' pixel information straight from the digital camera's sensor, which must be processed to produce the final result. Understanding RAW Photography is a comprehensive guide, written by a professional photographer, that explains the procedure from the start of a photo shoot through each stage of post-processing your image to ultimately displaying it in print or on screen. In depth, jargon-busting text offers hints and tips on interpreting RAW images and gives step-by-step information on processes such as demosaicing and white balance, interpreting and converting images, applying tone

curves, adjusting colour saturation and contrast, sharpening an image, adjustment in camera and on a personal computer, and final generation of JPEG or TIFF format.

'If Duchamp or maybe Magritte wrote a novel it might look something like this remarkable little book of Padgett Powell's: immensely readable, ingenious, witty, and ultimately important-feeling in a way you can't quite describe but don't need to' Richard Ford Are your emotions pure? Are your nerves adjustable? How do you stand in relation to the potato? Should it still be Constantinople? Does a nameless horse make you more nervous or less nervous than a named horse? In your view, do children smell good? ... Does your doorbell ever ring? Is there sand in your craw? Is it a novel?

Whatever it is, *The Interrogative Mood* is stubbornly memorable. Through a seemingly random but infinitely artful series of questions this small masterpiece mysteriously, elusively, hilariously, compellingly lights up life.

Using werewolves and Wernher von Braun, Stonehenge and the sex lives of sea corals, aboriginal myths, and an Anglican bishop in this new book, the author weaves variegated information into a glimpse of Earth's closest celestial neighbor, whose mere presence inspires us to wonder what

---

might be out there. Going beyond the discoveries of contemporary science, he presents a cultural assessment of our complex relationship with Earth's lifeless, rocky satellite. As well as offering an engaging perspective on such age old questions as "What would Earth be like without the moon?" he surveys the moon's mythical and religious significance and provokes existential soul searching through a lunar lens, inquiring, "Forty years ago, the first man put his footprint on the moon. Will we continue to use it as the screen onto which we cast our hopes and fears?" Drawing on materials from different cultures and epochs, he walks readers down a moonlit path illuminated by more than seventy-five vintage photographs and illustrations. From scientific discussions of the moon's origins and its chronobiological effects on the mating and feeding habits of animals to an illuminating interpretation of Bishop Francis Godwin's 1638 novel *The Man in the Moone*, his interdisciplinary explorations recast a familiar object in an original light.

The first collection of food writing by Britain's funniest and most feared critic A.A. Gill knows food, and loves food. A meal is never just a meal. It has a past, a history, connotations. It is a metaphor for life. A.A. Gill delights in decoding what lies behind the food on our plates: famously, his reviews are as much ruminations on society at large as they are about the restaurants themselves. So

---

alongside the concepts, customers and cuisines, ten years of writing about restaurants has yielded insights on everything from yaks to cowboys, picnics to politics. TABLE TALK is an idiosyncratic selection of A.A. Gill's writing about food, taken from his Sunday Times and Tatler columns. Sometimes inspired by the traditions of a whole country, sometimes by a single ingredient, it is a celebration of what great eating can be, an excoriation of those who get it wrong, and an education about our own appetites. Because it spans a decade, the book focuses on A.A. Gill's general dining experiences rather than individual restaurants - food fads, tipping, chefs, ingredients, eating in town and country and abroad, and the best and worst dining experiences. Fizzing with wit, it is a treat for gourmands, gourmets and anyone who relishes good writing.

On 18 October 1945, a day that would haunt him for ever, Airey Neave personally served the official indictments on the twenty-one top Nazis currently awaiting trial in Nuremberg – including Hermann Goering, Rudolf Hess, Julius Streicher and Albert Speer. With his visit to their gloomy prison cells, the tragedy of an entire generation reached its final act. Neave, a wartime organiser of MI9 and the first Englishman to escape from Colditz Castle, watched and listened over the months as the momentous events of the trials unfolded. He describes the cowardice, calumny and, in some cases, bravado of the defendants – men he would come to know and who in turn would become known as some the most evil men in history. Was the trial victors' justice? Or was it civilisation's infinitely painful verdict on the worst crimes ever committed? These questions, and many others, are answered in this definitive eyewitness record of the Nuremberg trials.

Prior to Google+, Photographers relied on a mix of Twitter, Facebook, Flickr, and other services to display their work and interact with others. No single service provided photographers with a complete set of tools that allowed them to connect with others in a rich, meaningful way—until now. Unlike other social networks, Google+ allows photographers to

upload, personalize, and update images easily. The Google+ interface is intuitive and attractive—images appear large and uncropped in the stream, preserving their original integrity; and the infinite scrolling feature creates a fluid, enjoyable photo browsing experience. In addition, the Google+ interface is built to encourage social interaction, not in miniature sound bites, but in full-length discussions with diverse groups of people. Users can build circles to connect with just those they want to include in different conversations, and they can use the Hangouts feature to talk with other users in real time from anywhere in the world. With this book, you'll see why Google+ has quickly become the most inspiring and interactive social network for photographers, and you'll learn how to leverage Google+ to build a following and connect with other photographers—and potential customers. Explains how to effectively showcase your work for the vibrant and growing Google+ photography community Shows how to upload, organize, and share your images; and hone your skills through photo-critique circles Features interviews with leading photographers who share their own photos and tips on how to make the most of Google+ to build an online presence
